HURMAR · BRAND SPIRIT

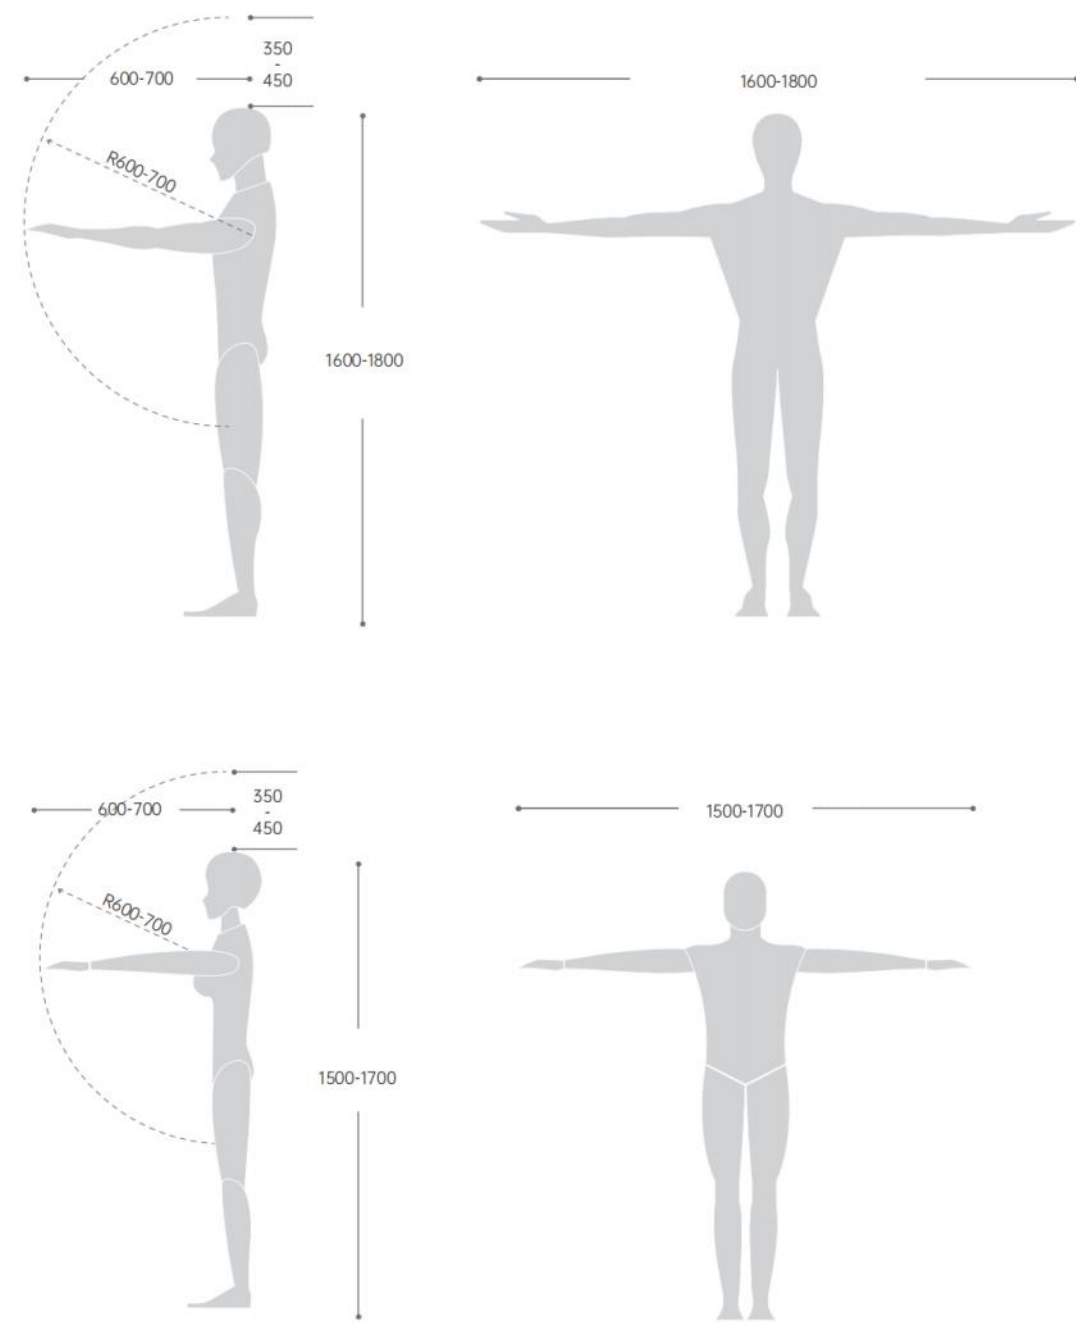

Fluid and restrained ideals shape a brand defined by precision and quiet strength, balancing emotional depth with the discipline of craftsmanship. Born from an independent and focused philosophy, HURMAR grows from the courage to advance against the tide and the pursuit of detail that honors material truth and long-term value.

The brand's aesthetic direction seeks harmony between form and function, allowing each creation to embody refinement without excess. Every process — from material selection to structural logic — reflects the belief that true quality emerges from patience, consistency, and the artisan's dialogue with texture and proportion. In this continuous evolution, HURMAR translates quiet persistence into lasting resonance, letting pure ideals shape remarkable spaces. Guided by clarity and intention, the brand refines its language with each iteration, allowing evolution without abandoning its roots. The pursuit of excellence becomes a continuous journey, where innovation aligns with restraint to form a distinct identity. Through this enduring commitment, HURMAR reveals a vision shaped not by noise, but by the silent power of craft.

STATIC HUMAN DIMENSIONS

Units of Measurement: mm

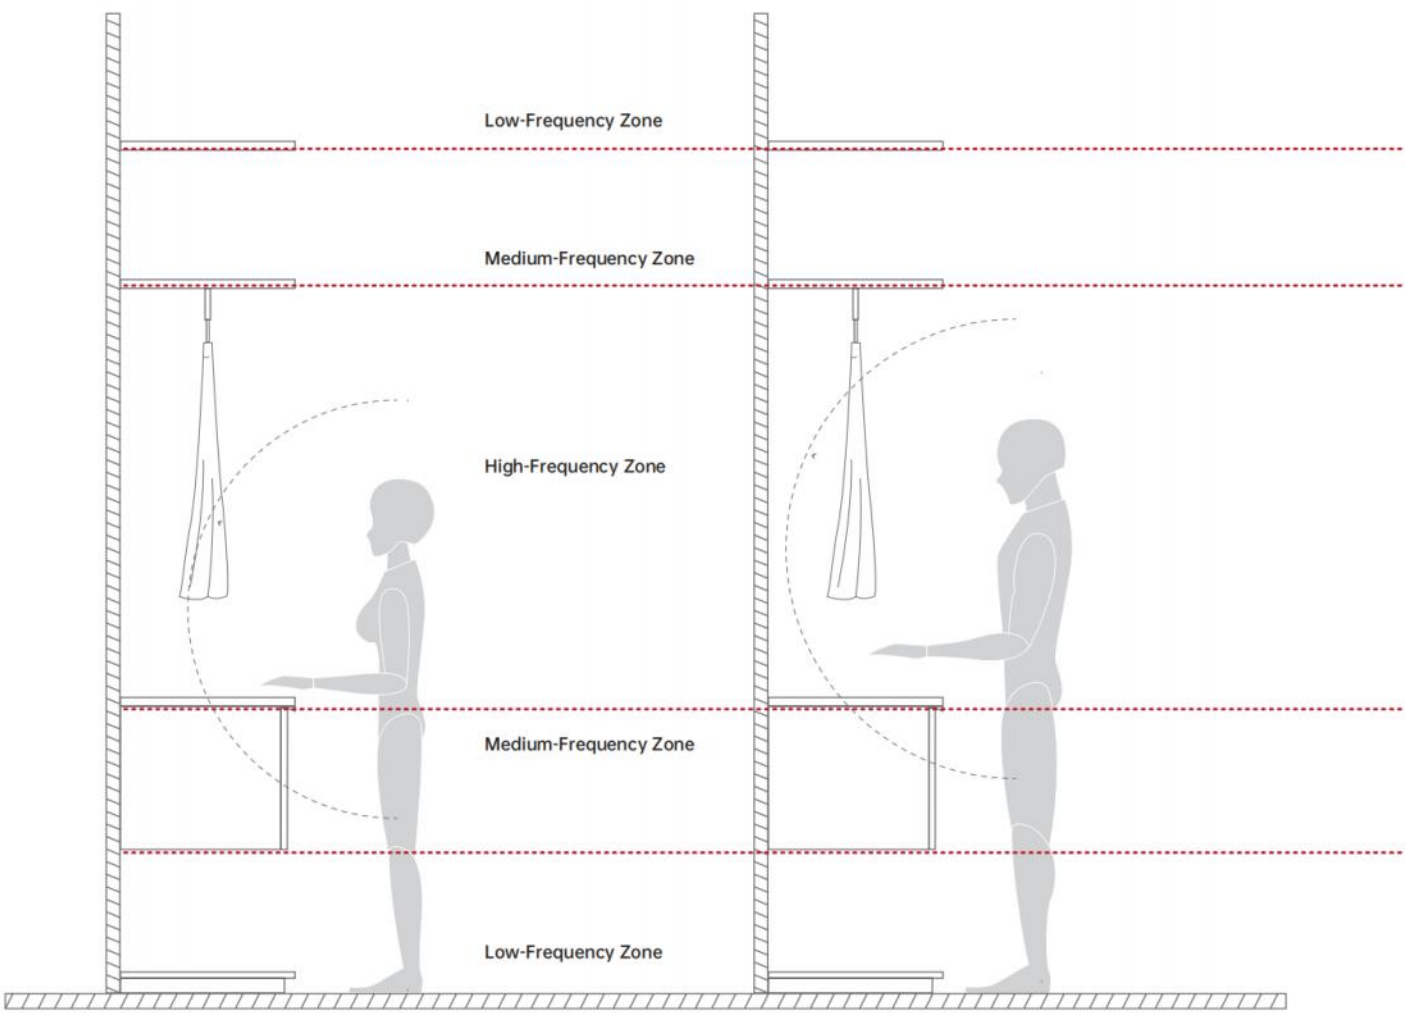

WARDROBE USE FREQUENCY ZONING

Wardrobe – Usage Frequency Zoning

High-Frequency Zone:
Accessible without excessive reaching, bending, or squatting; designated for the most frequently used clothing.

Medium-Frequency Zone:
Requires slight stretching or movement to reach; suitable for regularly used but not daily items.

Low-Frequency Zone:
Requires assistance, bending, or squatting to access; used for seasonal items, bedding, or infrequently needed belongings.

WARDROBE COMFORT ZONE

Comfortable Reach:

The area from 400 mm above the user's height down to the range of the naturally hanging arm.

