DANGER  Ultraviolet radiation. Follow instructions. Avoid overexposure. As with natural sunlight, overexposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause premature aging of the skin and skin cancer. WEAR PROTECTIVE EYEWEAR: FAILURE TO MAY RESULT IN SEVERE BURNS OR LONGTERM INJURY TO THE EYES. Medications or cosmetics may increase your sensitivity to the ultraviolet radiation. Consult physician before using sunlamp if you are using medications or have a history of skin problems or believe yourself especially sensitive to sunlight. If you do not tan in the sun, you are unlikely to tan from the use of this product. Children, the elderly, or fair skinned people who always burn easily and either never tan or tan minimally should not use this equipment.

To use, lie down on bench and pull canopy down as far as adjustment will allow. Do not use without acrylic shields in place. Untanned persons should not tan on consecutive days during their first week of tanning. Never tan more than once a day. Tanning normally appears after the first few sessions and maximizes after approximately four weeks. Tan once or twice per week thereafter to maintain appearance. Persons already having a base tan may begin at advanced levels corresponding to the extent of their base tan.

Skin Type:

I Sensitive Skin  (Burns easily and severely and does not tan.)
II Light Skin  (Burns easily and severely and tans minimally.)
III Normal Skin  (Burns moderately and tans average.)
IV Dark Skin  (Burns minimally, tans easily and above average.)

MAXIMUM EXPOSURE TIME IS 14 MINUTES

New lamps emit approximately 10% more ultraviolet radiation during the first 50 hours of operation. Recommended tanning times should therefore be reduced by approximately 10% during that period.

WARNING:  • Read these instructions before using this sunlamp product. • All persons in the room should wear protective eyewear when lamps are on. Recommended eyewear: provided eyeshields or equivalent eyewear as defined under 21 CFR 1040.20. Other types of eyewear may not provide adequate protection. Failure to use protective eyewear may result in severe burns or other eye injury. If discomfort develops, discontinue use and consult a physician.

THE FOLLOWING LAMPS HAVE BEEN CERTIFIED FOR USE IN THIS EQUIPMENT:

X-Power Model XP71-T12-100W Bi-PIN
XS-Power Model XSP71-T12-100W Bi-PIN

Connect power cord before attempting to clean, relamp, or engage in the maintenance of this product

THIS EQUIPMENT MUST BE EARTH GROUNDED.

This product is in conformity with performance standards for sun lamp products under 21 CFR PART 1040.20 and ANSI/UL Standard 482.

Electrical Requirements

Your sunbed operates from a 220V AC source. The 30 X-Power requires a NEMA L6-30R electrical outlet (below) on a dedicated circuit capable of providing 30 Amp service, installed in the room in which you will use the unit. We recommend installation by a professional electrician. The outlet must be earth grounded.

30 AMP NEMA L6-30R RECEPTACLE

Unpacking and Inspection

Your sunbed comes in two cardboard cartons. Pull back the plastic sheet and, with a helper, grasp the bench and pull it from the carton bottom, leaving the plastic wrap and the carton packaging. Do not try to lift the unit with the plastic still on as it may slip. Do the same with the canopy.

The canopy box contains the canopy and a pair of gas springs. The bench box contains the bench, assembly hardware and stand legs.

Inspect the items and make sure they are free from any visible damage. Report the extent of any damage to the transportation company.

Hardware Inventory  (These items and a small pillow)

- Allen-head Bolt 5/16" x 1"
  Quantity 2
- 5/16" Metal Washer
  Quantity 2
- Bushing
  Quantity 2
- Allen-head Bolt 5/16" x 1 1/2"
  Quantity 2
- Nylon Washer
  Quantity 2
- Safety Goggles
  Quantity 1

4930693-02 - Page 1
Assembly Procedures

1. Lay the bench upside down on the floor. Locate the two stand legs.

2. Remove the six 5/16" x 1" bolts and 5/16" washers installed in the bench. Attach the stand legs, with the two small skirt mounting holes toward the front, by installing the center bolt first. You may have to gently push the sides of the legs in to align holes. Tighten with the Allen wrench.

