OUR TREE OF LIFE

Adam and Eve were expelled from the Garden of Eden before they could eat from The Tree of Life. We suspect this legendary tree lives in the Arabian desert under the alias "Peregrina Tree" - thriving at 120°F heat, without water for up to 3 years. These environmental stressors stimulate adaptive responses that enhance longevity. Clinical trials reveal that Peregrina Extract supports skin DNA telomere repair. Nurturing long, healthy telomeres reduces the visible signs of aging. So let's partake in this Tree of Life, Shall we?