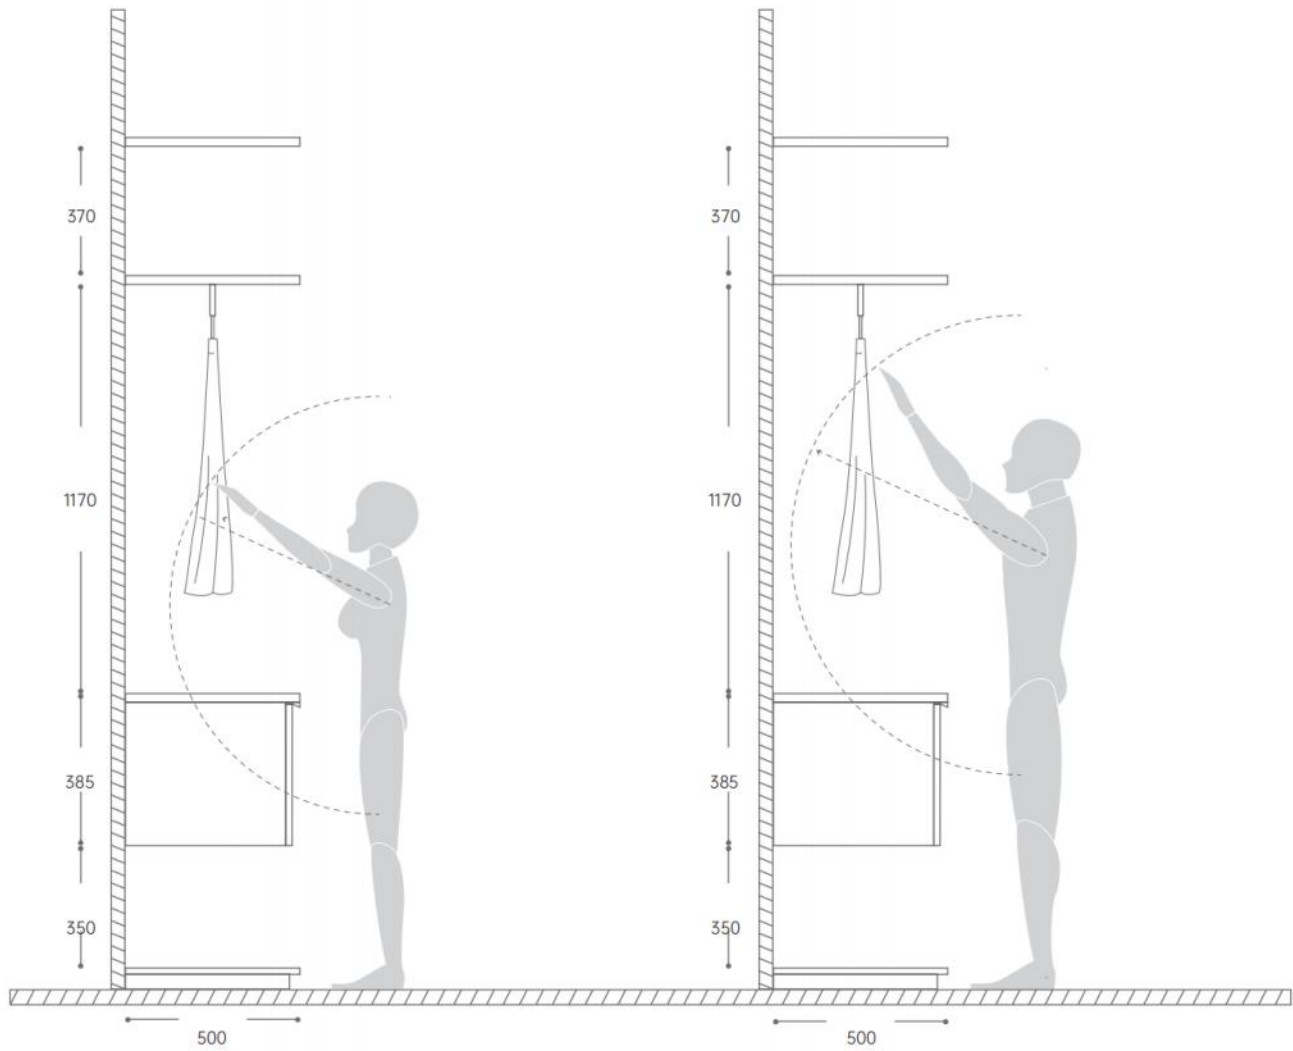

Wardrobe Depth:

Calculated based on male shoulder width plus adequate clearance; the depth should not exceed the length of the upper arm.

Hanging Rod Height:

Recommended to be 200–300 mm above the user's height to reduce shoulder strain when reaching for clothing.

Units of Measurement: mm

Frame-wood Closet

PREMIUM ALUMINUM - WOOD CLOSET SYSTEMS

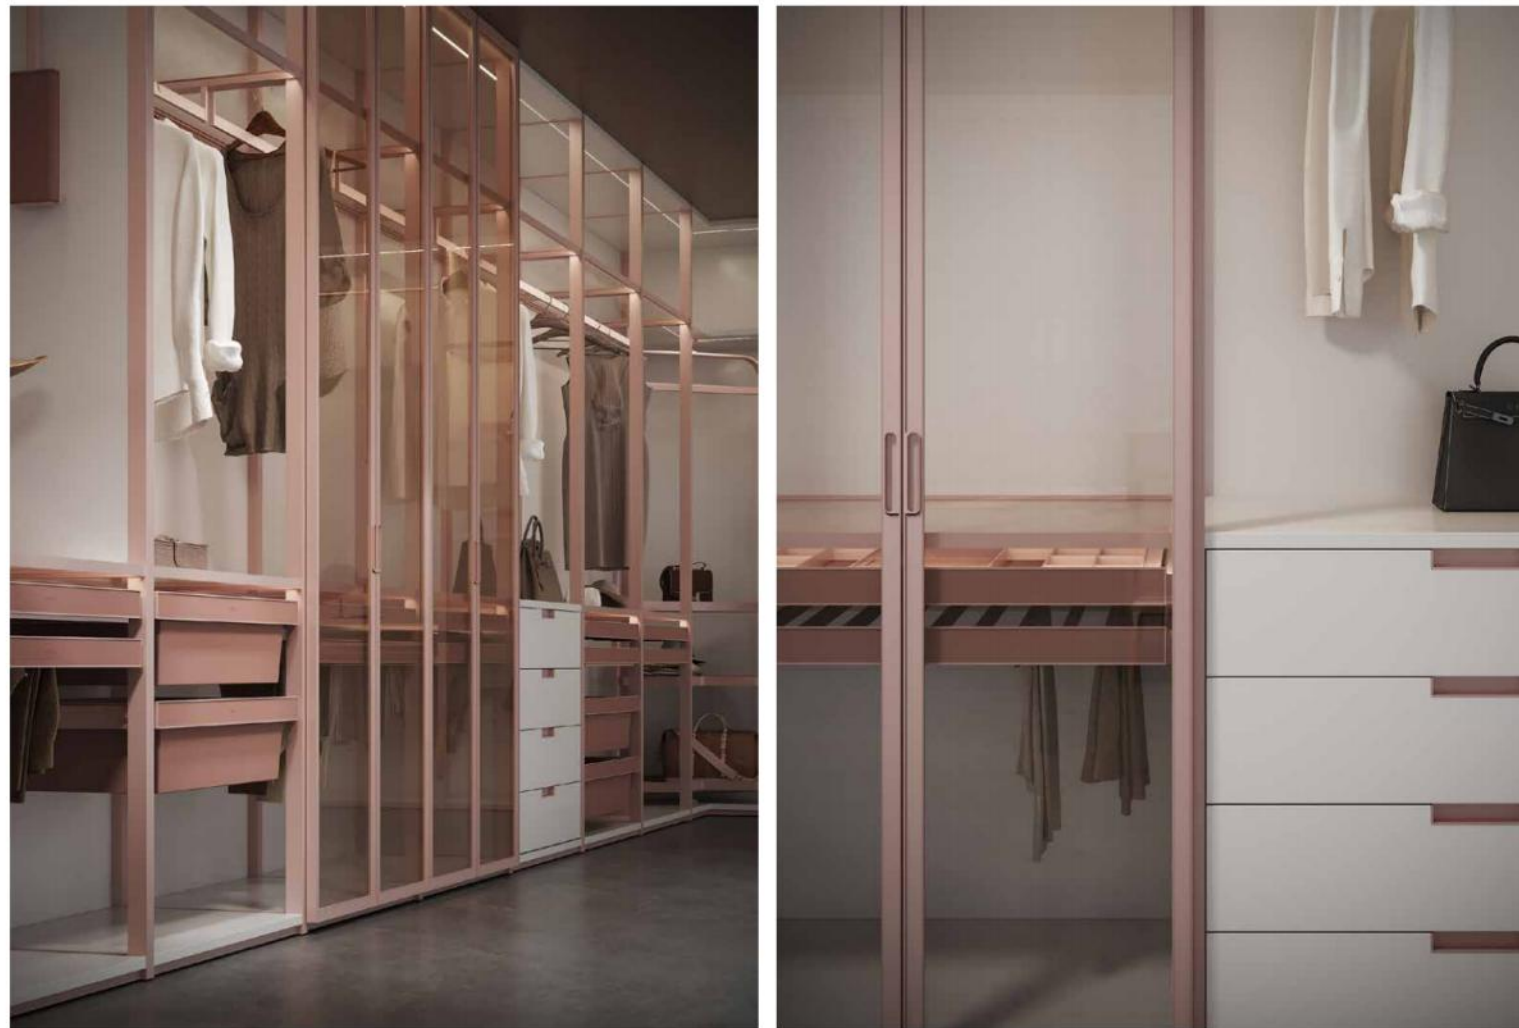

FRAME-WOOD CLOSET

The Frame-wood Closet combines an aluminum frame with wooden panels to create a lightweight yet stable storage system. An open layout enhanced by glass shelves and integrated lighting brings clarity and balance to the space. Soft-close drawers, shelves, and accessory modules can be freely configured to support clothing and accessory storage, improving organization and overall daily usability.

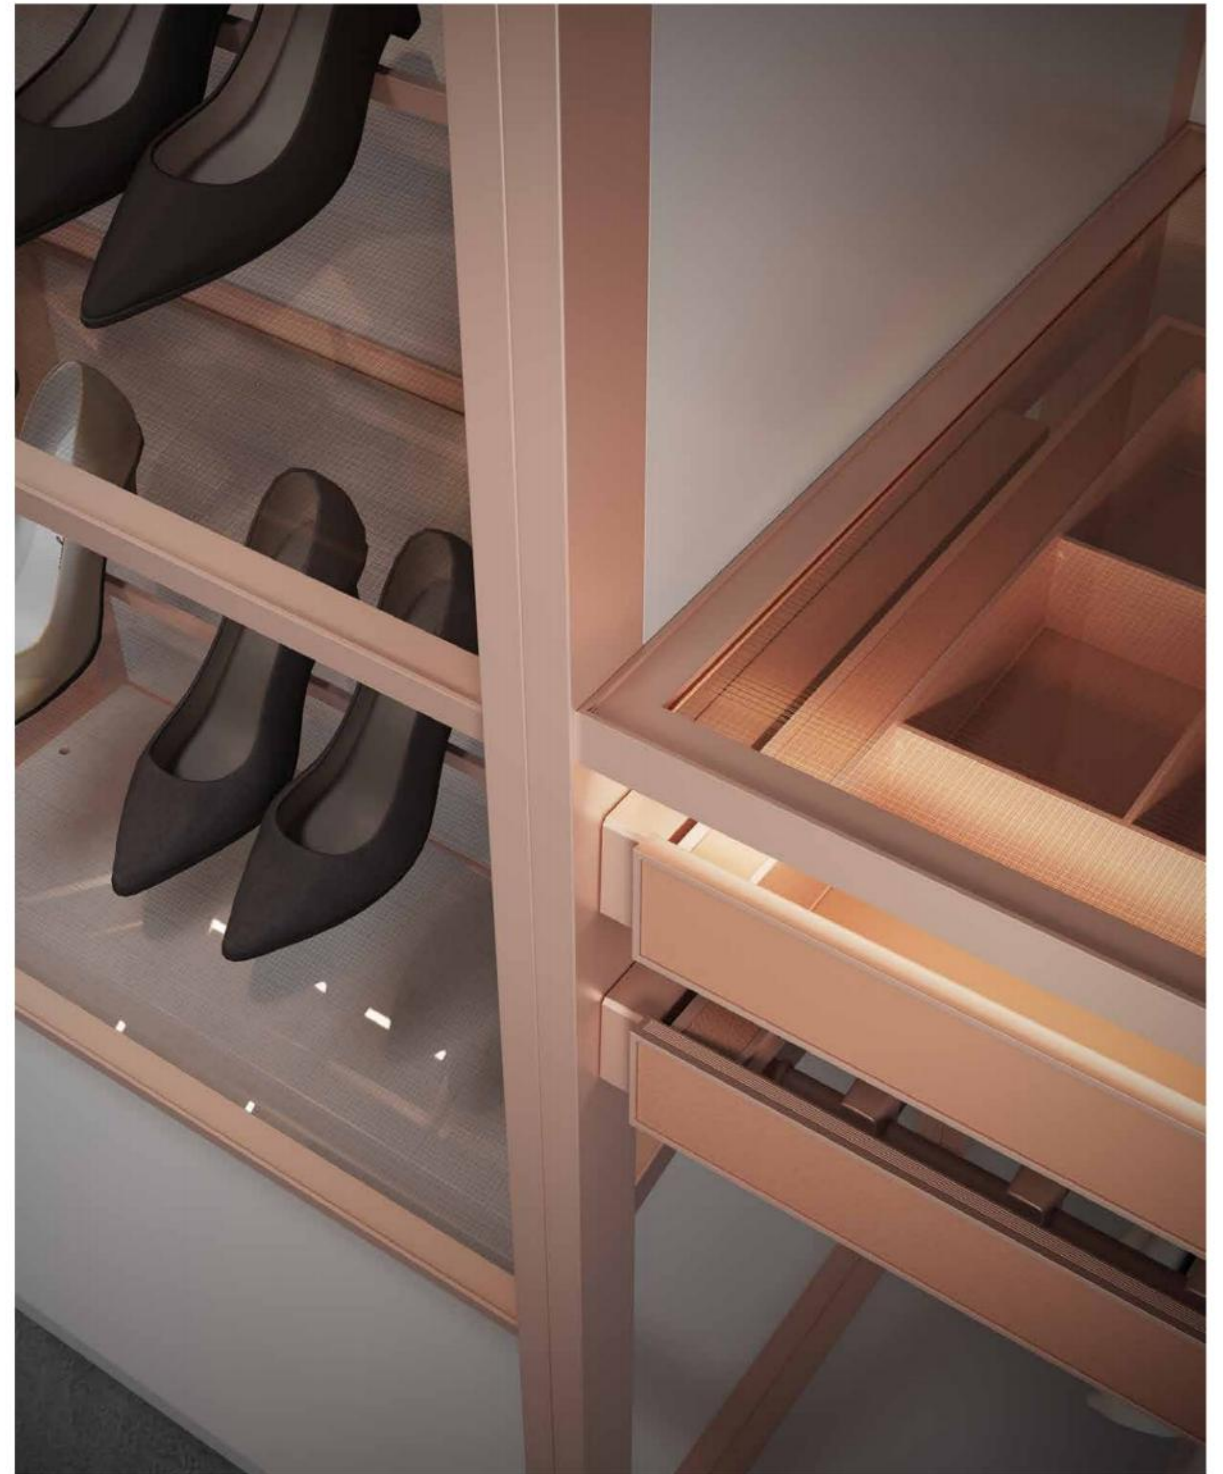

The aluminum frame ensures structural stability and a refined profile, precisely supporting glass panels and integrated lighting with lasting durability.