3. Turn bench over. Install hinge brackets to ends of bench such that the short boss engages the stud above the bolt hole, and the long boss engages the hole below the bolt hole. Secure using 5/16" x 1" Allen-head bolts and 5/16" metal washers. Tighten bolt snug, then an additional half turn.

4. Place the bushings into hinge brackets.

5. Lift the canopy and hold it between the hinge brackets.

6. Insert 5/16" x 1 1/2" bolts with nylon washers into both hinge brackets. Tighten bolts into the endcap threaded inserts until snug, then an additional half turn.

7. The gas springs have a locking mechanism. Follow the directions below for the type you received.

   **Type 1**
   Pry back the locking clip with a flat screwdriver.

   **Type 2**
   Remove locking clip to install or remove gas spring.

8. With a helper holding the canopy open, align ends of gas spring ball joints with pivot studs and push into place. Be sure rod end is down as shown. DO NOT lower canopy until both gas springs are engaged!

9. Lift and lower canopy a few times to lubricate gas springs for optimum performance.

10. Connect the canopy to bench power cord to the bench receptacle. Align the terminals and firmly push on until seated then tighten the threaded locking ring.

11. Plug the three-prong 220V AC power cord into a dedicated outlet (see Electrical Requirements).

**CAUTION**
Failure to engage locking clips may result in the ball joints working loose, allowing the canopy to fall, which may result in damage to the unit and injury.
Optional Skirt
If you received the optional skirt kit, install it as shown below.

Remote Connections
Your sunbed incorporates advanced circuitry allowing it to connect and communicate with most remote control systems. If a remote system is to be used, first determine whether the remote system is a T-Max® System or a standard remote system operating with a control relay. Follow the appropriate instructions for your system type.

T-Max® Products
The T-Max® remote systems offer the ultimate in sunbed control, while allowing the tanner easy straightforward operation. Your sunbed is configured to directly connect to this system, including the new wireless remote system. The circuitry inside your sunbed eliminates the need for the T-Max® 1A or 3A when connecting to the T-Max® Manager series. Your sunbed supports the auto addressing feature of the latest T-Max® Manager models and the following parameters: 5, 6, 7, 8, 9, 10, 15 and 23. See your T-Max® manual for descriptions of these parameters and how they function.

T-Max® Wireless Remote System
The T-Max® G2 eliminates wires in your salon, allowing easy setup without hiring an electrician to run wires. It also protects your investment from damage by isolating each unit from one another. Your sunbed arrives “wireless ready”, which means it connects directly to the T-Max® wireless system. Older tanning beds, and T-Max® managers, also utilize this system but require a T-Max “Power Injector” (PI) to provide the needed power to the wireless unit.

Remote System Hook-up Scenarios
Follow the diagrams below and on the next page to see the many different scenarios for hooking up your salon. If you need further assistance, call T-Max® directly at (417) 297-0361.
Scenario 2 - T-Max 3A with Wireless

In single sunbed installations, the T-Max® 1A and 3A can offer the same control as the T-Max® Manager, eliminating the need for a Manager. If you're using a 1A in this manner, it must have a chip labelled “master” installed on its circuit board. The remote control bypass plug must not be used in this configuration. The 3A may be used as a “master” with no modification.

After you have set the T-Max® 1A’s, or 3A’s, address to “0” (refer to your T-Max® user’s guide) and the sunbed’s address to “1”, simply connect one G2 (with Power Injector) to the T-Max® 3A and one G2 to the tanning bed.

Scenario 3 - T-Max® Manager Series with Wireless combination

Wireless can be easily added to an existing salon already utilizing T-Max®. Connect one G2 (with Power Injector) to the Manager and one G2 to each wireless ready tanning bed. The rest of the salon may be “daisy-chained” together and connected to the Manager.

Scenario 4 - T-Max® Manager Series with Wireless combination 2

Connect one G2 (with Power Injector) to the Manager and one G2 to a wireless ready tanning bed. The rest of the salon may be “daisy-chained” together and connected to the wireless equipped tanning bed, eliminating the need to wire the Manager to the tanning beds.

