

INSTRUCTIONS FOR USE

WRIST AND THUMB SUPPORT, W56

 NewOptions

1. Position support with logo up and thumb opening pointed to the same side as thumb receiving the support, depending on left or right hand. Place thumb inside of support, either at bottom of support or along the seam of the thumb area.

2. Place hand receiving support into the open end opposite the thumb, and pull support on like a glove, with one continuous motion, making sure the thumb fits snugly into the thumb area of the support.
