PUREBEAU Permanent Make-up

PIGMENTATION DEVICES & CONTROL UNITS

Attendance & hygiene

The sophisticated hygiene system (integrated return protection) of the handpiece BLUEmagic only requires normal cleaning with equipment disinfectant. All consumable like needles, needle nozzles and pigments can be used just one time and must be discarded after treatment.

Needle types

Special developed custom-fitted all-round T-needles and flat needles made of stainless steel. Purebeaus FRS needlesystem provides very good colour entry into the skin.. facts

Colour & secureness

PUREBEAU Equipment is ideally devised for the PUREBEAU LF-HICON micro-pigments. The integrated colour rewind safety system provides for optimum hygiene (it complies with the worldwide health requirements, partial sterilizable in the hot-air steriliser).

Working Level

Thanks to the PUREBEAU HIGH-INTELLIGENCE DRIVE you have perfectly adjustable to several fields of application, digitally controlled working Level. High precision run to to achieve absolutely accurate pigmentation.

B
TRS Turbo

The precision control hides in a puristic all-aluminum body daring to face the gaze. The design fascinates with a new, clear style and functionality: no attribute is too much, no function too little.

This makes working with the TRS Turbo a real pleasure, because the combination of technology, workmanship and design inspires even the highest of demands.

C
CirclePro III

As usual with PUREBEAU, the precision control of the PUREBEAU CIRCLE PRO III makes working a pleasure. The easy-to-clean all-aluminum housing captivates with its elegant appearance and sophisticated tilting technology for the control unit.

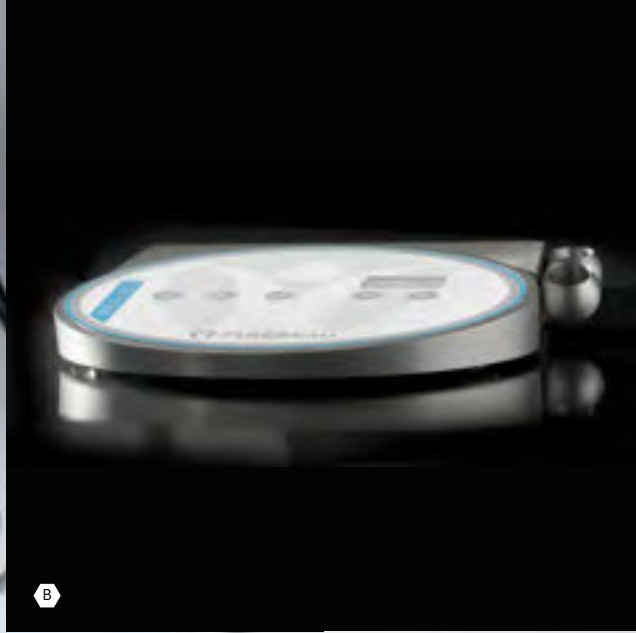

The functions are simple and accurate and you can decide whether you want to operate them via a flat, almost graphic device or following the example of the TRS Turbo, the control panel folds out of the massive „Circle“. A real eye-catcher for your studio ...

B VitaLaser 1000

PUREBEAU Lasersystems

Laser power for professionals

A

Eraser QS-YAG

Advandayss

1. Removes only color pigments. The epidermis is treated gently and hair follicles are not affected.
Effect: Low scar risk and surface stunning is not necessary in many cases.
2. The dual wavelength system allows the removal of many colors and color mixtures that are difficult to remove with conventional methods.
3. The targeted and gentle treatment leads to the rapid recovery of affected areas, daily activities are not affected.
4. High usability due to easy-to-use technology

How does the laser work?

The energy of the laser is absorbed by the unwanted color pigment. The height of the temperature causes the breakage of the pigment. The broken pigment particles are removed by phagocytosis and absorbed by the body.

Comfort Features

- ▶ No scarring at correct application
- ▶ Short treatment time and easy handling
- ▶ Extensive application areas and fast return of investment

Laser type	YAG Laser
Wavelength	1064nm oder 532nm
Pulse energy	200mJ
Pulse time	10ns
Pulse rate	1Hz bis 5Hz
Dimensions	240x210x400mm
Mass	14kg
Power supply	220V 6A

10.purebeau.Eraser

B

VitaLaserVL1000 Biolifting

Advandayss

You can count on these results:

1. firmer skin, significant reduction of wrinkles, skin tightening on the neck after a 3-month treatment, improvement in the overall structure of the skin's appearance
2. Improvement of the moisture content of the skin
3. Refining the porosity of the skin, healthier appearance, even complexion

Propagation of collagen and elastin fibers

How does the system work?

Hyaluron consumes itself as an energy source for the cells and through the absorption of free radicals. It is the most important vital substance of the skin.

The innovative Vitalaser Biolifting System stimulates cell metabolism with intense infrared radiation.

By simultaneously adding natural hyaluronic acid, the skin is now able to store water and produce more collagen and elastin.

In the meantime, hundreds of thousands of satisfied customers have enjoyed the pleasant, soothing, completely painless and side effect free method.

The Vitalaser-System:

- ▶ easiest handling
- ▶ up to 6 weeks long-term effect
- ▶ immediately a visibly smoother and fine-pored skin
- ▶ no side effects
- ▶ soothing relaxed treatment
- ▶ Treatment suitable for allergy sufferers / diabetics / neurodermatitis

1000.vl

C

VitaLaser Lifting Gel

Hyalupure Gel

The Original Vitalaser hyalupure Lifting Gel is a purely biologically active gel that is immediately absorbed by the skin due to its purity and consistently dispenses with any foreign substances:

- ▶ No alcohol and no preservatives, such as preserving fruit acids or metals
- ▶ No synthetic fragrances or perfume, mineral oils and emulsifiers
- ▶ No penetration enhancers and other free radical additives
- ▶ No allergenic substances, compatible like water

PUREBEAU

PUREBEAU ICE KRYPO SYSTEM (Cryolipolysis)

In a non-invasive way, the PUREBEAU ICE method makes use of the high sensitivity of the fat cells to cold and triggers a natural reduction process.

Our fat cells are actually designed to provide us and our bodies with energy reserves during 'starvation'. When losing weight or during a diet, fat cells release their contents and shrink.

However, everyone knows the zones of his body where fat pads persist (belly, legs, bottom).

This is normal and often genetically determined, because there are an enormous amount of fat cells in these places, which leave behind for their sheer mass, unfortunately also in the deflated state clear upholstery. The only chance to get rid of these pads is the reduction of fat cells as such.

The PUREBEAU ICE method makes use of the fact that fat cells are extremely sensitive to cold and can be destroyed by it. When they become fat cells using the PUREBEAU ICE method, they can crystallize and are naturally broken down by the body. Professionally one speaks of the so-called Cryolipolysis.
