FEATURES

1. Studio headphones with clear tone quality for enhancing monitor experience;
2. Full bass, crisp highs and pleasant mids for upgraded listening experience;
3. Wearproof and comfortable earmuffs and headband to wear;
4. Adjustable headband, user-friendly design;
5. Detachable coiled cable for easy storage and use;
6. 3.5mm/6.35mm audio connector;
7. Coming with two detachable cables, makes the headphones more convenient to use with more devices.

GUIDELINES FOR USE ADJUSTING THE HEADBAND

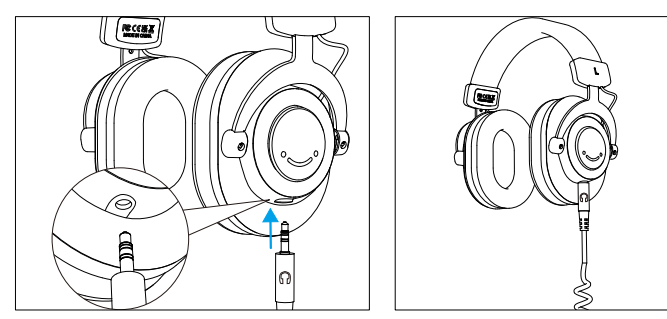

Adjust the headband via its snap-in locking mechanism on the left and right sides. For good transmission quality and best possible comfort, adjust the headband to properly fit your head.

DETACH/EQUIP COILED CABLE

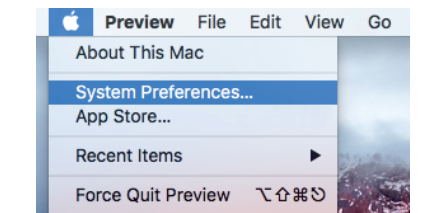

Unplug the coiled cable outward to separate it from the headphones for easy storage. Insert the coiled cable completely into the jack to combine it with the headphones for use.

Tips: Make sure to fully insert the cable into headphones.

COMPUTER SET UP

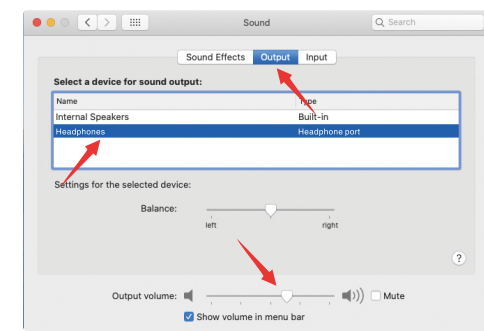

Apple MAC OS

- 1) Connect the headphones into the correct 3.5mm port on your Mac. Make sure plug it fully into the port, and none of the headphones are disabled, muted or something.
- 2) Go to System Preferences.

- 3) Click Sound to display the Sound preference pane.

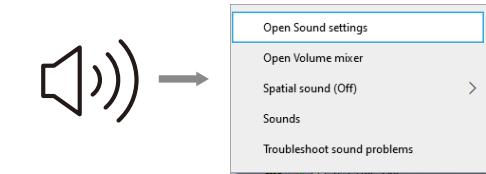

- 4) Click the Output tab and make certain "Headphones" is selected as the default output device. Drag progress bar to adjust headphones volume.

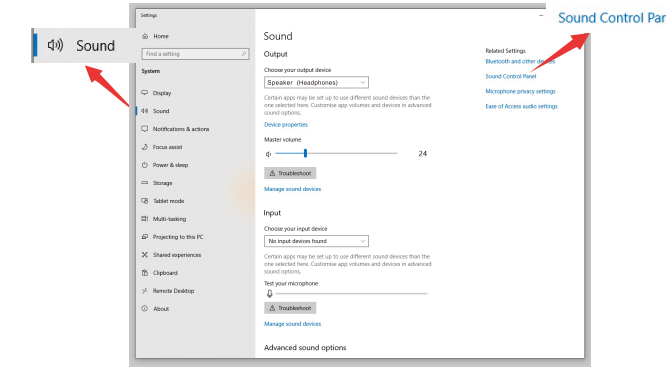

- 5) If there is no sound from the headphones, please try the following ways to solve, a. reset your Mac and replug the headphones in the available port of the Mac, b. check if the audio volume is on, c. check if the detachable cable is fully connected to headphones and Mac.

Windows

- 1) Connect the headphones into the correct 3.5mm port on your PC/Laptop. Make sure plug it fully into the port, and none of the headphones are disabled, muted or something.
- 2) Right click the speaker icon at the bottom right of the screen. Click "Open Sounds Settings".

