

S5 Arm-Adillo Shoulder Stabilizer

S5, S5 Custom, and PS5

The S5 Arm-adillo Shoulder Stabilizer is a versatile and effective solution for various shoulder conditions and injuries. It is specifically designed to address Grade I & II A/C Separation, as well as provide support during the pre and post-surgery stages of Grade III Separation. This stabilizer plays a crucial role in preventing and limiting subluxation caused by hyperextension, ensuring the shoulder remains stable during movement. It also allows the desired range of motion necessary for effective rehabilitation.

Additionally, the S5 Arm-adillo Shoulder Stabilizer helps in preventing and limiting abduction, as well as external and internal rotation, promoting proper healing and preventing further injury. It can also be used for individuals with injured ribs, both pre and post bicep and tricep repair, offering optimal support and protection during the recovery process.

FEATURES:

- 1/8" VeLPlush™ neoprene
- Two 1" x 3" hook straps originating from the bicep area to attach to the body of the brace
- Two additional straps and 1" squares of hook for additional support placement.

INDICATIONS:

- Limits movement and supports shoulder girdle
- Customizable for different uses (sling, post-operative, rehabilitation)
- Suitable for wearing during competition
