

airCloud Home

HITACHI

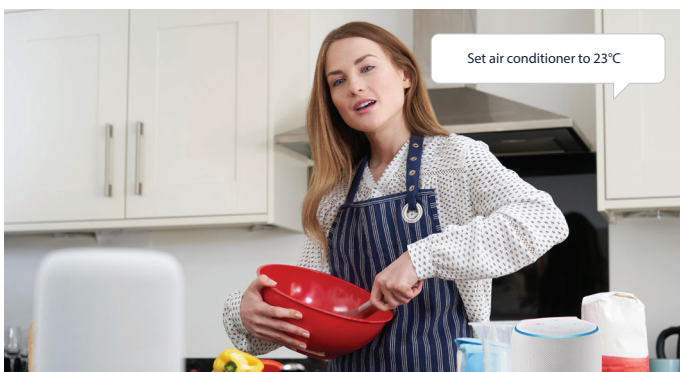

A **NEW** app that lets you control your air conditioner from anywhere

Controls made easy

Simplicity of an app.

airCloud Home is a user-friendly interface that lets you create comfort directly from your smartphone.

Command with your voice

Connect with your smart speaker.

airCloud Home is fully-compatible with Amazon Alexa and Google Assistant, enabling you to change the temperature hands-free while you cook, clean, or exercise.