实拍夹丝玻璃创意特写

Soft metallic lines and translucent surfaces overlap to create a light, restrained spatial rhythm, expressing a calm and elegant atmosphere for refined wardrobe presentation.

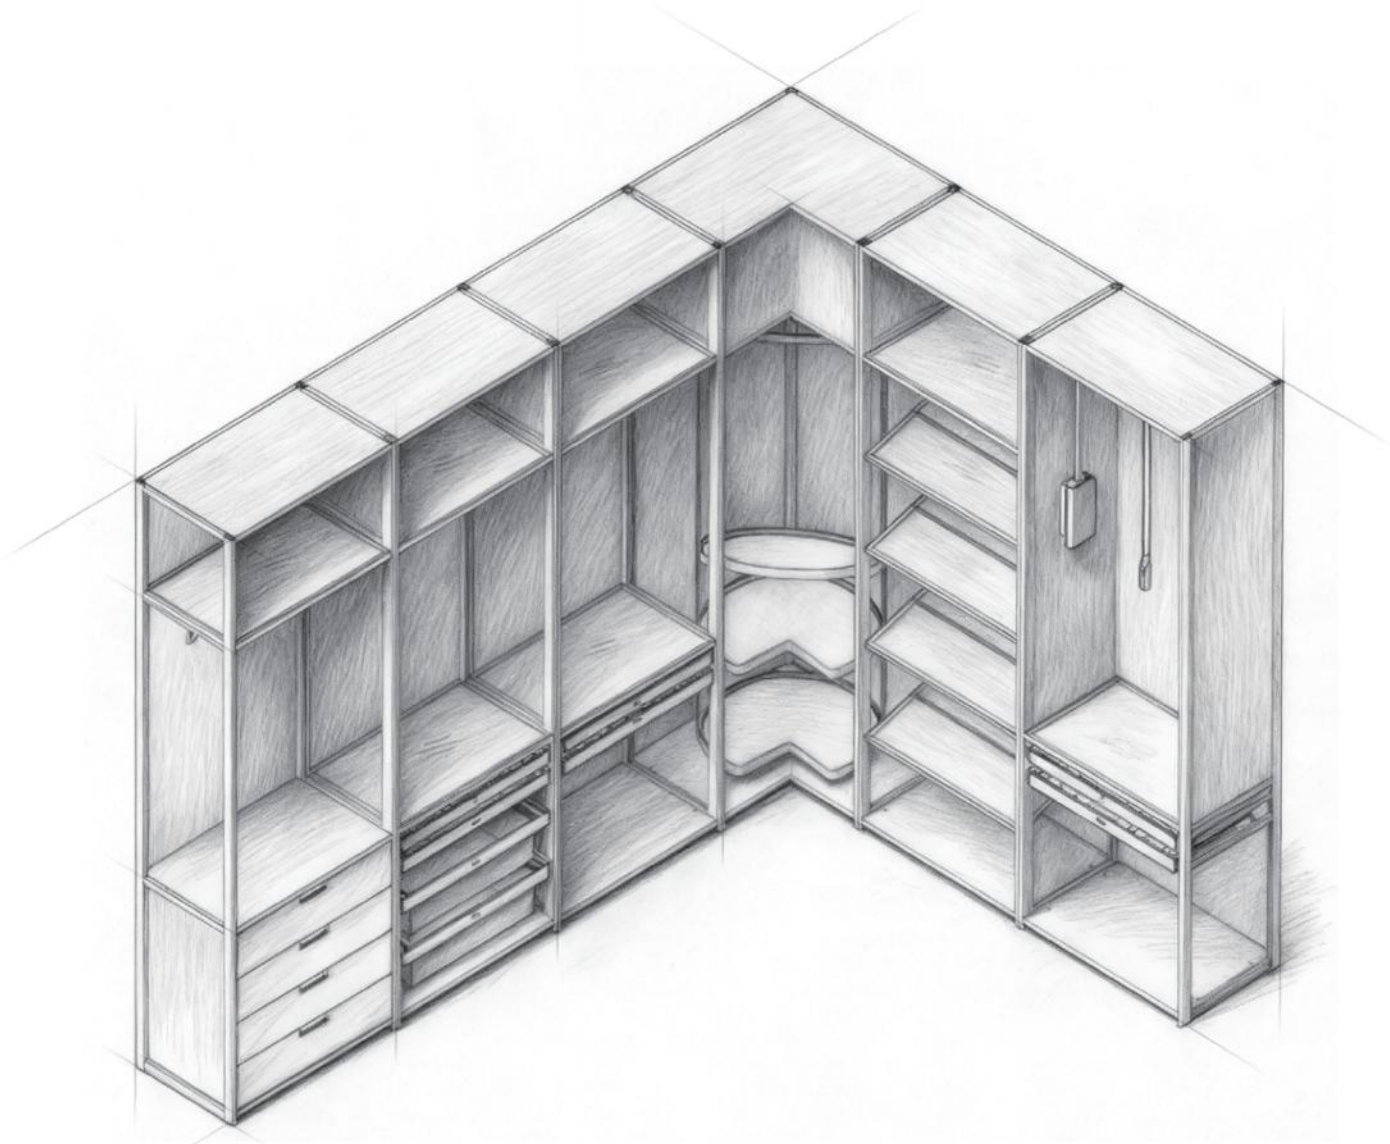

Transparent structures and refined proportions interact gracefully, shaping a tranquil dressing atmosphere defined by balance, clarity, and understated spatial elegance.

WALL HANGING WARDROBES

The wall-mounted closet combines wall panels and racks to offer flexible, customized storage solutions. Its innovative and lightweight design features various finishing materials such as wood and glass. Customized drawers, shoe racks, trouser racks, and storage baskets can be optimally arranged to suit individual needs and spaces. It enhances home comfort and efficiency, making lifestyle organization effortless.

