

Software Engineer Intern

Our Team

Mighty Jaxx is the leading integrated future culture platform in Southeast Asia today. With a mission to supercharge future culture phygitally, Mighty Jaxx's integrated platform will empower future pop culture brands with an end-to-end supply chain of digital and phygital collectibles, including artist development and incubation, proprietary IP operation and providing global consumers access to new D2C experiences.

Mighty Jaxx partners with the greatest creative talents in the world, as well as top global brands such as Netflix, Formula 1, Hasbro, Toei Animation, Cartoon Network, Nickelodeon, Warner Brothers, Adidas and many more to ship millions of phygital collectibles to over 90 countries worldwide.

We are proud to be an equal opportunity employer with a diverse, inclusive work environment and encourage our employees to bring their authentic, fun-loving, and high-energy selves to the workplace.

Your Role

Mighty Jaxx is looking for a Software Engineer Intern to join the Engineering team in an exciting website revamp project.

We are looking for a full-time intern, who is able to join us from May 2024 onwards, ideally for a period of minimum of 3 months.

Responsibilities

- Collaborate with product managers, tech leads, and individual contributors to support application engineering teams
- Take ownership of assigned tasks and features
- Contribute to technical discussions
- Participate in the development of development tasks under the guidance of senior developers
- Learn from and be mentored by senior engineers, and actively seek guidance to progress in your career goals
- Contribute to the tracking of key metrics for quality and team performance, and help drive continuous improvement
- Communicate project status, challenges, and opportunities to the team lead

Requirements

- Currently pursuing Computer Science, Software Engineering, or a related field of study
- Strong understanding of full-stack development concepts and experience in developing web applications
- Solid foundation in software development with at least one programming language (e.g., JS, TS, React and or NextJS)
- Familiarity with backend development using Node.js
- Knowledge of software engineering principles and the ability to apply them in practical scenarios
- Good problem-solving skills and the ability to articulate technical concepts clearly
- Experience building REST APIs
- Understanding of test-driven development principles and experience with unit testing frameworks is advantageous

To apply, please send an updated copy of your resume to people@mightyjaxx.com

While we value all submissions, we regret that only shortlisted candidates will be contacted by our People team.
