

Maintenance and Care Instructions for Wall Padding

- 1) Periodically inspect wall pads for proper and secure attachment to wall surface. If fasteners appear loose or are damaged, tighten, repair or replace as needed.
- 2) Resilite wall pads may be cleaned using a mild solution of dish detergent (recommended Dawn Dish Detergent) and warm water. If a more aggressive cleaning is needed to remove stains, an all-purpose household cleaner such as Simple Green sold by Sunshine Makers, Inc of Huntington Beach, CA. Always test application of this cleaner in an inconspicuous area of the pad before using it on the original area to clean. Wipe residual cleaner with a water-dampened cloth after application.

NOTE: Do not use harsh solvent type cleaners. Solvent-based cleaners can cause cracking, crazing and general product deterioration.

- 3) Inspect wall pads for tears or holes in the vinyl. Repair any areas with a color vinyl patch as soon as possible to prevent further tearing and exposure of the foam padding.

NOTE: Contact Resilite Sports Products, Inc. for availability of matching color patch and industrial vinyl cement adhesive for securing the patch to the existing wall pad.