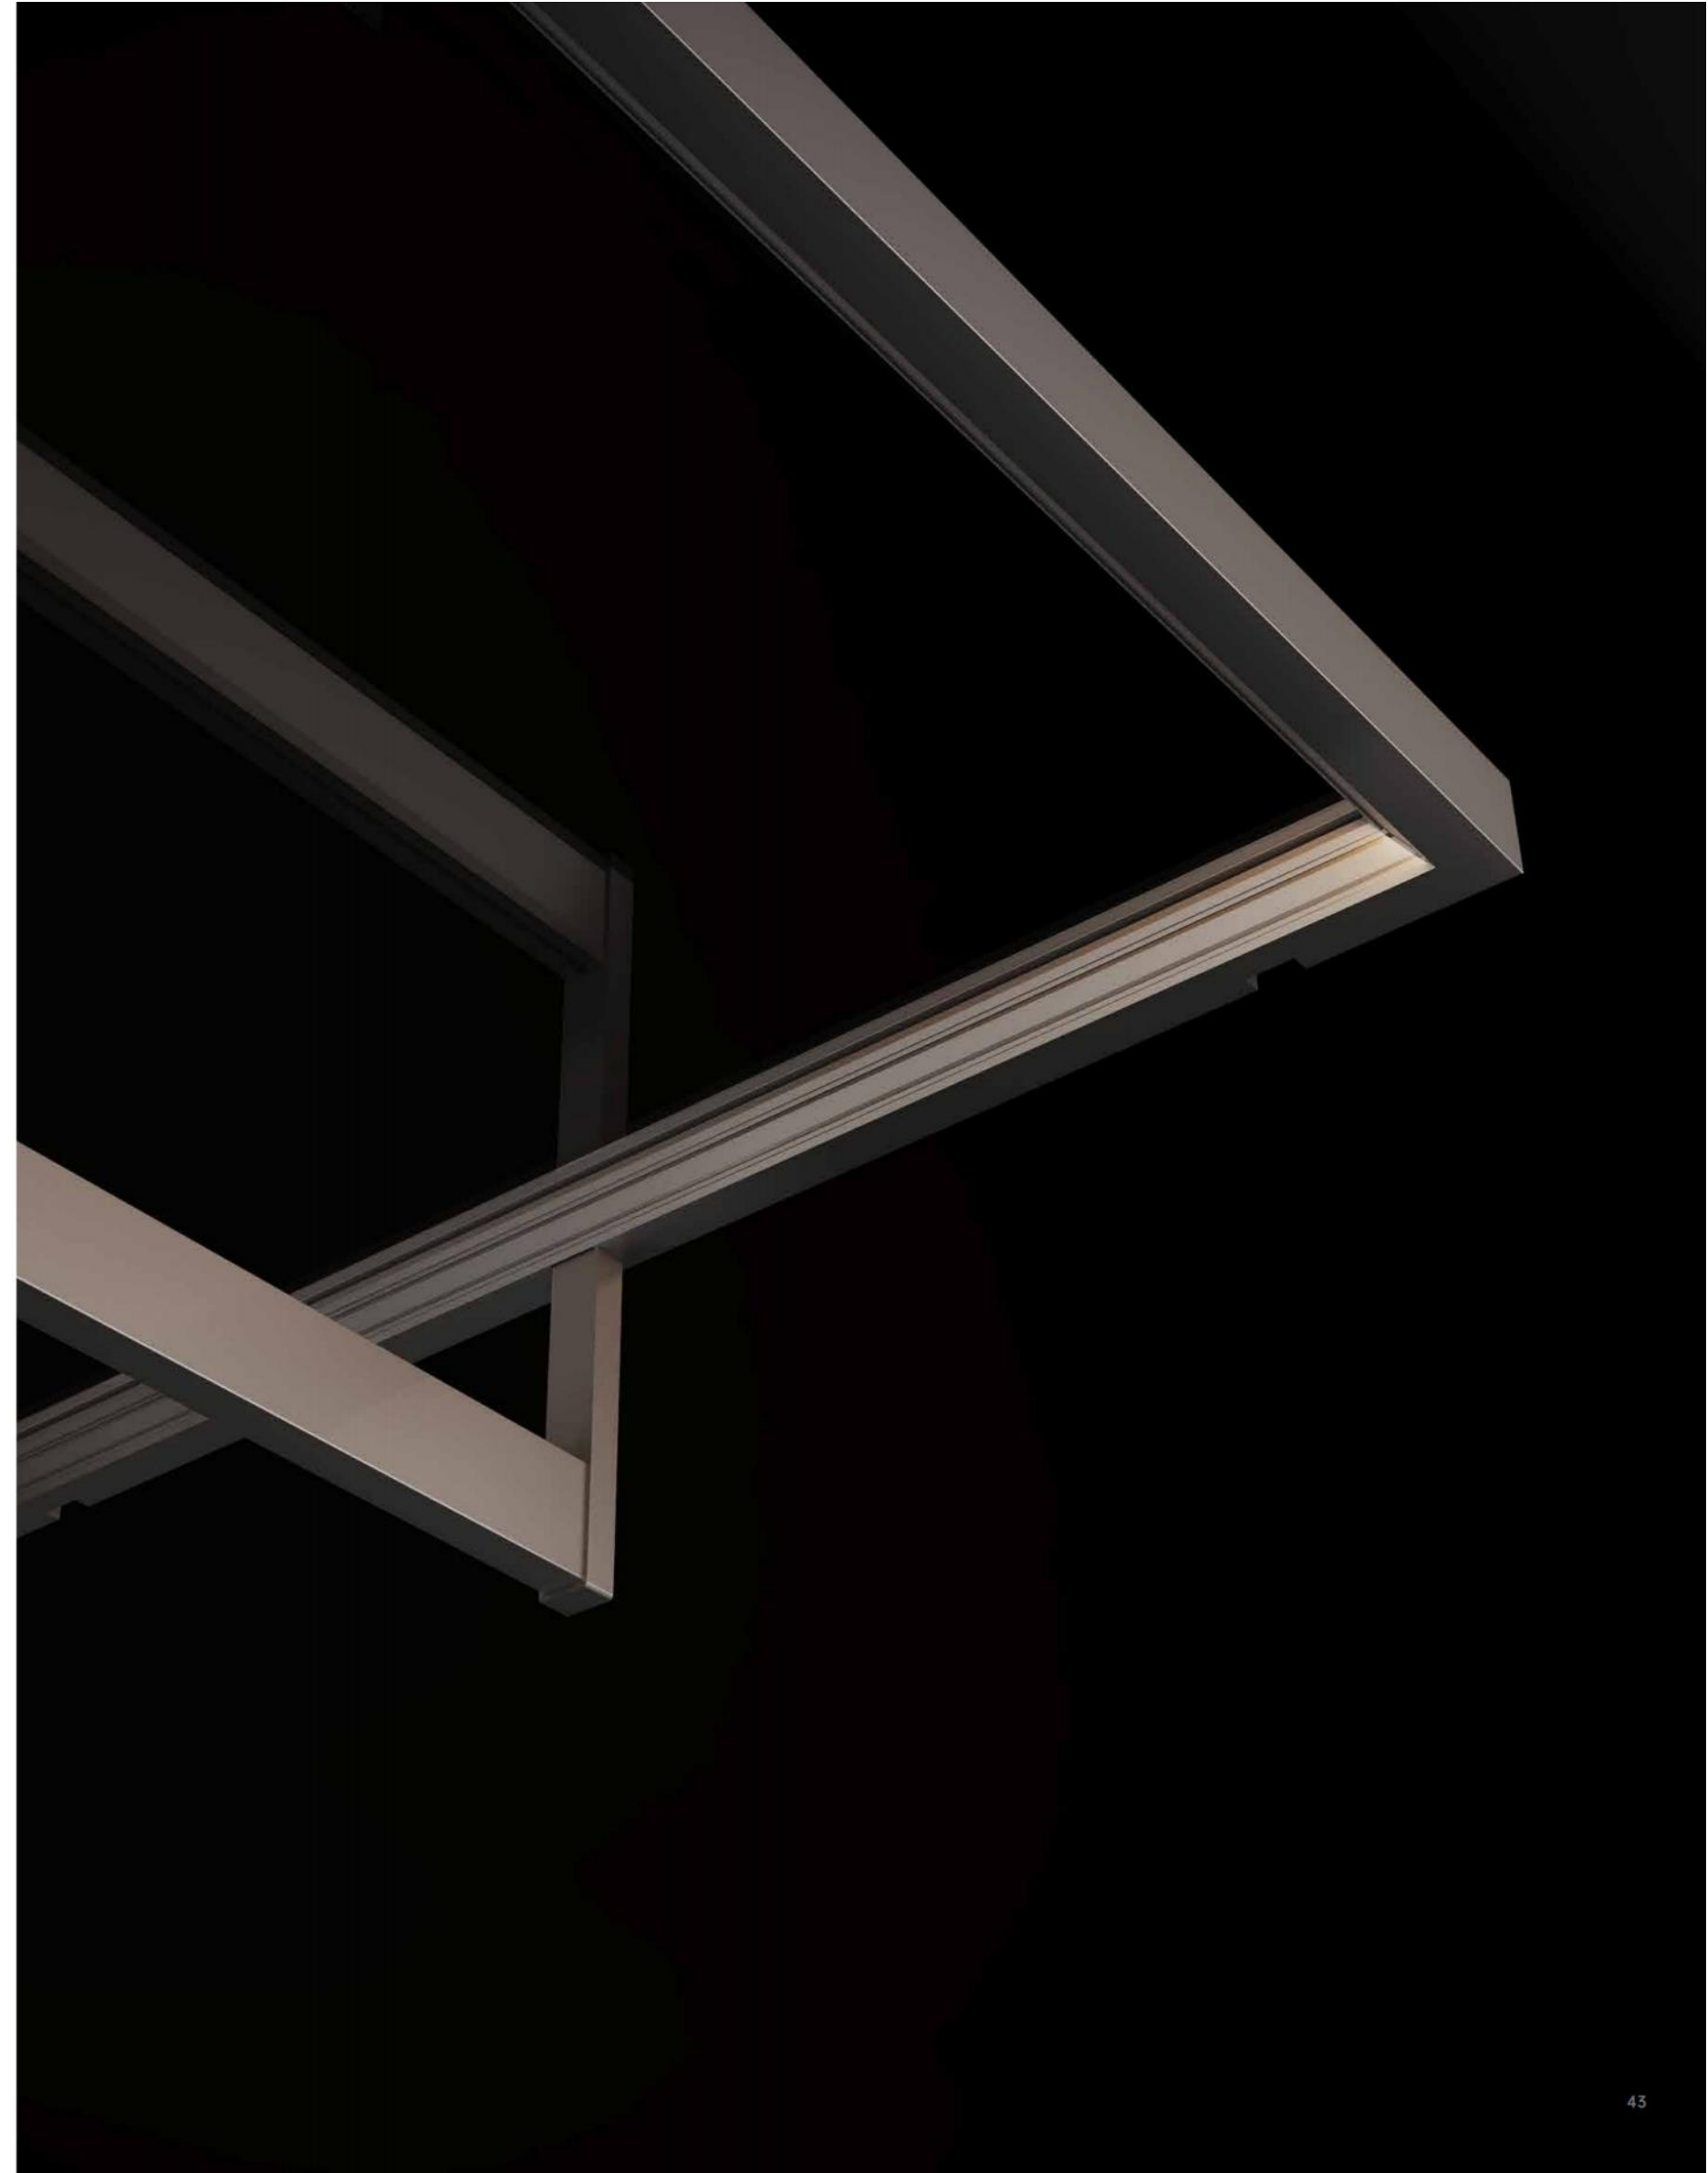

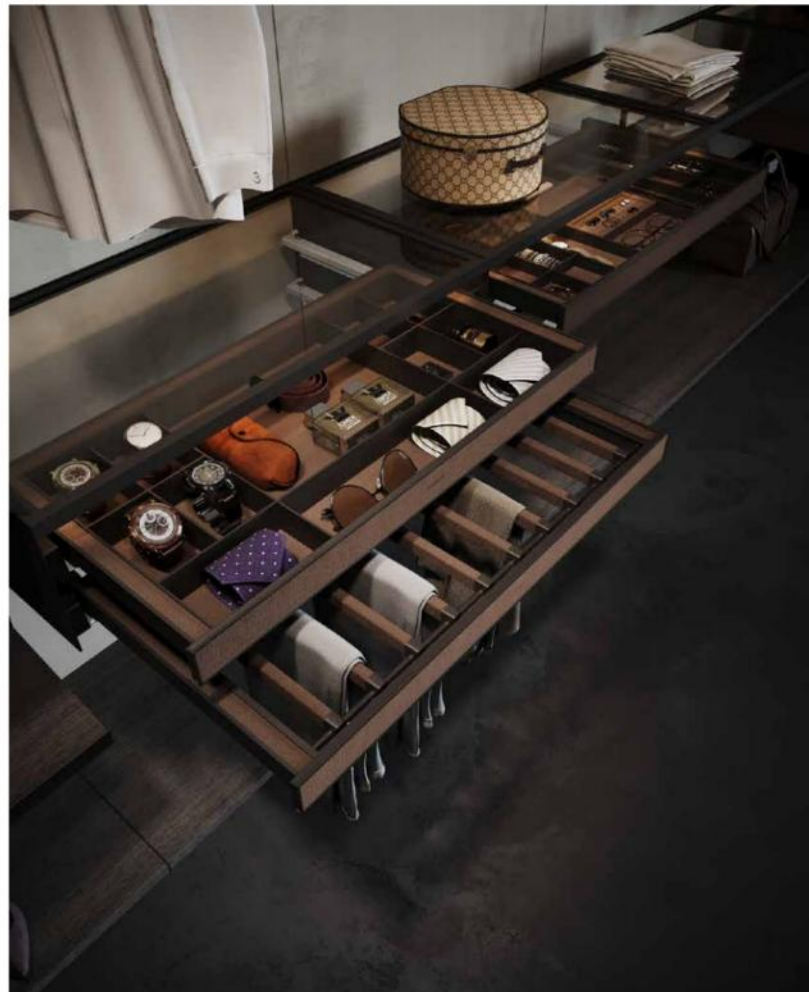

The wall-mounted system and drawer modules define a structured layout, organizing garments through balanced vertical and horizontal wall-based storage layers.

Clean lines and open frames create a calm, balanced spatial atmosphere.

