**WHAT'S IN THE BOX?**

1 X USB Gooseneck Tabletop Microphone

1 X Foam Windscreen

1 X User Manual

**SPECIFICATION**

Model: K052

Element: Condenser

Polar pattern: Cardioid

Sensitivity: -45±3dB

Operation Voltage: 5V

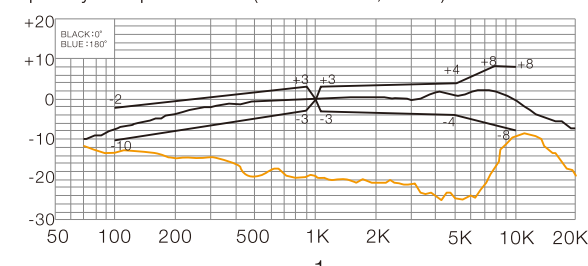

Frequency Response: 50Hz-18KHz

S/N ratio: ≥75dB

Dynamic Range(Typical): 75dB

Switch: Flat, push on-off

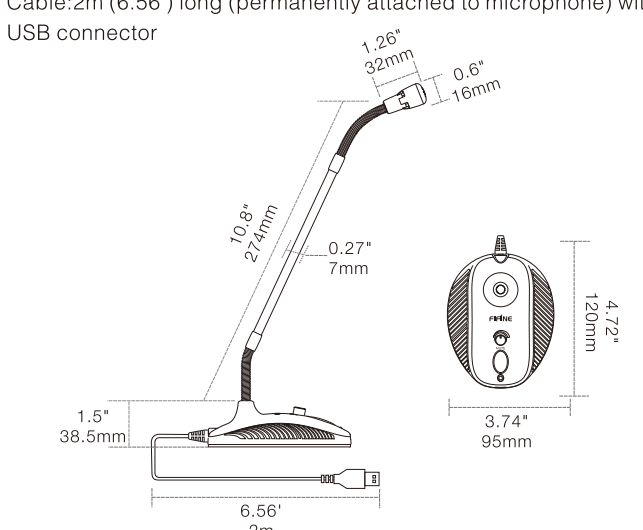

Frequency Response : (0dB =1V/Pa, 1KHz)

Dimensions: Microphone: 344.5 mm (13.56") long, 16 mm (0.63") head diameter.

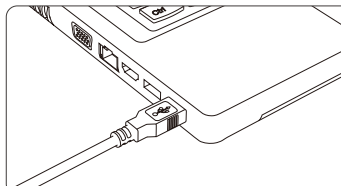

Weight: 259g

Cable: 2m (6.56") long (permanently attached to microphone) with USB connector

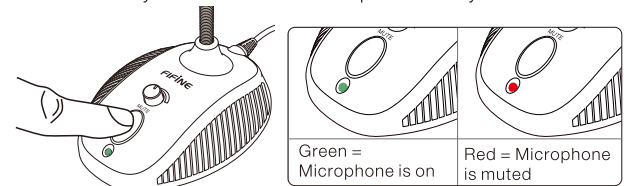

**OPERATION**

1. Plug the K052 into your computer to get the 5V USB power supply for operation.

**2. Mute Button Operation**

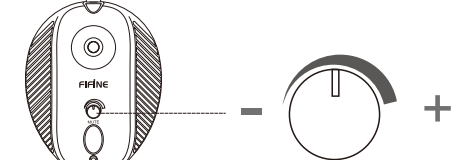

Press the button on the desktop base to turn the mute on/off. Mute is indicated by an LED on the microphone body.

Green = Microphone is on  
Red = Microphone is muted

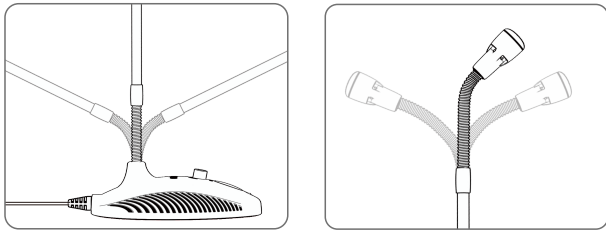

**3. Volume Operation**

- Volume up: Clockwise (Turn right)
- Volume down: Counterclockwise (Turn left)

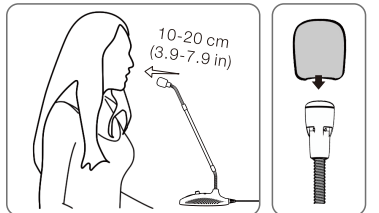

**4. Flexible Adjustable Gooseneck**

- Provides up to 12" (32.5cm) of length.
- With two flexible shaft that can be adjusted.

