

PDAC Approved Products

WHAT IS PDAC APPROVAL?

The utilization of Healthcare Common Procedure Coding System (HCPCS) codes plays a crucial role in efficiently managing and categorizing our diverse range of devices. These standardized alphanumeric codes allow us to accurately identify and describe each orthopedic brace, simplifying billing, claims processing, and reimbursements with healthcare providers and insurance companies.

PDAC approval stands for "Product Classification and Coding" approval, a process used in the United States to determine the appropriate HCPC code for a medical product or device. PDAC approval is an essential step for manufacturers to ensure their products meet Medicare's requirements and can be properly reimbursed. It helps ensure that medical products used in the healthcare system are appropriately classified and accessible to patients who need them.

By adhering to HCPCS codes and seeking PDAC approvals, New Options Sports ensures transparency and compliance with industry regulations, ultimately enhancing customer satisfaction and facilitating seamless interactions within the healthcare ecosystem. The use of HCPCS codes empowers New Options Sports to streamline operations, enabling us to focus on what truly matters – delivering high-quality, innovative solutions to our valued customers.

Cubital Tunnel Elbow Support (EC16)

"Knee Mate" Hinged Knee Brace (KC64-NOS)

Universal UBL Wristlet (W28)

PDAC Approved Products

Product Name / SKU	L-code
