UX/UI Designer

Our Team

Mighty Jaxx is a unique future culture company that creates quality products across multiple categories such as art collectibles and lifestyle items, bridging the physical & digital world by powering it with technology. Since our inception in 2012, we have produced over 1,000 designs in collaboration with world-renowned artists and global entertainment brands like Hasbro, Sesame Workshop, Toei Animation and Warner Bros, delivering 5 million units of tech enabled collectibles to collectors in over 60 countries in 2020 alone.

We are proud to be an equal opportunity employer with a diverse, inclusive work environment and encourage our employees to bring their true fun-loving and high-energy selves to the workplace. With big, vibrant dreams and a culture of high performance in our workplace, you will always be engaged, empowered and feel positively challenged.

At Mighty Jaxx, we always extend our full support to the team to help them reach their full potential personally and professionally. If you love keeping up with the latest trends across different sub-cultures, love technology and are ready to embrace your creativity, we love to have you join us in creating the most unique experiences, products and content for our collectors!

The Job

As our UX/UI Designer, you will be gathering user requirements, designing graphic elements and building navigation components. You will have the opportunity to work across both online and offline products to create delightful and meaningful experiences for collectors around the world. You will help come up with the overall strategy for user understanding, operating several sprints ahead of the rest of the product and engineering teams to research and identify areas of improvement in the experience. Ultimately, your will create both functional and appealing features that address our clients' needs and help us grow our customer base.

Responsibilities

- Assist and produce digital product designs across multiple brands within the ecosystem
- Collaborate with product and engineering teams to bring projects and initiatives to fruition
- Ensure a high level of Design Excellence for all deliverables with attention to details
- Participate in user studies and product research to uncover customer insights
- Delivery of projects in accordance with timelines
- Conceptualise new digital experience that brings value to our customers

Requirements

- A Design-related Diploma or better.
- A portfolio showcasing expertise in the fields of Web and Mobile Design
- 1-2 years of experience in designing web and mobile applications
- Sound understanding of the Universal Principles of Design
- A solid grounding in Adobe XD, Illustrator and Photoshop
- Experience in Figma, Adobe Indesign, After Effects, or any related software is welcome
