**Blue light:** Phone camera controlling

## How to mount and balance mobile phone on the gimbal?

①

Unfold the gimbal

②

Screw up  
the knob

③

Turn the "hohem"  
logo upward

④

Put your phone  
stuck in the bottom  
of phone clamp and  
pull the head of  
phone clamp to  
mount your phone

⑤

Slide the phone and  
make sure it is  
clamped in the  
middle, power on  
the gimbal after  
balancing the  
phone clamp

The gimbal would work  
improperly if not screw the  
knob up.

Clench the phone clamp, ensuring that your phone is  
cling to the rubber mat, otherwise the gimbal would  
vibrate or turn off automatically.

## Booting up iSteady X2 at first use

## Working Mode & Follow Speed

\*For changing working mode or follow speed, please open Hohem Pro app - Start Recording - Gimbal Parameter Settings

\*Ensure the Bluetooth is connected and change the settings

### Working Mode

#### Pan&Tilt Follow

This is the default working mode. When you rotate the handle left/right/tilt up/tilt down, the camera will follow the handle movements, and the roll motor is locked without following the movement.

## Pan Follow

When you rotate the handle left/right, the camera will follow the handle movements. The tilt motor does not follow within the angle range of  $-30^{\circ}\sim+30^{\circ}$  movement, if exceed this range, the gimbal will follow the tilt movement, and the roll motor is locked without following the movement.

## All Lock

The roll and pan motors are locked without following the movement. The tilt motor does not follow within the angle range of  $-30^{\circ}\sim+30^{\circ}$  movement, if exceed this range, the gimbal will follow the tilt movement.

## POV (All Follow)

First person point of view

Gives you  $360^{\circ}$  complete movement, you can pan, tilt and roll with it.

## Follow Speed

**General** Shooting with general follow speed

**Slow** Shooting with slow follow speed

**Medium** Shooting to follow the fast movement

**Fast** Fast follow speed for video transition

## How to fold Gimbal?

## How to do if the gimbal is not level after powering on?

If the gimbal is not level after turned on, or pan axis is slight drift when the gimbal is still, please calibrate the gimbal on a stationary and horizontal surface.

- ① Turn on the gimbal, press function button 5 times
- ② Start calibration after a beep sound
- ③ The battery indicator light keep flashing
- ④ The calibration is done after two beeps sound (the calibration takes about 40 seconds)

## Use as emergency power bank

The gimbal can be used as emergency power bank for your mobile phone and other electronic devices.

## Power indicator and Bluetooth indicator function

### Power Indicator Lights

Stay on: Fully charged or charging complete

Single flashing: Charging

Continuous Flashing: Calibrating
