

## **Web Full Stack Developer Job Description**

We are looking for a strong C# developer with experience in Javascript to join our team! As a full stack developer, you will have a strong understanding of the C# programming languages and experience working with client-server web applications. In addition, you will also be responsible for the analysis, design, development, testing and implementation of company's platform technology.

## **Web Full Stack Developer Duties and Responsibilities**

- Design, development and testing of new features in the applications
- Responsible for regular communication with others involved in the development process
- Implement, test, and bug-fix functionality
- Responsibility for design and implementation of software projects using C# and Javascript
- Participate as a team member in fully agile Scrum deliveries
- Provide support to end users
- Design, build, and maintain efficient and reliable C# and Javascript code
- Designing and developing APIs.

## **Web Full Stack Developer Requirements**

- 3+ years of software development experience
- Proficient in C#
- Experienced in C#, HTML, CSS, JavaScript and web development frameworks (ASP.Net, jQuery)
- Proven experience with software design and OOD methodologies
- Familiarity with Relational Databases and SQL
- Experience with ORM frameworks
- Experience with Web services development (REST)
- Strong in Object Oriented Programming, MVC, Design patterns and SOLID principles
- Experience setting up and maintaining AWS infrastructure

## **Nice-to-haves:**

- Knowledge of mobile development and GraphQL
- Experience with Nethereum framework and Infura API for developing smart contracts
- Knowledge of continuous integration and continuous delivery frameworks like GitLab or Travis CI
- Experience with Python and Tensorflow, knowledge of machine learning fundamentals