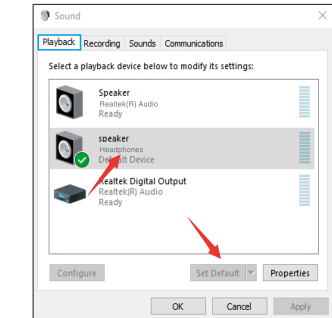

- 3) Click the Sound Control Panel.

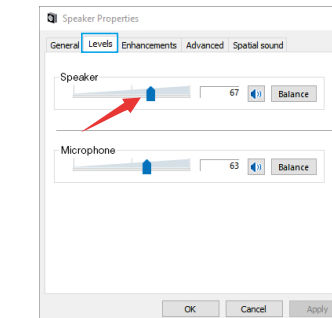

- 4) Click the Playback tab, and choose "Headphones" as the default device. When you playback audio, bar-type icon will turn green and bounce. (If it remains unchanged, please try the following ways to solve, a. reset computer and replug the

headphones in the available ports of the computer, b. check if the audio volume is on, c. check if the detachable cable is fully connected to headphones and computer.)

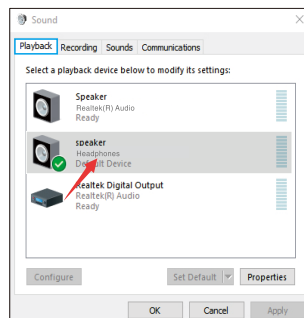

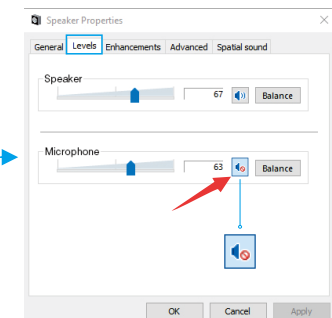

- 5) Adjust headphones volume. Double click the "Headphones" to open the Speaker Properties window and click the "Level" tab. Drag the process bar to adjust the headphones level.

Tips: If you don't want to monitor your own voice, you can follow below steps. Go to Sound Control Panel-"Playback" tab-select "Headphones" Speaker-Properties-"Level" tab-disable the microphone volume.

6

NOTE

1. If you want to connect the headphones to computer, but there is no 3.5mm port on it, you will need a suitable 3.5mm adapter for connection. And please plug the 3.5mm adapter into your computer first, then connect the headphones with the adapter. (Please consult your computer manufacturer about the 3.5mm adapter suitable for your computer.)
2. If computer prompts that it's unable to identify the devices, please restart computer and replug the headphones into the correct 3.5mm port of your computer.
3. If the headphones are recognized but no sound coming out, please check whether System Sound or audio volume in apps is on.
4. If you need to use the headphones with the audio device with a 6.35mm audio jack, please use the supplied 3.5mm to 6.35mm cable for connection.
5. The product can not be used with power amplifier.
6. Comes with two detachable coiled cable for the headphones. If you need to replace the detachable cable, you can choose 3.5mm TRS to 3.5mm TRS audio cable, or 3.5mm TRS to 6.35 TRS audio cable for replacement.

7

PRECAUTIONS

On Headphones Use

- Please wear the headphones correctly according to the "L" and "R" on the headphones. Wear the "L" side on the left ear, and wear the "R" side on the right ear.
- Please monitor the audio at a moderate volume to prevent adverse effects on the hearing.
- Do not listen for a long time at high volume to avoid hearing damage.
- There is a tendency to raise the volume when using in noisy places. However, for reasons of safety, it is advised to keep the volume at a level whereby you can still hear sounds around you.
- When the volume is too high, the sound may leak outside the headphones. Be careful not to raise the volume so high that it bothers people around you.
- Please stopping using in potentially dangerous situations, such as driving, biking, or other outdoor activities, etc.

On Safety

- Do not drop, hit, or otherwise expose headphones to strong shock of any kind, which may damage the product.
- Do not attempt to disassemble the headphones without authorization, which may affect the product use.
- Do not submerge in liquid or water
- Do not use any corrosive cleaner or oil to clean the product. You can clean it by dry cloth.

On Placement

You can place the headphones flat on a desk or place on a headphones stand. Do not place the headphones in the following locations.

- Location exposed to direct sunlight, near a heater, or other extremely high-temperature location
- Dusty location

8

- On an unsteady or inclined surface
- Location exposed to large amounts of vibration
- Bathroom or other high-humidity locations