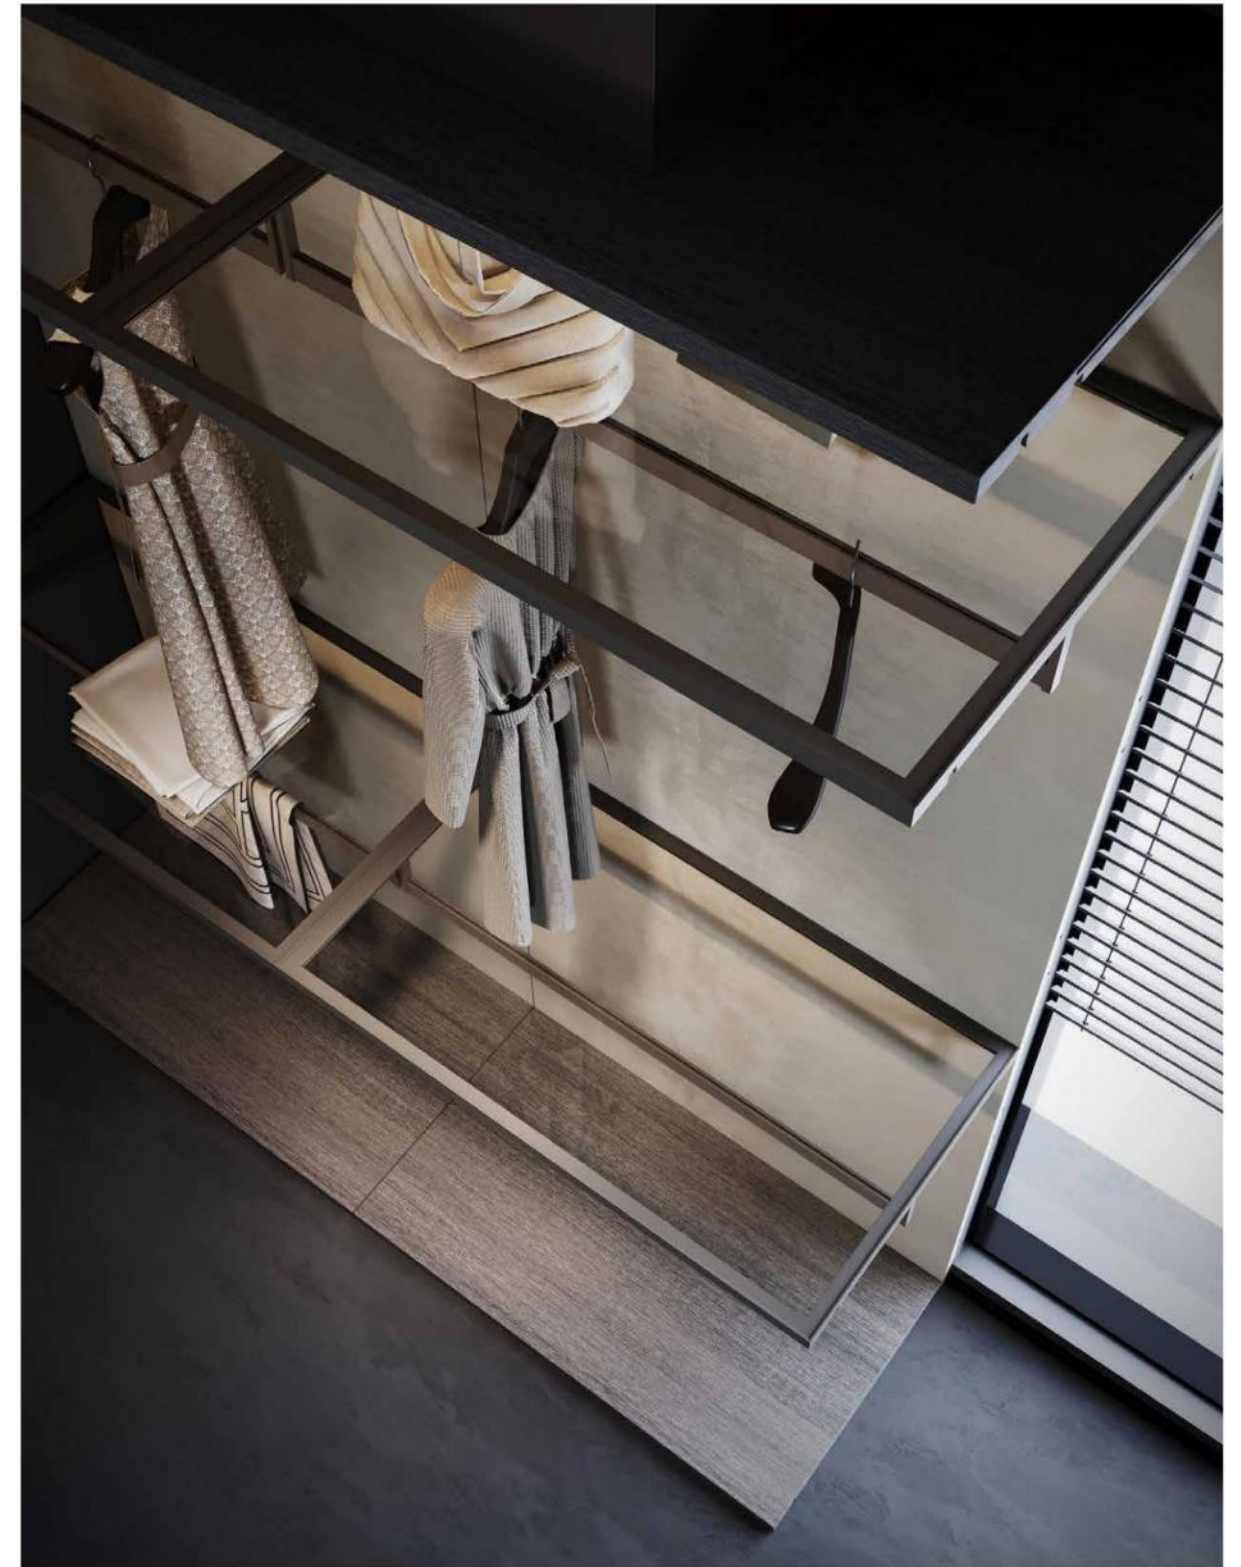

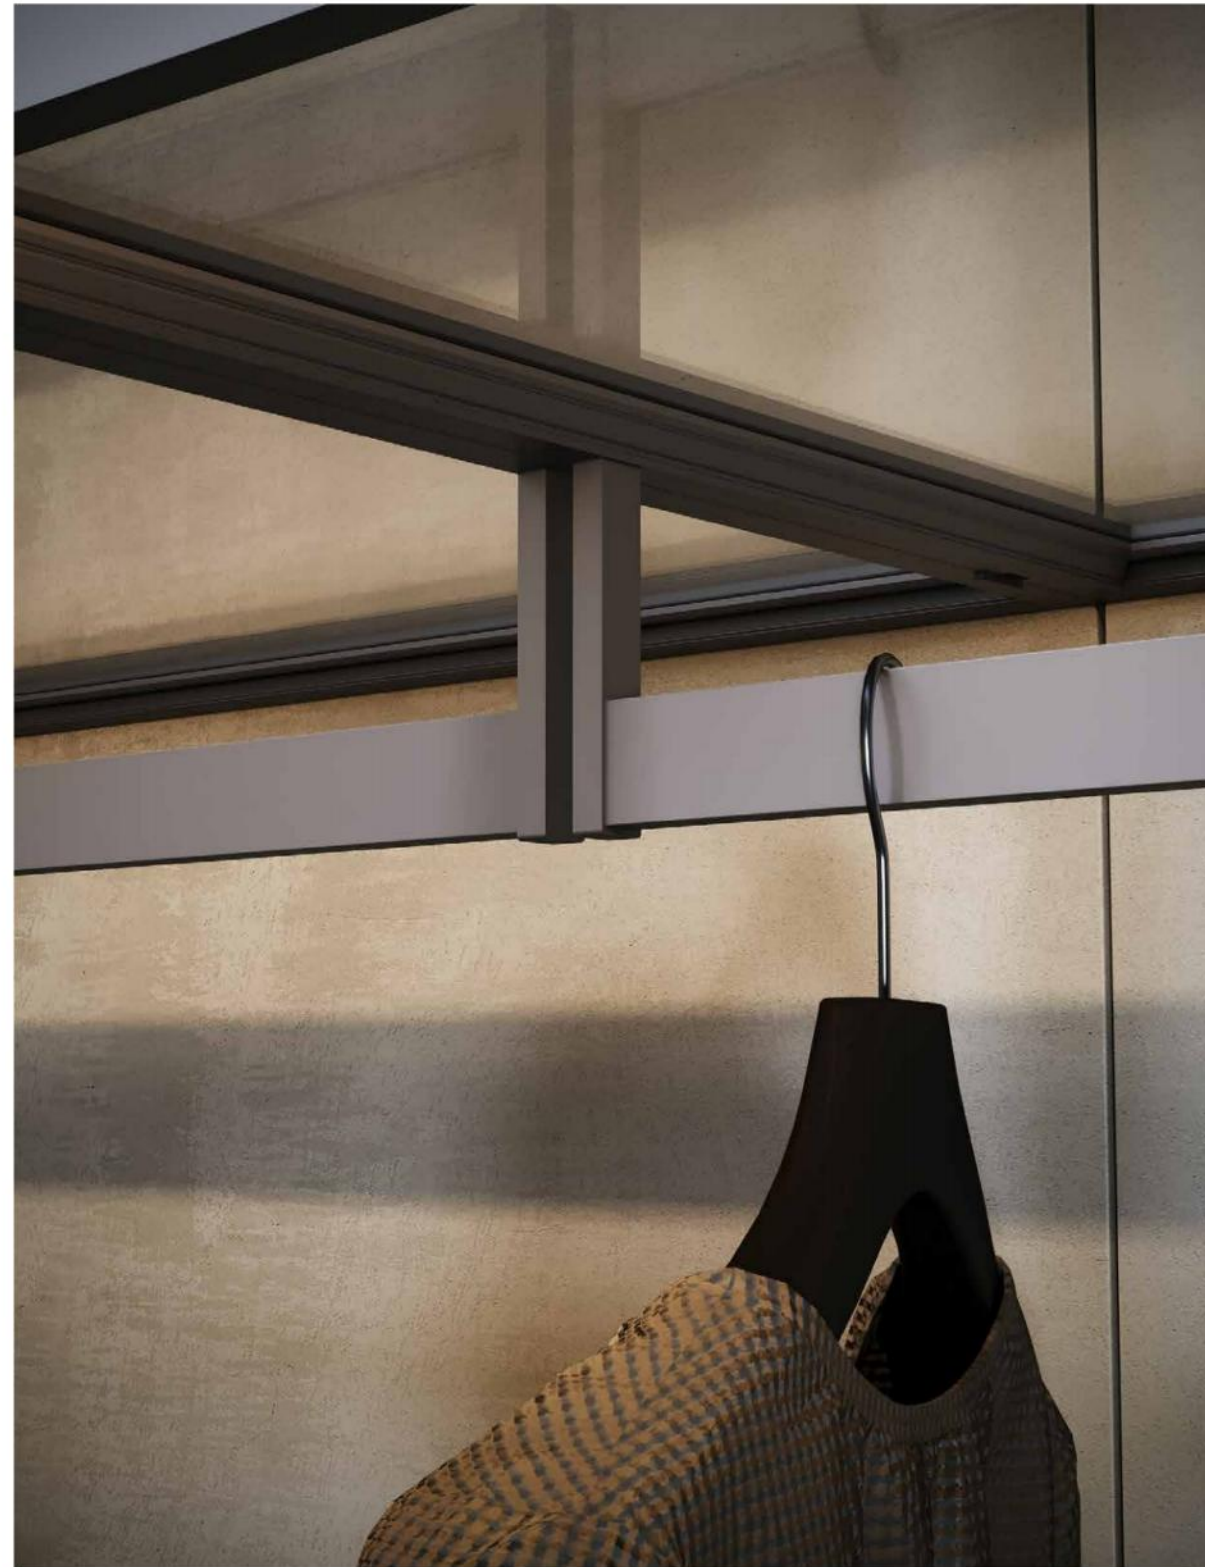

Soft lighting and transparent layers frame garments gracefully, creating a composed dressing scene where materials, light, and shadow establish refined visual depth.

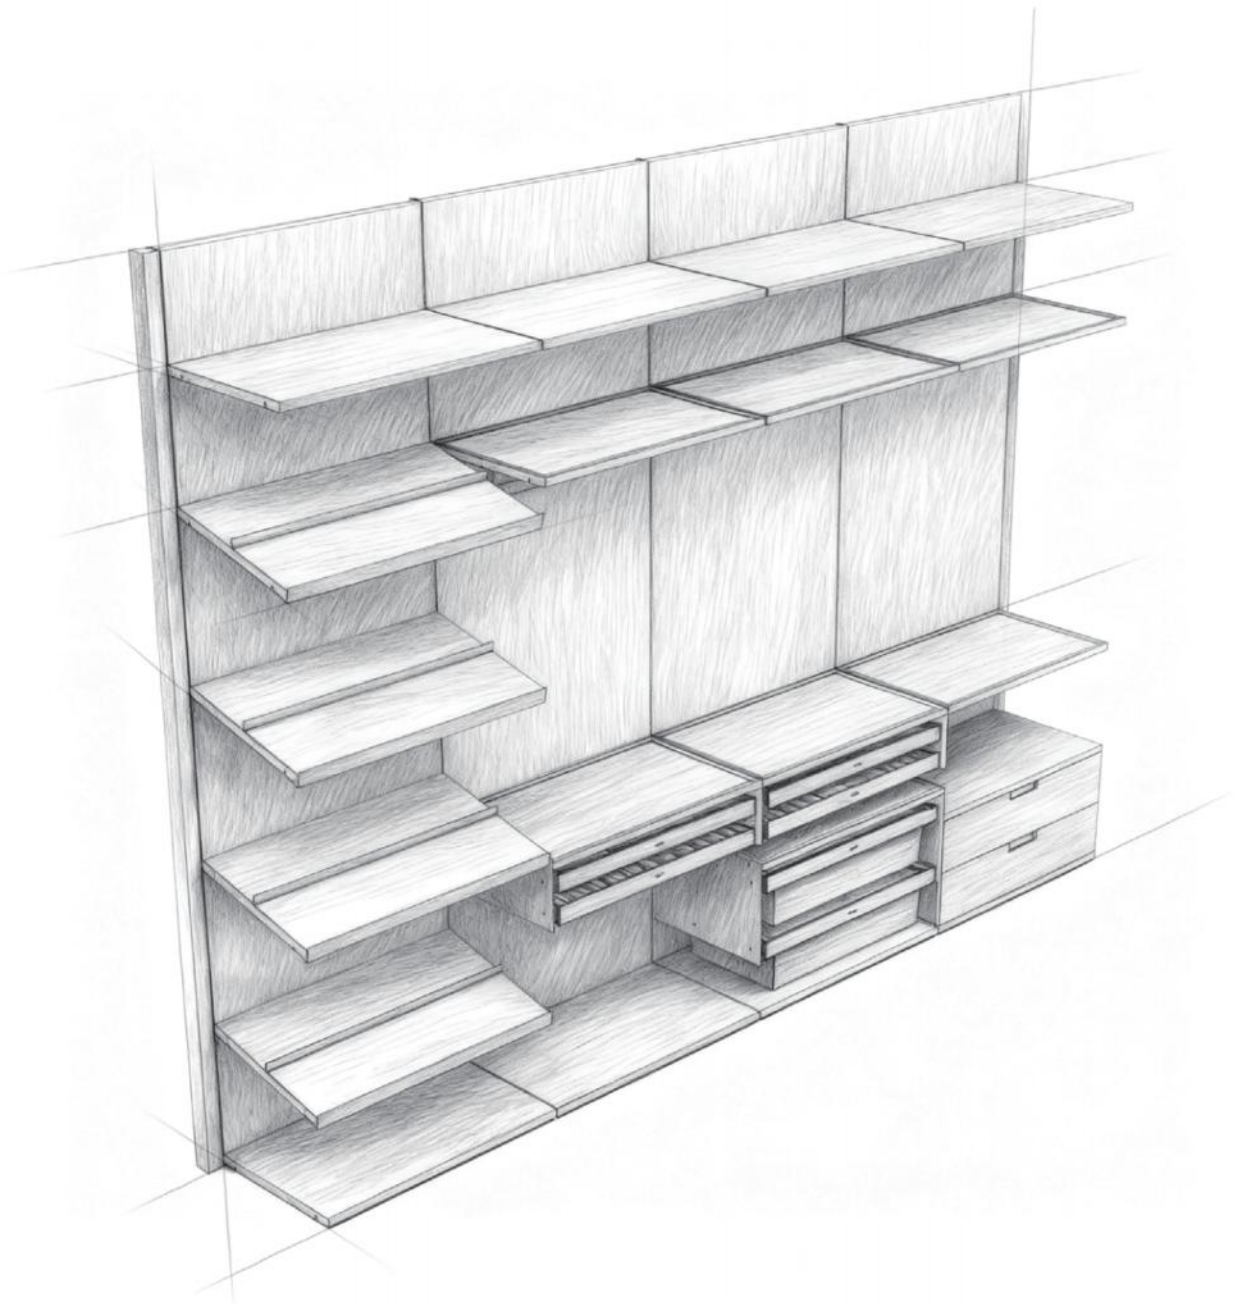

Wall-mounted compositions unfold through clear layers and proportions, allowing garments and accessories to integrate naturally into the space, creating a calm, composed dressing environment defined by order, balance, and understated

