

INSTRUCTIONS FOR USE

PATELLA PULL-UP KNEE BRACE, K8-U/K14-D

 NewOptions

1. Detach upper and lower circumferential Velcro straps and loosen them through the plastic D-loops. Position the support with patella opening forward, wide end up. Slide the support over the foot and calf until it is positioned just below the knee.

2. Place thumbs on the inside of the support along the sides, fingers grasping the outside. Using one continuous motion, pull the support up over the knee until the patella opening properly aligns snugly around the patella.

3. Reattach the upper and lower Velcro straps to desired tightness.