Scenario 5 - T-Max® Manager Series with wires

As always, this tanning bed is fully compatible with a wired T-Max® system. Simply connect the RJ-22 modular cable(s), described in the T-Max® Manager manual, to the remote port(s) located on the canopy and follow the instructions that came with your remote system.

Scenario 6 - Single Bed wired to T-Max® 3A

In single sunbed installations, the T-Max® 1A and 3A can offer the same control as the T-Max® Manager, eliminating the need for a Manager. If you’re using a 1A in this manner, it must have a chip labelled “master” installed on its circuit board. The remote control bypass plug must not be used in this configuration. The 3A may be used as a “master” with no modification.

After you have set the T-Max® 1A’s, or 3A’s, address to “0” (refer to your T-Max® user’s guide) and the sunbed’s address to “1”, simply connect the RJ-22 modular cables, described in the T-Max® user’s guide, directly into either of the smaller ports located on the canopy and either port on the back of the T-Max® 1A or 3A.

NOTE: A T-Max® 1A with a “master” chip can be substituted for a 3A.

Scenario 7 - Non T-Max® Remote System wired to unit

Most non-T-Max® remote systems control the sunbed by the use of a relay. The relay operates the sunbed by connecting and disconnecting a pair of wires leading from the sunbed. Refer to the user’s manual provided with your remote system to determine if it operates in this way. To connect your sunbed to this type of system a remote interface kit is required. Contact your place of purchase to obtain the kit. The illustration at right details a typical connection. Follow the instructions provided with the kit and from the remote’s manual to make the necessary connections.

Non T-Max Remote System (using control relay)

Remote Interface Kit

Go straight to the source with all your T-Max® brand remote questions: (417) 297-0361
Using Your Sunbed

Before using your sunbed, please note the following:

- Your skin should be free of cosmetics, tanning oils, or other body lotions prior to tanning except for those specifically made for use with tanning devices. However, do not remove natural body oils by bathing or showering immediately before tanning.
- Keep treated hair from contacting sunbed surfaces. Many hair products can damage the sunbed acrylic. Wear a shower cap or towel if you use gels, mousses, sprays, or other hair products.
- Your sunbed is designed for individual use. Always wear the safety goggles supplied with your sunbed or another approved pair of goggles, as defined under 21 CFR 1040.20. Regular sunglasses do not provide adequate protection from ultraviolet light.

Exposure Times

Follow the guidelines for skin type and exposure times as shown in the table below. Untanned persons should not tan on consecutive days during their first week of tanning. Never tan more than once a day. Tanning normally appears after the first few sessions and maximizes after approximately four weeks. Tan once or twice per week thereafter to maintain appearance. Persons already having a base tan may begin at advanced levels corresponding to the extent of their base tan.

### Skin Type:

- **I Sensitive Skin** (Burns easily and severely and does not tan.)
- **II Light Skin** (Burns easily and severely and tans minimally.)
- **III Normal Skin** (Burns moderately and tans average.)
- **IV Dark Skin** (Burns minimally, tans easily and above average.)

### Setting the Address manually

Before connecting your sunbed to the T-Max® Manager or T-Max® 1A or 3A, the address of your sunbed must first be set. Set the address manually as described below.

1. Make sure the sunbed display is showing “0”.
2. Press the red stop button and, without releasing it, press the green timer button and hold both for three seconds. The display will indicate an address number from “1” to “255”.
   - 1-99
   - 100-128 (blinking dot)
   - 252-255 (blinking dot)
3. If you are using a T-Max® 1A or 3A as a “master” remote, the address of the sunbed must be set to “1”. If you are using a T-Max® Manager each sunbed must be assigned a different address. To adjust the address, press the green timer button to count up until the desired number (from 1 to 128) is achieved. Addresses 252 to 255 are not normally used.
4. Press the red stop button to return to the normal display mode.

### Operation

A Timer display - Displays remaining time.
B Timer button - Turns bed on. Timer display shows remaining time. If a lesser time is desired, press timer button until desired time is displayed.
C Stop button - Interrupts tanning session.