Pillar-type Closet

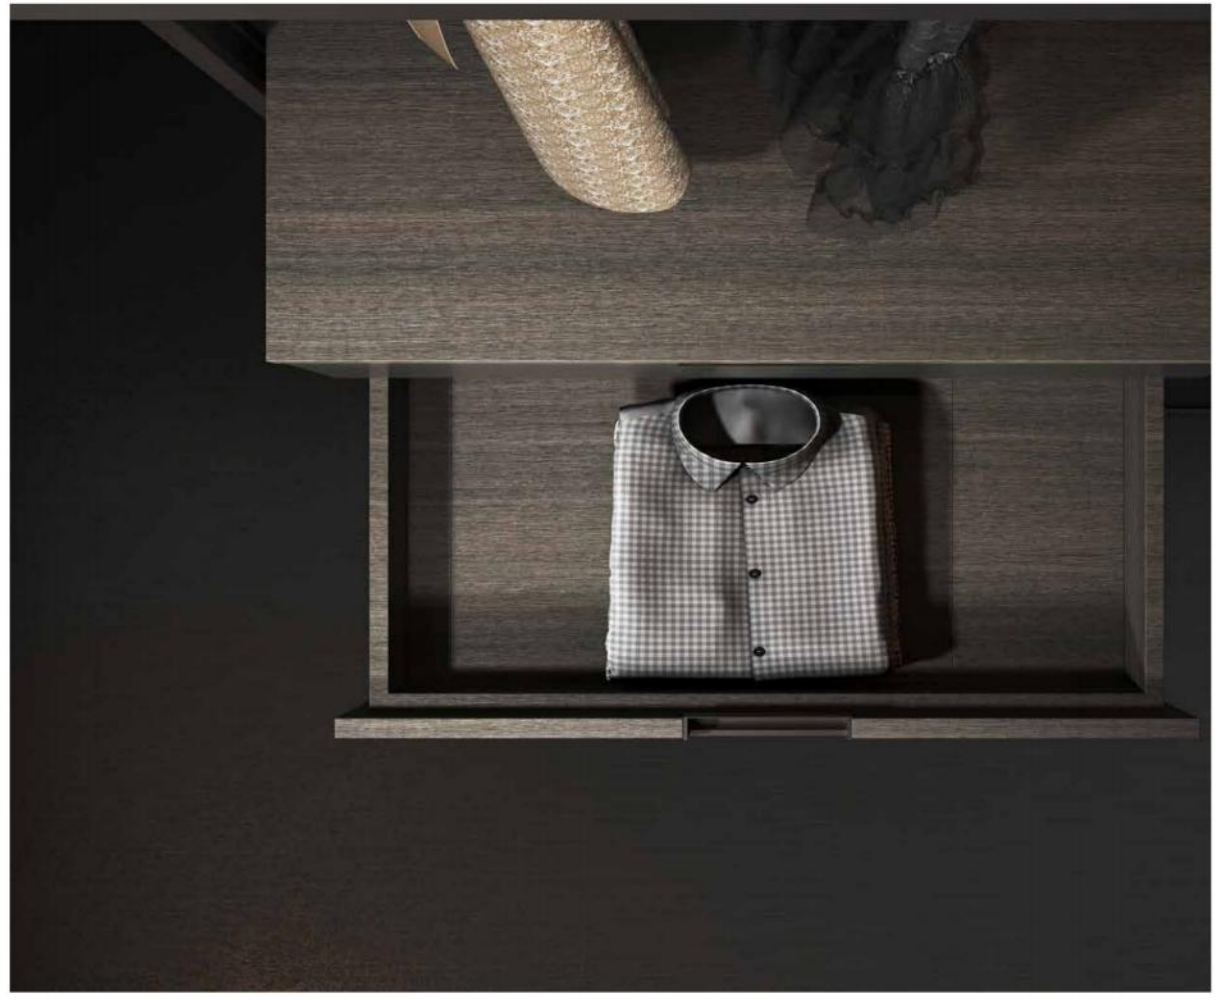

Exclusive Aluminium Application

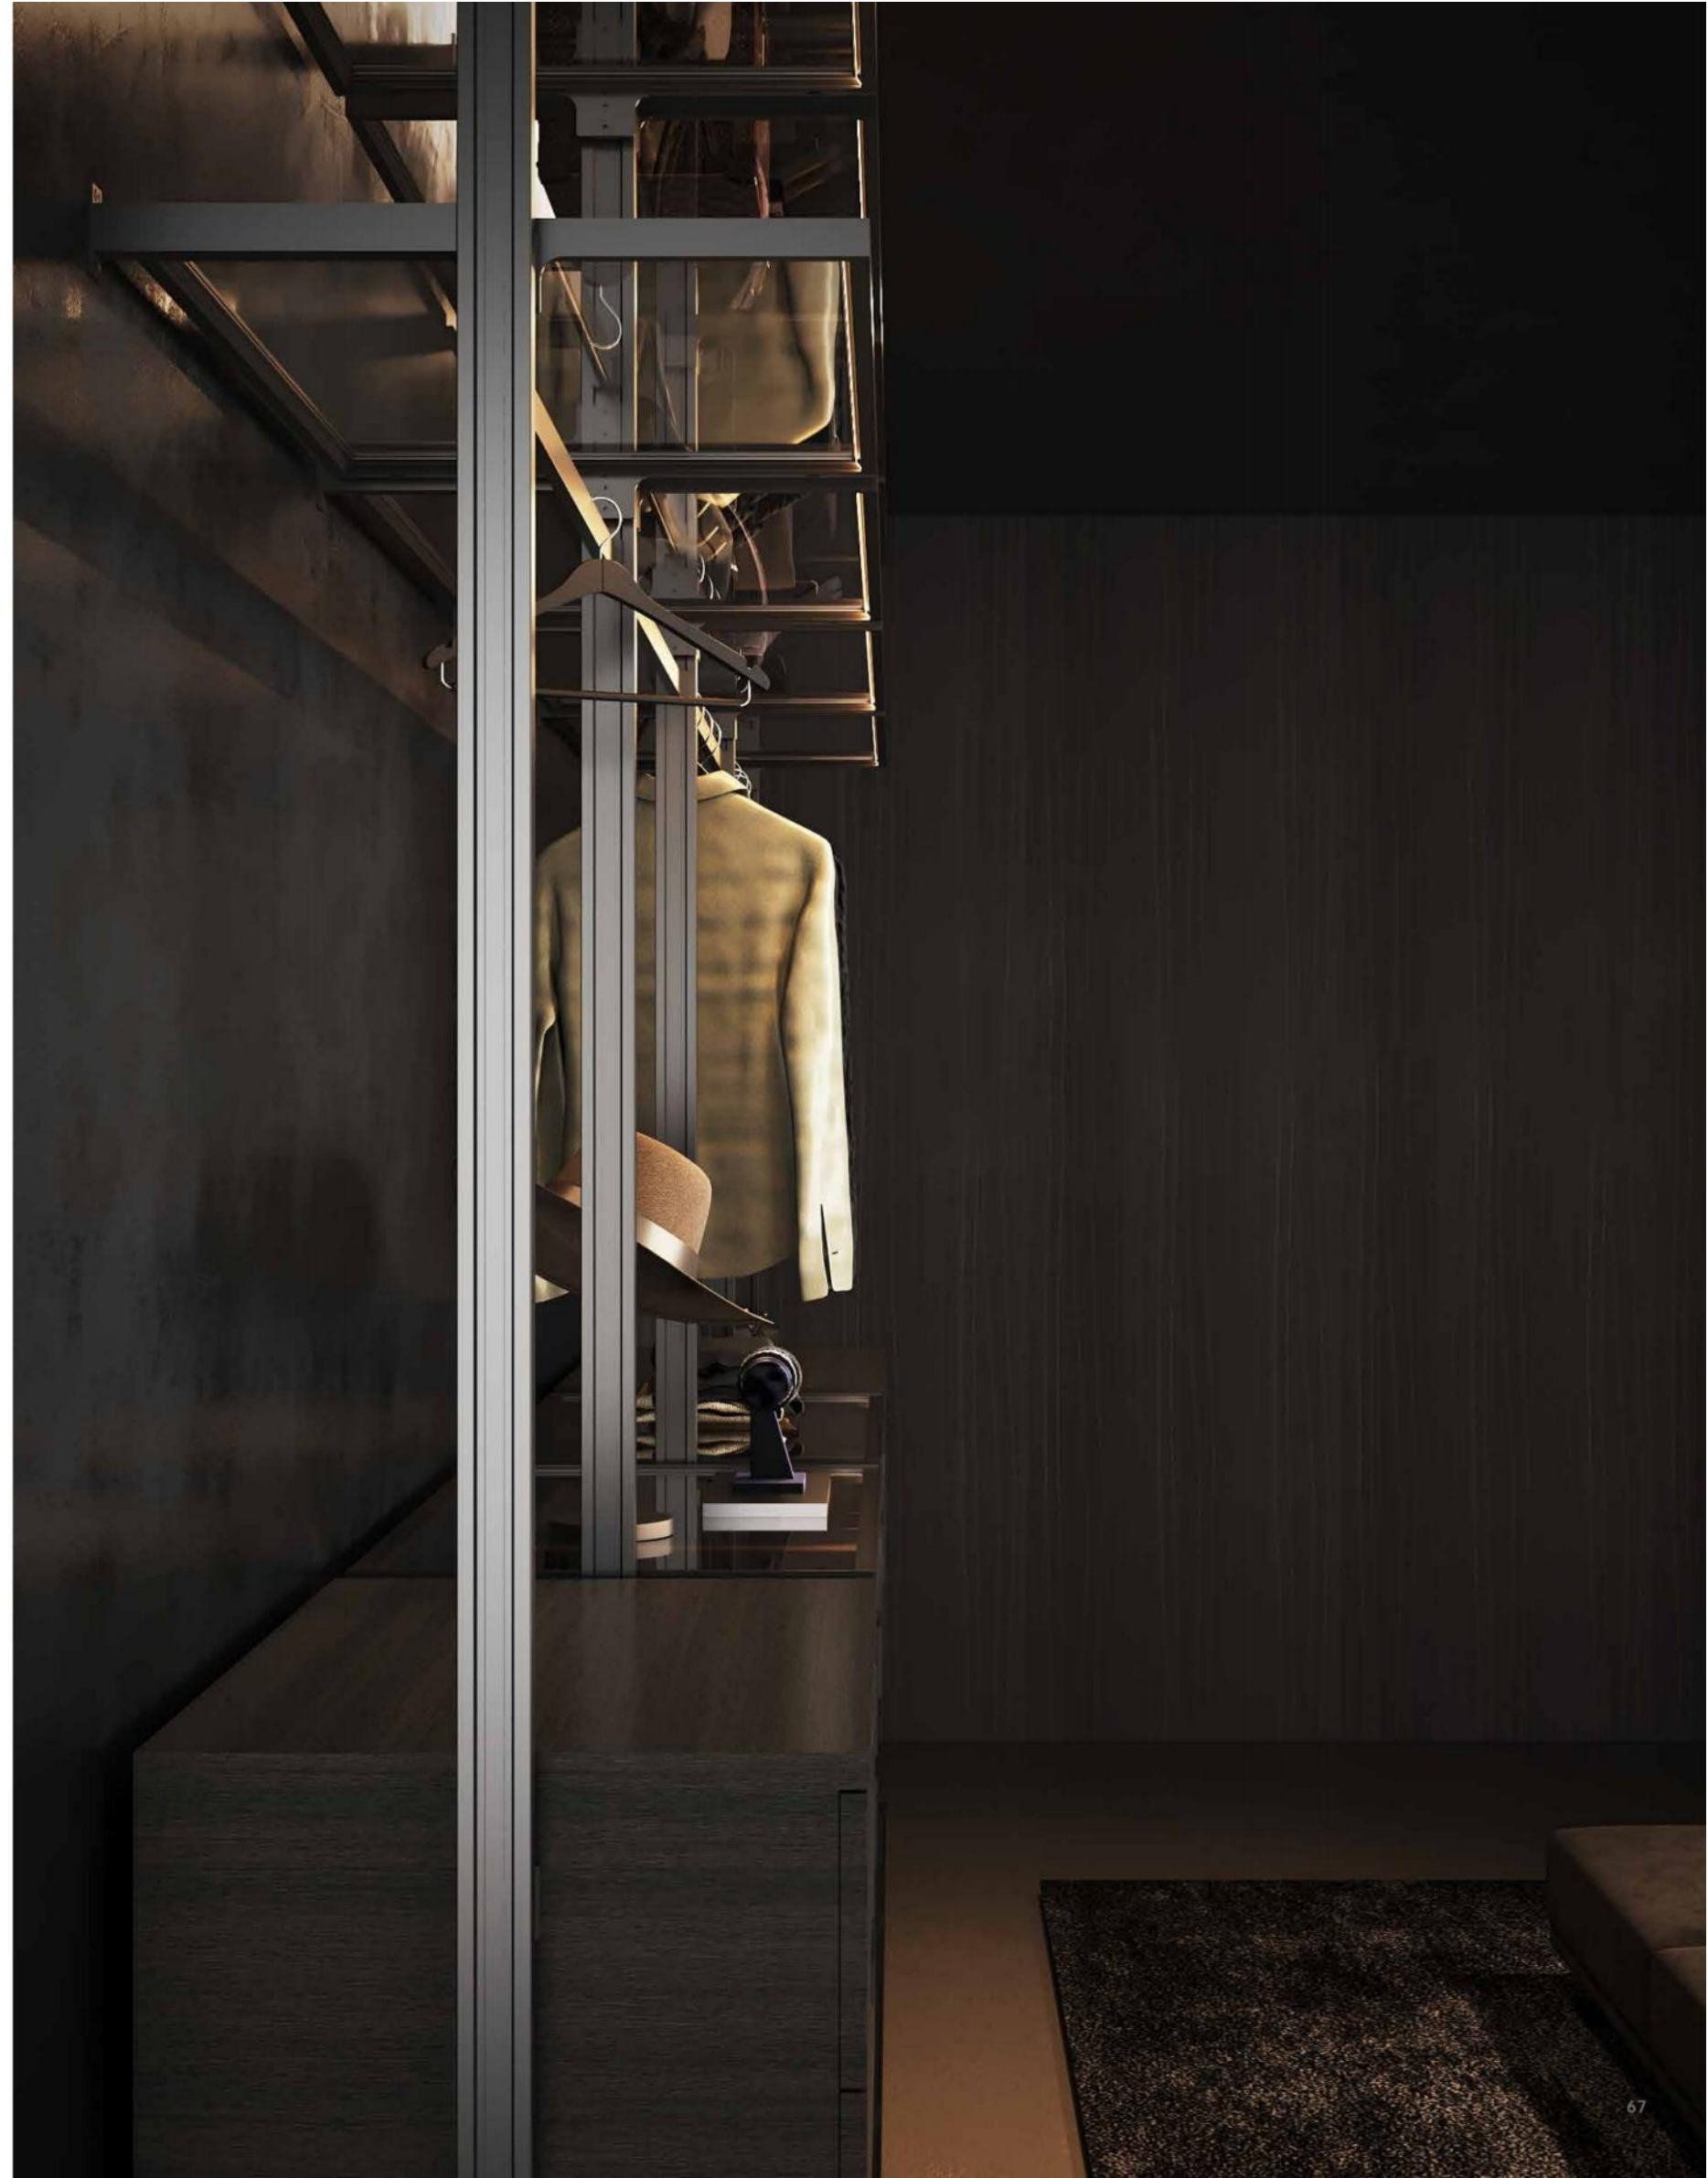

PILLAR-TYPE CLOSET

The pillar-type closet uses columns as the core supporting structure. Storage units are centrally arranged, allowing access from any direction. It is suitable for flexible space layouts and maximizes space utilization. Its elegant design provides a seamless and continuous display experience within the space.