**5. Guidelines For Use**

- Maintain a distance of approximately 10 - 20 cm (3.9-7.9 in.) between the sound source and the microphone.
- Always use the supplied windscreen to control plosives.

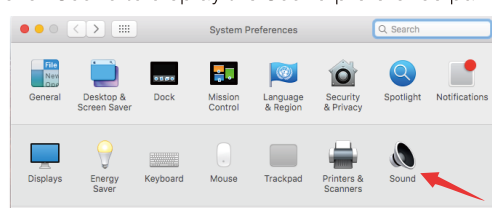

**COMPUTER SETUP**

**Apple MAC OS**

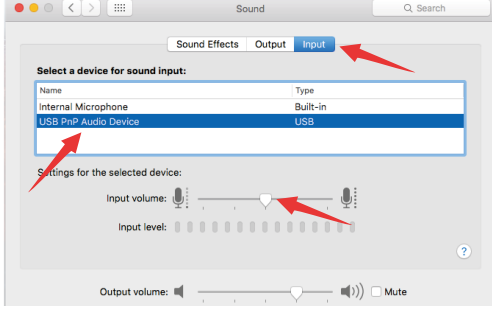

- Plug the free end of the provided USB cable into the USB port on your computer. Your computer will automatically recognize the USB device and install a driver.
- To select the K052 as your audio input, first, open your System Preferences.

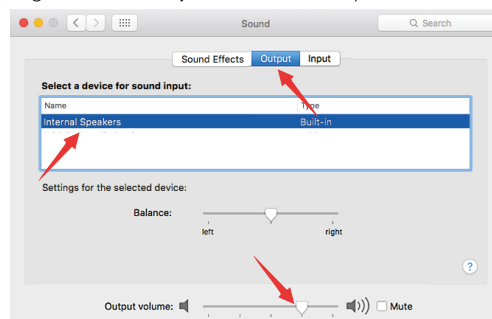

3. Next, click Sound to display the Sound preference pane.

4. Click the Input tab and make certain "USB PnP Audio Device" is selected as the default input device. Drag progress bar to adjust volume of input.

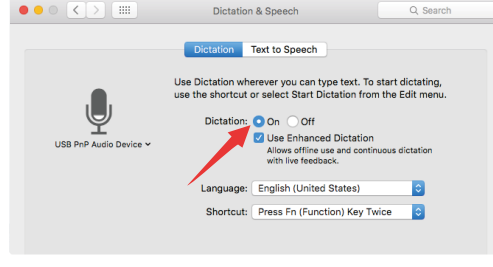

5. If you need to output your voice from the 3.5mm headphone jack of Macbook, choose the output from "Internal Speaker" option. Drag progress bar to adjust volume of output.

**NOTICE:**

- If you want to monitor your voice when using Macbook, you must turn on "Recording software first (Audacity for example), make sure to click "Software Playthrough(on)", then click the record button to begin, otherwise you can not hear any sound when you speak to the mic.

• Choose the default Dictation & Speech software when you use the speech to text in Macbook, click "On" under Dictation window, so that your microphone can be recognized by the software.

• If your Mac only has USB C port, you will need a genuine Apple USB-C to USB female adapter for connection. And pls plug the USB adapter into your Mac first, then connect the mic with the adapter.

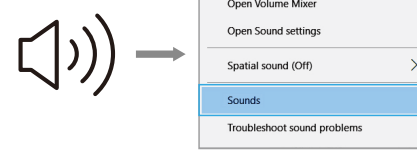

**Windows**

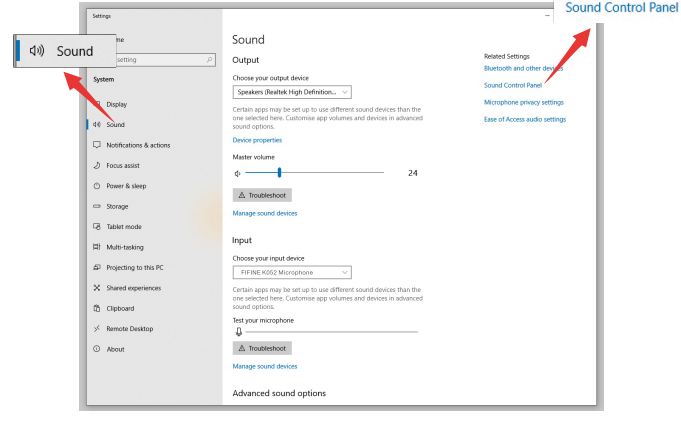

Please wait for a few secs when first time operation, since driver of microphone takes time to automatically install. There may be no pop-up window or message though. (If plugging USB plug in a different USB port, driver installs again).

