Safety Instructions:

Intended use:

This device is intended for use as effects pedal for sound processing of audio signals from musical instruments with electromagnetic pickups. Any other use or use under other operating conditions is deemed improper and may result in injury or product damage. No liability will be taken for harms resulting from improper use.

Safety:

DANGER!

Risk of injury and choking hazard for children!

Children can suffocate on packaging material and small parts. Never allow children to play with packaging material or the device. Always store packaging material out of the reach of babies and small children. Always dispose of packaging material properly when it is not in use. Never allow children to use the device without supervision. Keep small parts away from children and make sure that the device does not shed any small parts (such as knobs, rubber feet) that children could play with.

WARNING!

Possible hearing damage due to high volumes on speakers, headphones, bass & guitar amplifiers!

With loudspeakers or headphones connected, the device can produce volume levels that may cause temporary or permanent hearing impairment. Over an extended period, even levels that seem to be uncritical can cause hearing damage. Do not operate the device permanently at a high-volume level.

Decrease the volume level immediately if you experience ringing in your ears or hearing impairment and seek medical advice.

9VDC NOTICE!

Damage to device if powered incorrectly!

This product is designed to be powered from a 9VDC, >200mA power supply with 2.1mm centre-negative barrel connector. Use of an incorrectly rated power supply could result in damage to the pedal and the power supply.

Environmental information

The crossed out wheely bin symbol indicates this product is classified as Waste Electrical and Electronic Equipment (WEEE) in the European Union and should not be discarded with household waste. Other territories may vary. Contact your local authority or THORPYFX for more information.

The packing materials for this product are recyclable. Do not dispose of these materials with your normal household waste. Please refer to the symbols on the packaging for recycling information. Contact your local authority for further guidance on recycle in your region.

Directives & regulations

This product complies with Electromagnetic Compatibility (EMC) directive 2014/30/EU.

THORPYFX has conformed where applicable to European Union's Directive 2011/65/EU on Restrictions of Hazardous Substances (RoHS) as well as the following sections of California law which refer to RoHS, namely sections 25214.10, 25214.10.2, and 58012, Health and Safety Code; Section 42475.2, Public Resources Code.

This product complied with the regulations required to hold the UKCA mark

HANAMI

OWNERS GUIDE

Congratulations on your purchase of the HANAMI Germanium fuzz pedal! The use of this pedal will now allow you to achieve some of the best fuzz tones you've ever heard.

OVERVIEW: HANAMI is a fuzz we feel is a natural successor sonically from where the BONEYARD left off. Rather than seeking to emulate anyone else's circuits, HANAMI sits perfectly between the BONEYARD and the FALLOUT CLOUD. It is a fuzz that takes inspiration from the past but offers modern features and a sonic footprint that is inspirational no matter what styles of music you play. Built with 4x NOS germanium transistors and 1x NOS Germanium Diode. HANAMI is loaded with saturation offering smooth, rewarding and evolutionary fuzz tones from one easy to navigate control set.

CONTROL:

FOOTSWITCH: ON/OFF True bypass

VOLUME: Use this control to balance the output of the pedal. Unity (where the volume out matches the volume in) is roughly at the 10 o'clock position, depending on your guitars pickup output.

BOOST: This control allows you to adjust the pedals character from smooth lower gain fuzz through to a more saturated aggressive and smile inducing fuzz.

TREBLE: This control adds or cuts Treble to the Fuzz. Fully counter clockwise removes treble and fully clockwise boosts treble. This control is very interactive with the bass control.

BASS: This control adds or cuts Bass to the Fuzz. Fully counter clockwise removes Bass and fully clockwise boosts Bass. This control is very interactive with the Treble control. Adjusting the Bass and Treble control allows you to tailor the tonality of the fuzz to match your guitar and amp.

PLACEMENT: HANAMI has a transformer isolated input... as such, you can place it wherever you like in your signal chain and still enjoy the incredible Germanium tones we planned for you.

POWER: The HANAMI is designed to be powered by a 9V DC centre-negative 2.1mm power supply. Do not attempt to use this pedal with other voltages or polarities. We have power protection circuitry in our pedals and use of any other voltages will shut the pedal down and require return to ThorpyFx HQ for repair. This will not be covered under warranty.

SPECIFICATIONS:

Size: (W)65mm x(L)125mm x(H)53mm (top of Knobs)

Current Draw: 44mA

True Bypass? Yes

COMPONENTS: To ensure consistency, reliability, low noise and tonal supremacy the HANAMI is made with extremely high quality components. 1% metalfilm resistors, WIMA and Panasonic capacitors where possible and robust through hole plated PCB'S. In short, all of this means you won't have to worry about your pedal, and it should give you many years of inspiring tonal bliss.

WARRANTY: The HANAMI is guaranteed for 2 years against manufacturing faults or defects. This guarantee is applicable to the original owner and is not transferable.

LEGAL: In the unlikely event of a failure ThorpyFx Ltd will not be held responsible or compensate for any loss of earnings or any other losses incurred by failure of this equipment. The use of this equipment is at the owners' own risk.