(When used without remote or when connected to a remote system using a control relay)

1. Press the timer button (B) to begin the tanning session. The timer display (A) displays the remaining time. The lamps will turn on and the timer will begin to count down from the maximum tanning session time. If a tanning time less than the displayed time is desired, repeatedly press the timer button (B) to decrease the remaining time.
2. Lift the canopy, lie down on the bench (face up), lower the canopy as close to your body as possible.
3. When the timer reaches “0” the lamps turn off. If you want to stop your session before time expires, press the stop button (C).
4. Raise the canopy by using the outer edge of the canopy, do not push up on the acrylic shield as it may crack. The cooling fans run for three minutes after the lamps shut off to aid in cooling the sunbed.

(When connected to the T-Max® Manager or T-Max® 1A or 3A.)

1. If the remote system has been set to allow a pre-tanning delay time, the timer display (A) will repeatedly flash the delay symbol “dL” and then the remaining delay time. Press the timer button (B) or wait until the delay time has expired to begin the tanning session. The lamps will turn on and the timer will begin to count down.
2. Lift the canopy, lie down on the bench (face up), lower the canopy as close to your body as possible.
3. When the timer reaches “0” the lamps turn off. If you want to stop your session before time expires, press the stop button (C).
4. Raise the canopy by using the outer edge of the canopy, do not push up on the acrylic shield as it may crack. The cooling fans run for three minutes after the lamps shut off to aid in cooling the sunbed. The timer will indicate “..” as a reminder to clean the sunbed. After the sunbed is cleaned press the timer button and the display will return to “0”.

4930693-02 - Page 5
Care and Maintenance

Cleaning After Use
Clean and disinfect your tanning bed’s bench and canopy after each use. Use a non-abrasive disinfectant cleaner that does not contain ammonia or ammonia derivatives. Ammonia may damage the acrylic shield. Spray the acrylic lightly with disinfectant and wipe dry with a clean soft cloth.

Thorough Periodic Cleaning
The cooling fans draw air through the bed and will cause a dust build-up on the lamps and reflectors. When a dust buildup is observed, it is necessary to thoroughly clean the inside of the bench and canopy.

1. Remove the acrylic shields and lamps.
2. With a soft cloth, wipe the entire length of each lamp.
3. Clean both sides of the acrylic shields with a non-ammonia disinfectant cleaner.
4. Wipe the reflectors with a clean damp cloth.
5. Re-install the lamps and acrylic shields.

Mechanical Inspection
Inspect the unit’s mechanical integrity every 400-500 hours of use.

• Inspect the unit’s fasteners verifying that all are firmly in place. Pay particular attention to the hinge bolts.
• Inspect gas springs for signs of wear. Replace gas springs that will not hold the canopy in the full open position when raised.
• Inspect the AC power cord and its connections.
• Inspect the acrylic. Replace if broken, cracked or badly scratched.

Removing/Replacing Acrylic Shields
The acrylic shields are secured in place by hinged profiles which run the length of the bed, both front and back. Simply pry up on the inside edge of the profile until it releases its latching action (see figure below). Continue to pry up the profile across its entire length until it swings back freely. Repeat for the other profile. The long edges of the acrylic shield are now exposed. Standing in front of the sunbed, grasp the long exposed edge of the acrylic and carefully slide it toward you until it is removed.

After changing the lamps, replace the acrylic shields by reversing the above directions. Close the hinged profile by pushing it back into place until it snaps tight.

Replacing Lamps
To be assured of maximum tanning effectiveness, change lamps after approximately 500-700 hours of use. Tanning will continue after this time but at a slower rate. To ensure trouble-free operation of your sunbed, replace the lamp starters whenever the lamps are replaced. We recommend using the lamps specified below. Use of uncertified lamps is a violation of Federal regulations and may void your warranty.

1. Grasp a lamp at one end and at the middle, then turn the lamp a quarter turn. The lamp may then be gently removed from its holder.
2. To reinstall lamp, insert pins on the ends of the lamp into the slots on top of the lamp holder and turn the lamp a quarter turn.