After installation, you can test the mic by speaking to it. If the mic picks up no sound, please follow procedures below.

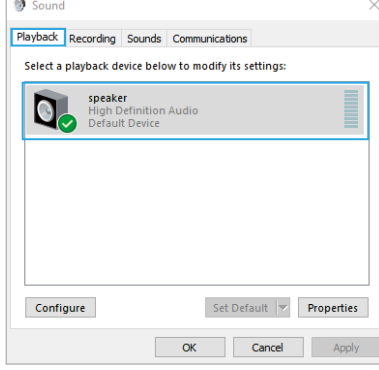

- Right-click the speaker icon at the bottom right of the screen. Click "Sounds".

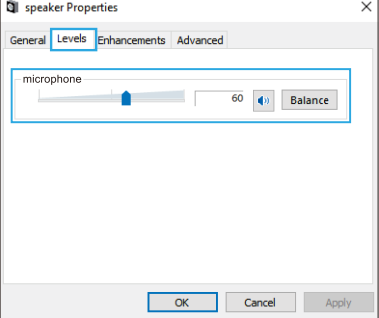

2. Click the Sound control panel.

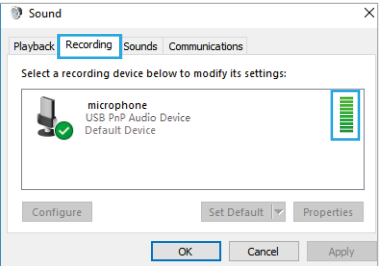

3. Confirm the loudspeaker is open.

Click the loudspeaker is being used-"Properties"--"levels", drag progress bar to adjust volume of output

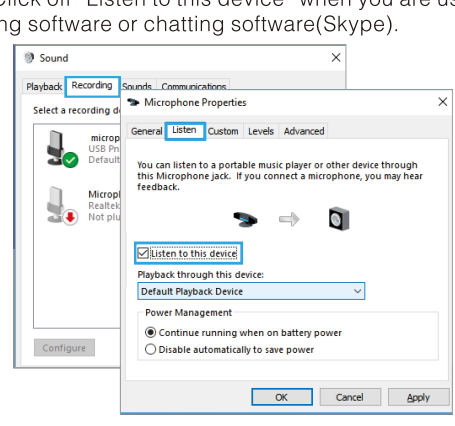

4. Select the Recording tab, and choose "USB PnP Audio Device" as the default device. When you speak to mic, bar-type icon will turn green and bounce. If it remains unchanged, please reset computer and replug in the USB port. If there's still no "USB PnP Audio Device", please contact FIFINE after service.

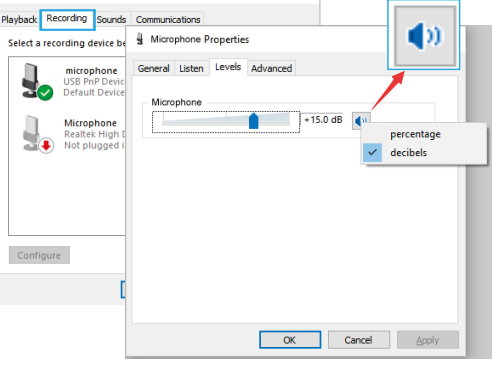

5. If you want to monitor your recording, click Microphone "USB PnP Audio Device" - "Properties" - "Listen" - click "Listen to this device" - "Apply". No sound can be heard through earphone/ computer speaker, if you don't follow this procedure.

**NOTE:** Click off "Listen to this device" when you are using any recording software or chatting software (Skype).

6. Double click the "USB PnP Audio Device" to open the Microphone Properties window. Right click the speaker icon under the Levels tab, change to decibels from percentage. To get the best sound of the mic, please adjust the mic level during this range (+14.0 to +20.0dB), when the output volume of the speaker is max.