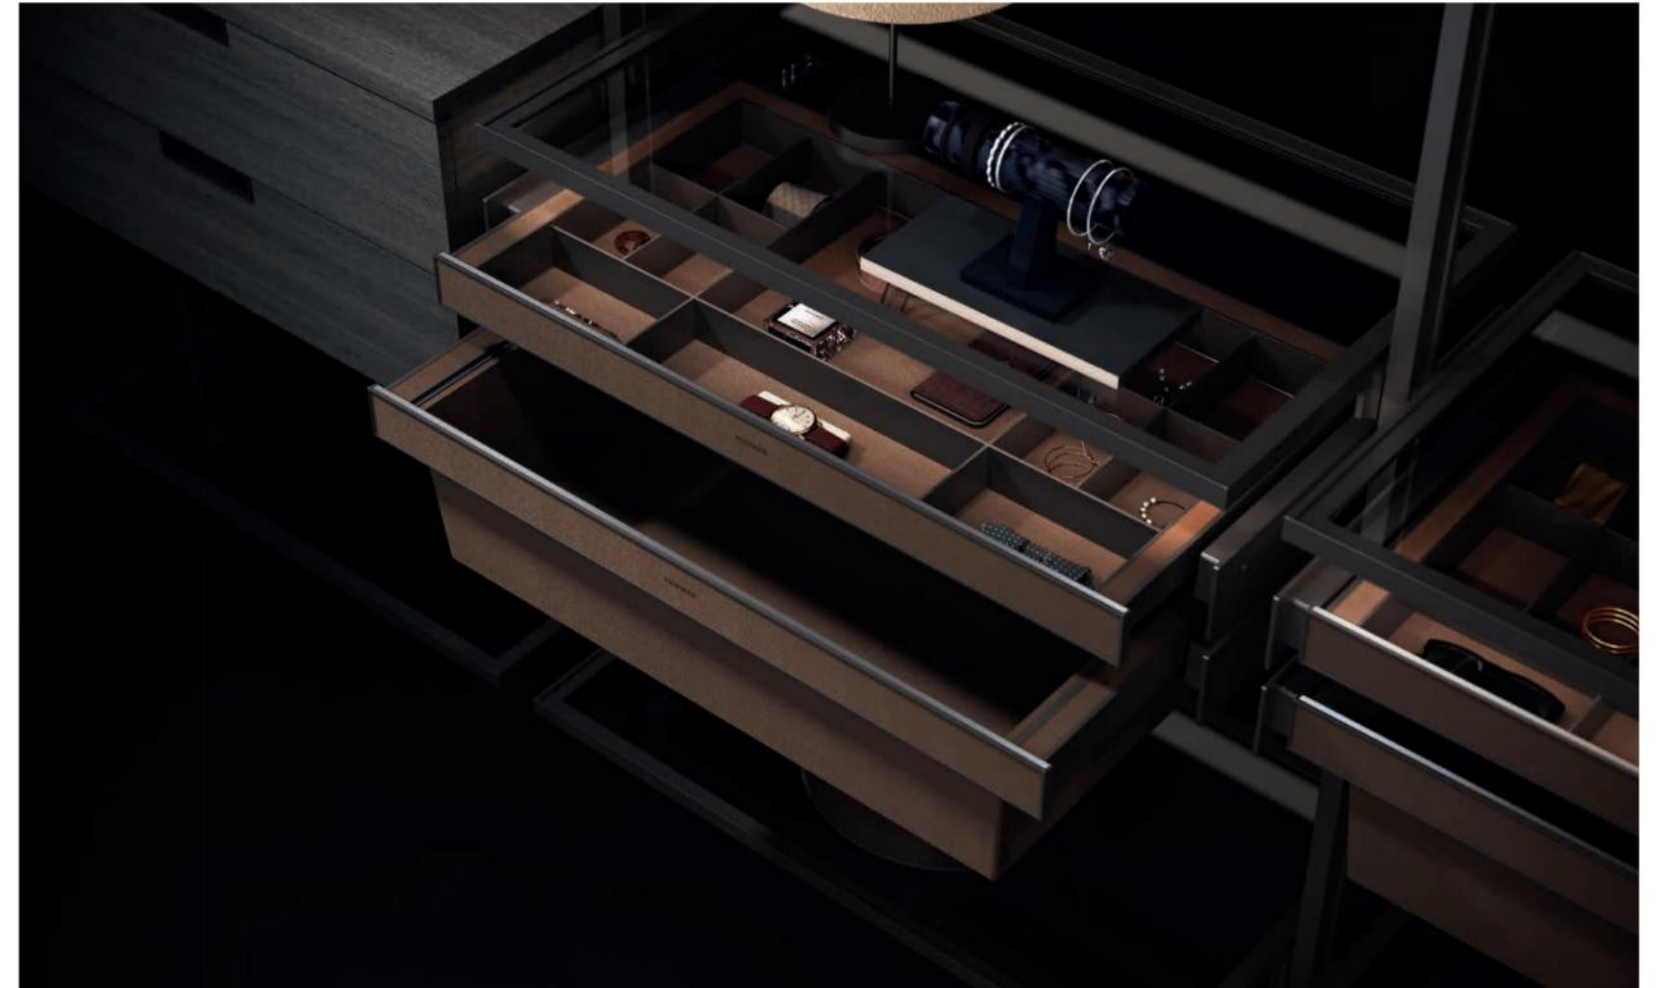

Vertical columns organize layered storage into a unified system, creating continuous display while supporting flexible access and clear spatial orientation from multiple directions.

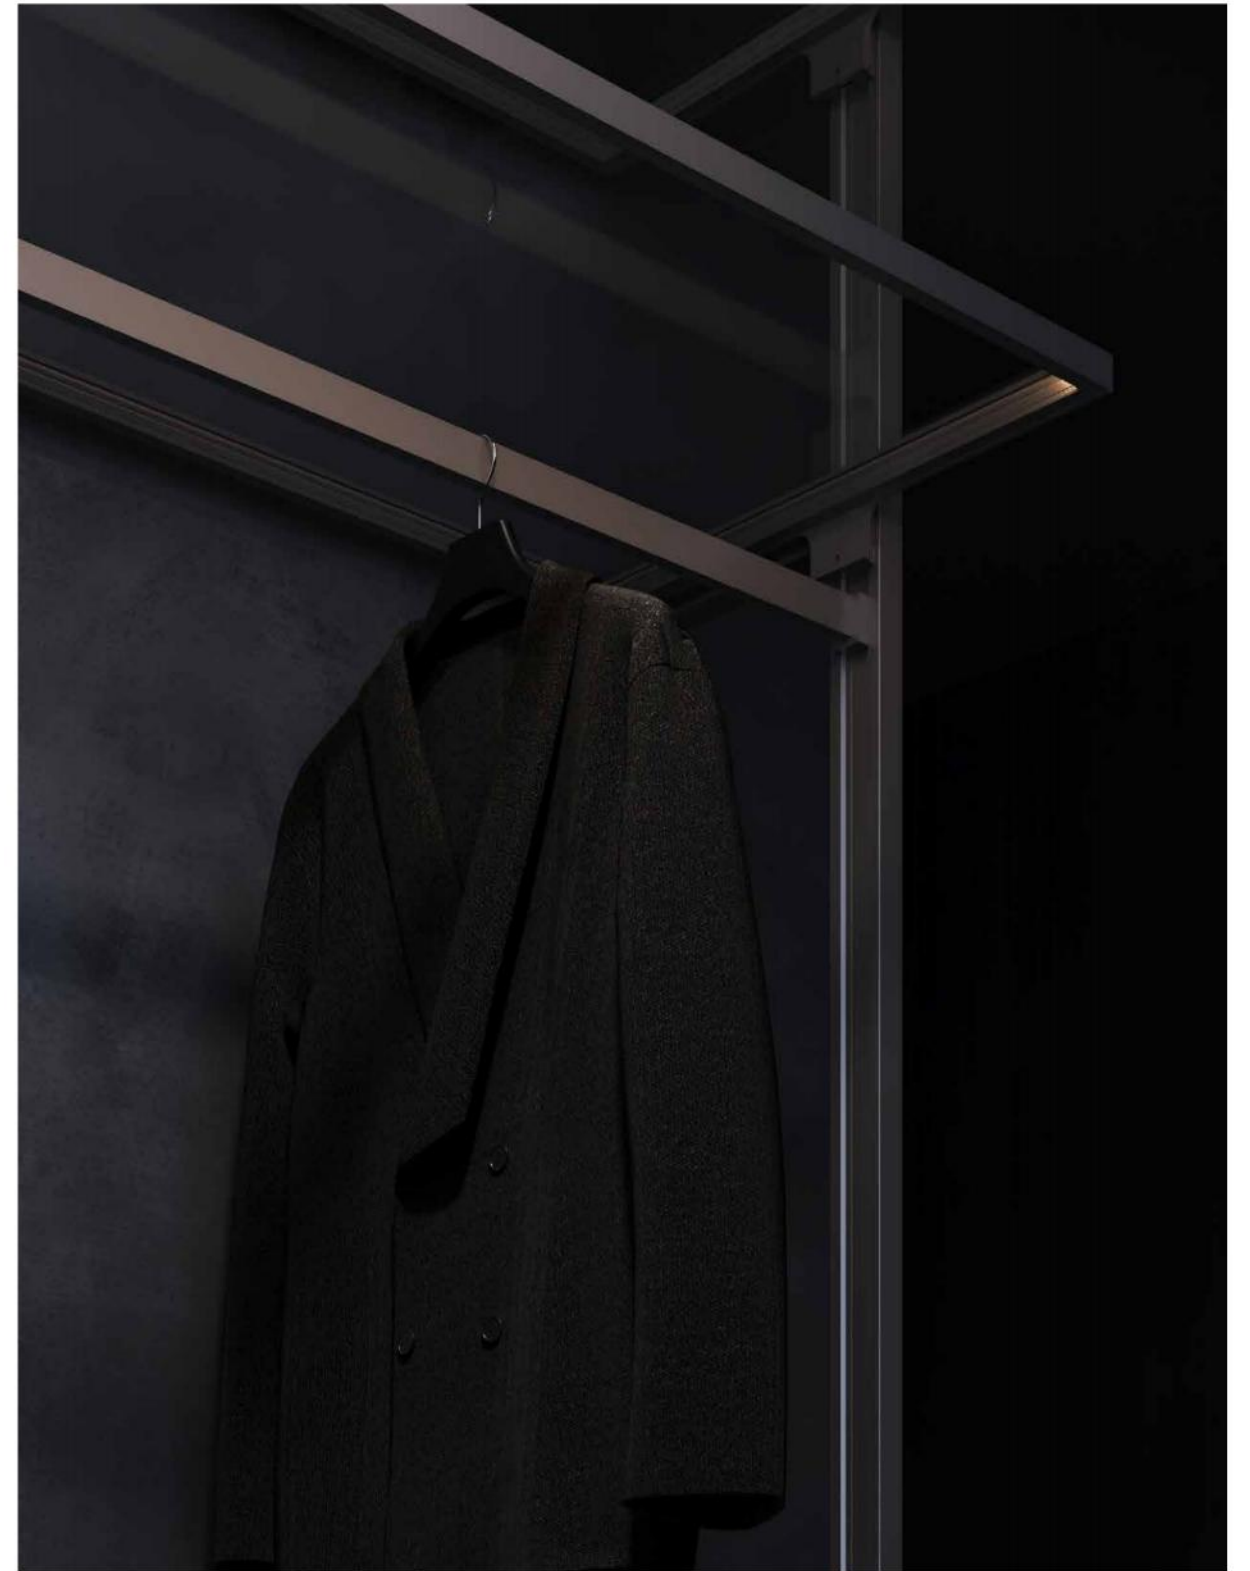

Upper mounted elements and linear hanging rods define a composed overhead rhythm, framing garments within a balanced vertical sequence that emphasizes openness, continuity, and architectural calm throughout the dressing space overall experience.

