**WARNING** - Ametek/Lamb Electric thru-flow vacuum motors must never be used in applications in which wet or moist conditions are where dry chemicals or other volatile materials are present or where airflow may be restricted or blocked. Such motors are designed to permit the to pass over the electrical winding to cool it. Thus any foam, liquid (including water), dry chemical or other foreign substance will come in contact with the electrical conductors which could cause combustion (depending on volatility) or electrical shock. Failure to observe these precautions could result in property damage and severe personal injury, including death in extreme cases. All applications incorporating Lamb motors should be submitted to Underwriters Laboratories or other appropriate organizations or agencies for testing specifically related to the safety of your equipment.