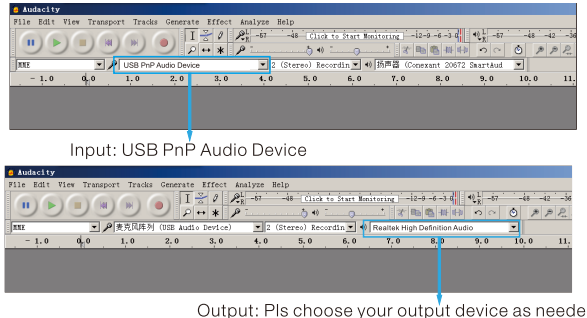

**Note: (Applicable for MAC and Windows)**

- If computer prompts that it's unable to identify USB devices, please restart computer and replug the microphone into rear back USB port of your computer.
- If mic recognized but no sound comes out, please check whether System Sound is mute and whether you have turned volume control on microphone to minimum.
- If the mic is recognized but no sound comes out, and your PC is running on Windows 10, please go to settings > privacy > microphone and click the "Allow apps to access the microphone" to ON, then restart your PC.

**Recording Software Settings**

- Make sure you have the correct input / output selected in the software.

Note: log out the [Audacity] (or other recording software you are using) if you find the USB microphone is unavailable. And restart in the software after the mic is re-plugged.

Input: USB PnP Audio Device

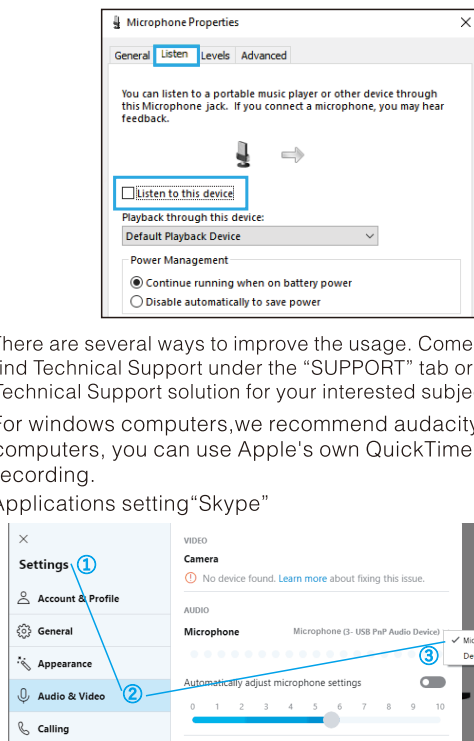

Output: Pls choose your output device as needed

- Make sure to click off "Listen to this Device" in your computer system when you are using any recording software, or else you would hear duet of yourself just like too much echo.

3. There are several ways to improve the usage. Come to our website, find Technical Support under the "SUPPORT" tab or directly search the Technical Support solution for your interested subject.

4. For windows computers, we recommend audacity, and for Apple computers, you can use Apple's own QuickTime player to test the recording.

5. Applications setting "Skype"

**FEATURES**

- Cardioid polar pattern with tailored response for speech.
- Dual-section gooseneck enables ease of positioning and placement options.
- A desktop base features a switch that includes a silent mute switch with LED indicator.

• Great-sounding usb microphone for your computer-Plug and play, connect it to your Mac or PC, you're ready to record.

• Ideal for Live chat, IP communication, internet telecommunication, game chatting.

**IMPORTANT NOTICE**

• **Setting your software levels**

Correct adjustment of microphone level is important for optimum performance. Ideally, the microphone level should be as high as possible without overloading the input of your computer. If you hear distortion, or if your recording program shows levels that are consistently overloaded (at peak levels), turn the microphone volume (or level) down, either through your control panel (or system preferences) settings, or through your recording software. If your recording program shows insufficient level, you can increase the microphone gain either from the control panel (or system preferences) settings or through your recording program.

• **Selecting software**

Many recording software can be chosen. Audacity, available for free online is a widely used software. If you plug in the mic AFTER you load Audacity, it may not recognize the mic while it may still record, the results will be unsatisfactory. If that happens, restart Audacity AFTER plugging the USB into your computer.

• **Monitor setting**

If you want to listening to yourself, pls click "Listen to this Device" in your computer system (Windows system). Remember to click off "Listen to this Device" in your computer system when you are using any recording software or chatting software (Skype), or else you would hear duet of yourself just like too much echo.

• **Protecting your microphone**

Avoid leaving your microphone in the open sun or in areas where temperatures exceed 110° F (43° C) for extended periods. Extremely high humidity should also be avoided.