Amazon Echo

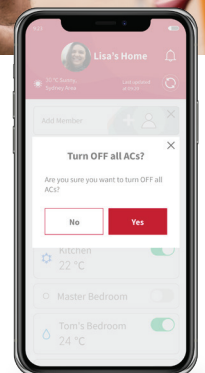

Google Home

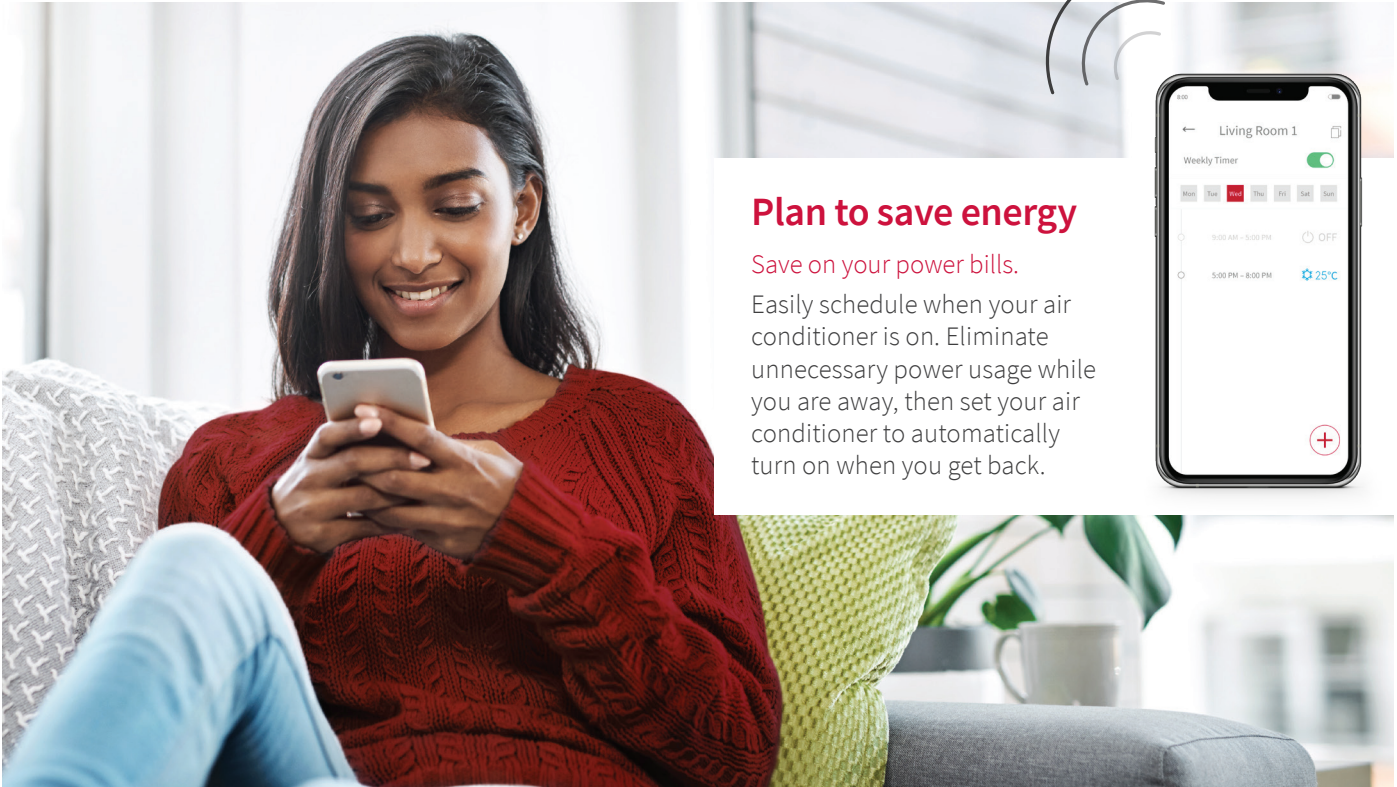

Forgot to turn off the AC?

Worry no more.

With airCloud Home, you can control your air conditioning with one touch, even while away from your home.

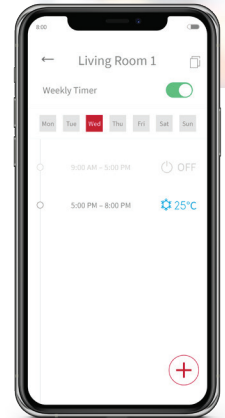

Cooling & Heating

Plan to save energy

Save on your power bills.

Easily schedule when your air conditioner is on. Eliminate unnecessary power usage while you are away, then set your air conditioner to automatically turn on when you get back.

Designed for your convenience

1 Register in just a few steps

It's very easy to get started with airCloud Home. Quickly create your account online and configure your air conditioner with ease.

2 Share access with your family

You can give access permissions to up to 10 people. Permissions can be customized depending on the user's profile, ideal for children or guests.

3 Control up to 20 AC units

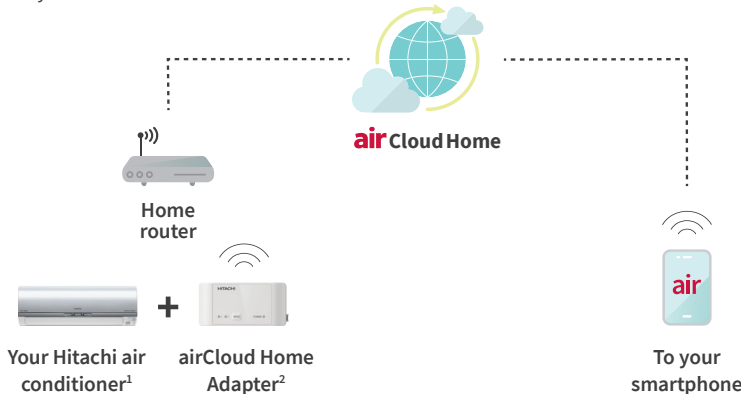

A quick shortcut enables you to turn off all air conditioners registered to your airCloud Home account at the same time. You can also register a secondary home.

+ Data security

Your security is our priority. With high security standards, only a minimal amount of personal data is required to set up your account.

How airCloud Home works

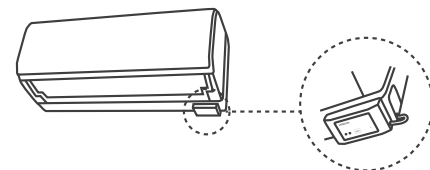

Connect your air conditioner to the cloud, via your home wireless network.

airCloud Adapter

Discreet and easy to install

- airCloud Adapter² is placed onto the bottom of your air conditioner. This connects to the cloud, via your home network.
- The process is quick, and once installed, the user can quickly pair with the app via QR code.
- No additional power source is required.
- Small discreet unit: D40*L80*H16.5mm.

visit aircloudhome.com