The following lamps have been certified for use in this equipment:
X-Power Model XP71-T12-100W BI-PIN
XS-Power Model XSP71-T12-100W BI PIN

Hour Counter
This sunbed incorporates an ingenious hour counter function into the timing circuitry. It allows the operator of the unit to monitor the hours of use of the lamps, making it easy to determine when to change them. You may also decide to use this function to monitor other time based maintenance tasks.

To determine how many hours the unit has been in service (since the last reset of the hour counter memory), first make sure the timer display shows “0”. Then simply hold the stop button for three seconds. The display will show two pairs of numbers which indicate the number of hours of service, then return to “0”. (example: Display shows 08 then 54. This equals 854 hours.) NOTE: If the unit is connected to a T-Max® remote device, it may briefly lose communication with the remote. This is normal.

To erase the indicated hours, disconnect power from the sunbed. Press and hold the green timer button as you reconnect power. Release the button after a few seconds.

CAUTION
Be careful. The edges of the acrylic shield may be sharp.

LIMITED WARRANTY

SunCo warrants your tanning unit to be free of structural defects in material and workmanship, under normal use, for its lifetime. SunCo will, at its discretion, repair any structural defect which materially affects the performance of the tanning unit, or replace the tanning unit.

For twelve (12) months following the purchase date of your tanning unit, SunCo will provide replacements for parts that prove to be defective in material or workmanship, with the following exceptions: fluorescent lamps are warranted against manufacturer’s defects for a period of thirty (30) days; acrylics are warranted against manufacturer’s defects for a period of one (1) year (prorated) following the purchase date of your tanning unit. Standard ground shipping charges will be covered for the entire twelve (12) months of this warranty period. Any upgraded shipping method charges will be paid for by the customer.

Labor costs associated with repair or replacement work covered by this warranty will be reimbursed for repair or replacement work required to be performed for a period of ninety (90) days following the purchase date of your tanning unit. Normal wear and tear, damage from misuse or abuse, damage incurred in transit or damages resulting from unauthorized repairs or modifications are not covered by this warranty. Warranty coverage does not include cosmetic abnormalities such as scratches, nicks, dents, or other cosmetic changes that do not materially interfere with the function of the tanning unit.

THIS WARRANTY IS EXPRESSLY MADE IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY DISCLAIMED. No one has the authority to change or modify this One Year Warranty in any respect. Proof of purchase, including serial number, is required for any warranty coverage.

IN NO EVENT SHALL YOUR DISTRIBUTOR OR THE MANUFACTURER BE LIABLE AT LAW OR IN EQUITY FOR ANY LOSS, LIABILITY, DAMAGE OR EXPENSE IN AN AMOUNT IN EXCESS OF THE PURCHASE PRICE RECEIVED, OR FOR LOSS OF USE OR PROFITS, LOSS OF TIME, INCONVENIENCE, RENTAL OR SUBSTITUTE PRODUCTS, LOSS OF BUSINESS, LOSS OF INCOME, OR ANY OTHER INCIDENTAL, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, and the above limitation or exclusion will not apply to residents of some states. This One Year Warranty gives you specific, legal rights and you may have other rights which may vary from state to state.

JK Products & Services, Inc. makes no guarantees on income, return on investment, market conditions, performance, etc. with any undertaking using its products and services. Past performance is not indicative of future results. All warranty service must be performed by an authorized service person using only SunCo authorized replacement parts. Use of non-authorized parts may void your warranty. All labor charges must be authorized by SunCo prior to the start of repairs and must not exceed the established rates and time allotment policies established by JK Products and Services. Contact SunCo for the authorized Service Center nearest you. This warranty is serial number specific and only applies to tanning units purchased through Sun Co. This warranty is extended to the individual or legal entity whose name appears on the original sales document and may not be transferred to any other individual or legal entity. This warranty is void if the tanning unit is modified in any manner from its original design.

To obtain warranty service, contact your place of purchase. Proof of purchase, including serial number, is required for verification.