Layered drawers present accessories with precision, expressing order, depth, and a refined sense of control within the system.

HANGING WALL-MOUNTED CLOSET

The hanging wall-mounted closet combines a wall-mounted structure with a modular system to offer flexible and customized storage solutions. Designed with balanced proportions and a light visual presence, it supports a variety of materials and functional components. Drawers, hanging sections, and organized storage elements can be arranged to suit individual needs, improving comfort and efficiency in everyday use.

Functional storage drawers organize accessories and garments clearly, supporting efficient, comfortable everyday use.

The jewelry organizer features finely divided compartments, neatly separating watches, accessories, and small valuables, ensuring easy access while maintaining an orderly, refined, and well-structured storage experience.

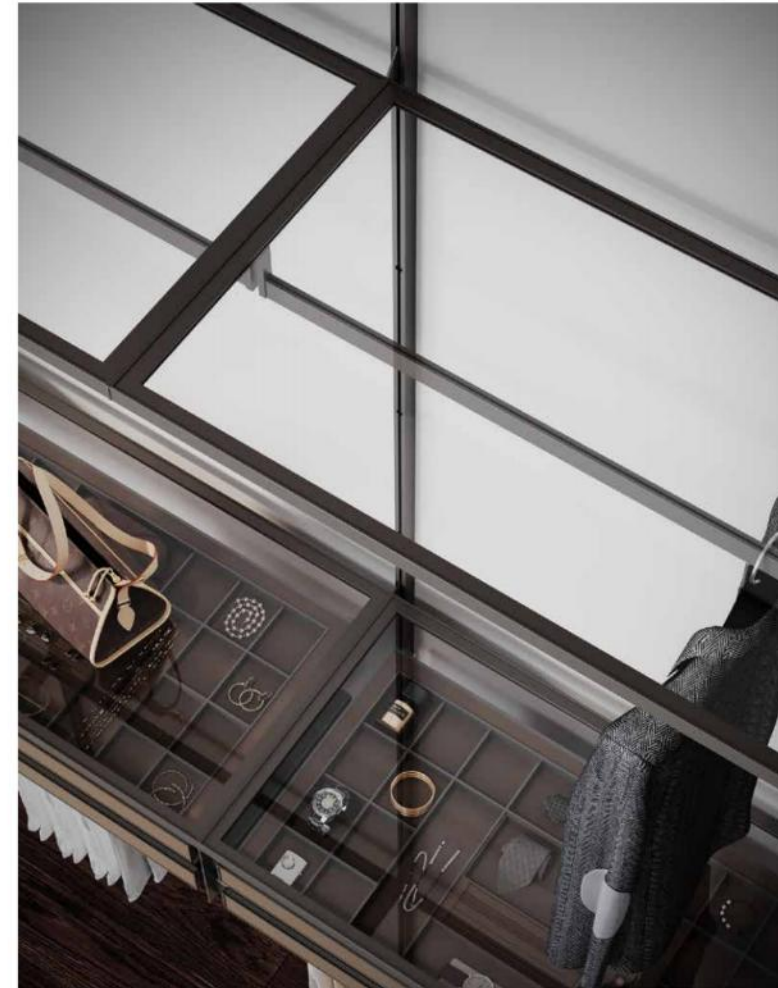

Hanging rods and shelves create clear layers, presenting garments and accessories in an orderly,

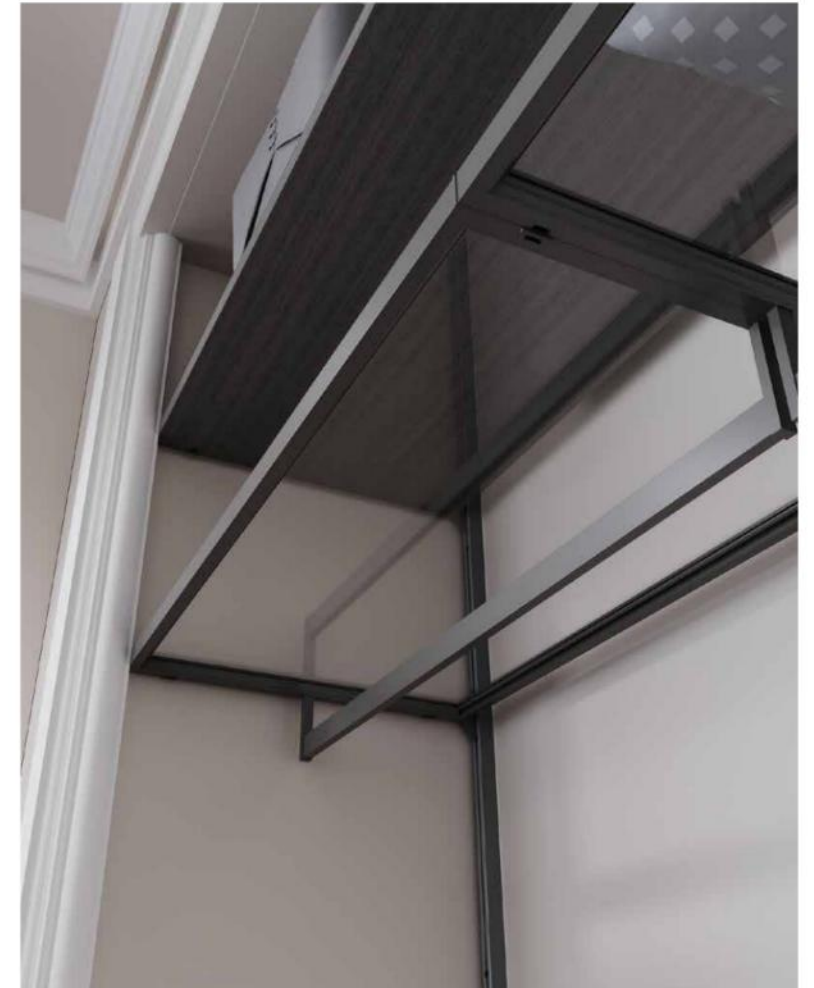

Glass shelves add transparency and clean structure, creating light, clear layers within the wall-mounted system.

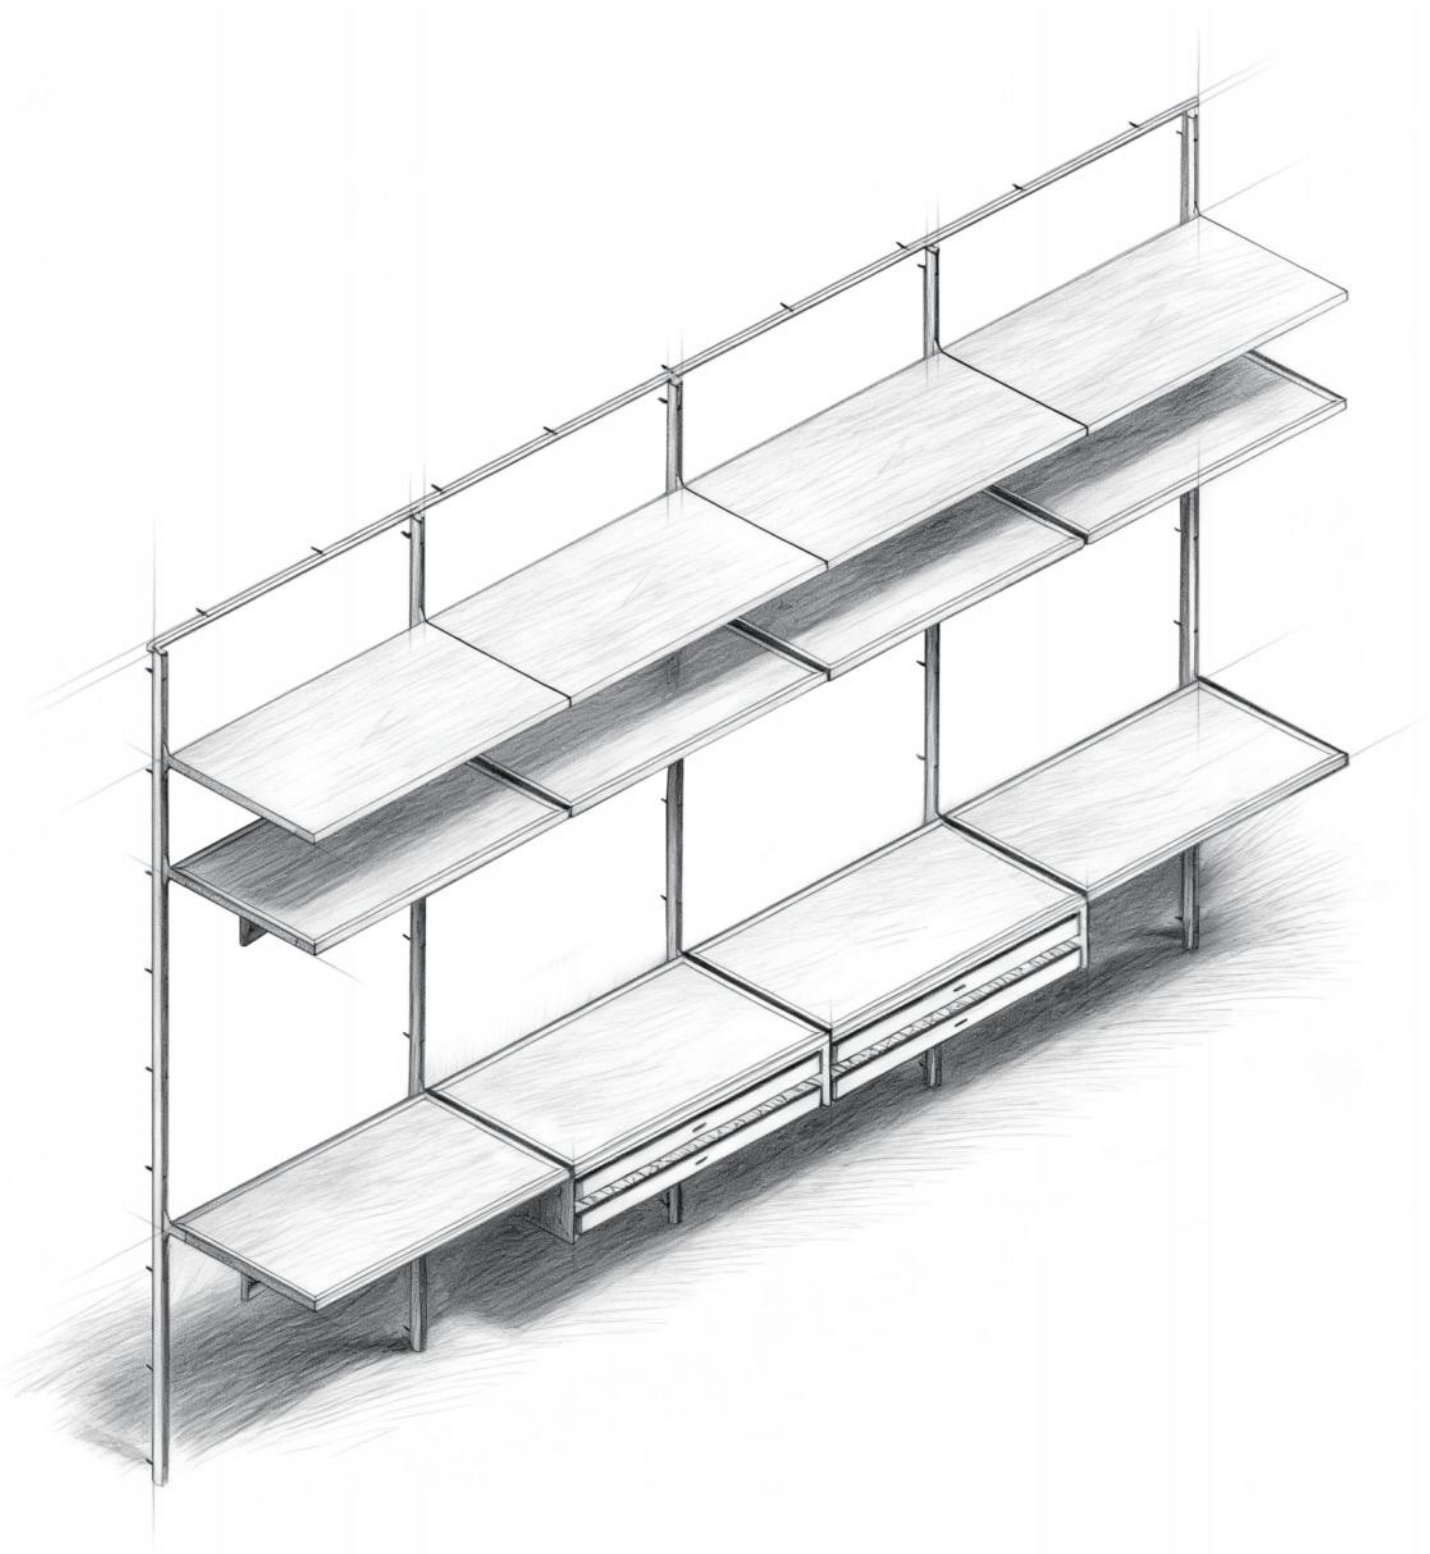

Transparent surfaces and open frames create a calm, elevated perspective where belongings feel light and thoughtfully placed.
