Mobile Engineer

Job Description

Our Team

Mighty Jaxx is a unique future culture company that creates quality products across multiple categories such as art collectibles and lifestyle items, bridging the physical & digital world by powering it with technology. Since our inception in 2012, we have produced over 1,000 designs in collaboration with world-renowned artists and global entertainment brands like Hasbro, Sesame Workshop, Toei Animation and Warner Bros, delivering 5 million units of tech enabled collectibles to collectors in over 60 countries in 2020 alone.

We are proud to be an equal opportunity employer with a diverse, inclusive work environment and encourage our employees to bring their true fun-loving and high-energy selves to the workplace. With big, vibrant dreams and a culture of high performance in our workplace, you will always be engaged, empowered and feel positively challenged.

At Mighty Jaxx, we always extend our full support to the team to help them reach their full potential personally and professionally. If you love keeping up with the latest trends across different sub-cultures, love technology and are ready to embrace your creativity, we love to have you join us in creating the most unique experiences, products and content for our collectors!

The Job

You will be hands-on with empowering collectors across the globe through design and technology. You will have the opportunity to work across both online and offline products to create delightful and meaningful experiences for collectors around the world. You are responsible for building the next-generation web and native applications for our collectibles platform and other products in our ecosystem.

Responsibilities

- Implement new user-facing features in Mighty Jaxx's products, which have a huge amount of present value everyday
- Build fast and easy-to-use experiences for native mobile apps with React Native for devices of all sizes
- Optimize apps to maximize speed and scale
- Build libraries and frameworks that support complex mobile applications, speed development efficiency up and improve code quality
- Learn new trends and implement them within Mighty Jaxx's ecosystem
- Be a leader and mentor challenge, grow and mentor designers and foster a strong spirit of collaboration and excellence
- Participating in key internal meetings including weekly status updates and planning sessions

Requirements

- 2 - 3 years in mobile app development (e-commerce is definitely a plus)
- Worked 2-3 years writing TypeScript/JavaScript code, and a strong knowledge of React Native. A good grasp on state-management patterns such as Redux, Flux, etc
- Fluent in responsive design, native mobile/tablet design
- Expertise in HTML5, CSS3 and JavaScript
- Degree in computer science or other relevant fields
- Excellent communication skills to provide a clear rationale for implementation concepts and how they align to project goal
- Have a passion for building beautiful interfaces and user experiences that spark joy
- Not just write JavaScript, but understand how a mobile app works
- Be able to communicate tiny pieces of code we can understand at a glance
- Know TypeScript and React Native
- Have some understanding or experience working on native iOS/Android projects or features
- Have an entrepreneurial spirit with a self starter attitude and ability to get your hands dirty
- Have the confidence to question and stress-test decisions made within the team

Salary Range
S$4,000 - S$5,000
