

JUDGE DREDD LAWBRINGER

LIMITED EDITION OVERDRIVE PEDAL

JUDGE DREDD LAWBRINGER

LIMITED EDITION OVERDRIVE PEDAL

The Judge Dredd Lawbringer is a limited edition overdrive pedal released in collaboration with the Galaxy's Greatest IP, 2000 AD, and ThorpyFX. It is based on the GUNSHOT MKIIB but with custom laser etching and exclusive Judge Dredd graphics from classic 2000 AD artists - this is destined to become a collector's edition. Drok!

OVERVIEW:

The LAWBRINGER was designed to be the overdrive to beat all others. Sonically most overdrives can sound thin or lack a certain "something" when compared to a real valve amplifier. It's an unfair comparison really, but it is possible to solve this problem. This is where the LAWBRINGER comes in, at the heart of the pedal is a proprietary cascading "gain engine" tuned to deliver maximum tonality for as wide a range of amps as possible. Through tweaking the pedals controls to taste you can achieve overdrive flavours from subtle through to searing, think slightly hairy blues to hard rock. The tones produced are addictive and inspiring in equal measure. This is the law.

Aside from achieving fantastic sonic credentials the LAWBRINGER is built like a Manta Prowl Tank with physical features such as recessed knobs and top mounted jacks. Robust build does not have to come at the sacrifice of looks, the LAWBRINGER uses a combination of a beautiful black, anodised aluminium laser etched centre console wrapped in a custom UV printed tough baseplate. Stomm!

CONTROLS:

FOOTSWITCH: ON/OFF True Bypass.

VOLUME: Use this control to balance the output of the pedal. Unity (where the volume out matches the volume in) is roughly at the 11 o'clock position. There is enough scope in this control to adjust the pedal's output to "juice" the front end of your amplifier.

STONE: This control sweeps between a bass heavy signal (full counterclockwise) to a treble heavy signal (full clockwise). The sweet spot for most amps and guitars will hover between 11 and 2 o'clock. Feel free to experiment though, citizen.

GAIN: This control allows you to adjust the pedals character from a smooth clear overdrive through to a more saturated overdrive.

CALIBRE: This control adds girth and thickness to the overdrive character. Dialed all the way off the overdrive is clear and clean. As you rotate the calibre control clockwise the overdrive adopts a more complex harmonic response similar to the way a good tube amplifier responds. For every amplifier and guitar combination there is a sweet spot to be achieved where the drive seems fluid, complex and harmonically rich. This control will make a whooshing noise when turned; it is designed to do so and is not a fault.

POWER:

The LAWBRINGER is designed to be powered by a 9V DC centre-negative 2.1mm power supply. Do not attempt to use this pedal with other voltages or polarities. We have power protection circuitry in our pedals and use of any other voltages will shut the pedal down and require return to ThorpyFx HQ for repair. This will not be covered under warranty. Justice has a price.

SPECIFICATIONS:

Size: (W)65mm x(L)125mm x(H)53mm (top of Knobs)

Current Draw: 25mA

True Bypass? Yes

COMPONENTS:

To ensure consistency, reliability and tonal supremacy the LAWBRINGER is made with extremely high-quality components. 1% metalfilm resistors, WIMA and Panasonic capacitors and robust through hole plated PCB'S. In short, all of this means you won't have to worry about your pedal and it should give you many years of inspiring tonal bliss.

WARRANTY:

The LAWBRINGER overdrive is guaranteed for 2 years against manufacturing faults or defects. This guarantee is applicable to the original owner and is not transferable.

LEGAL:

In the unlikely event of a failure ThorpyFx Ltd will not be held responsible or compensate for any loss of earnings or any other losses incurred by failure of this equipment. The use of this equipment is at the owners' own risk.

Safety Instructions:

Intended use:

This device is intended for use as effects pedal for sound processing of audio signals from musical instruments with electromagnetic pickups. Any other use or use under other operating conditions is deemed improper and may result in injury or product damage. No liability will be taken for harms resulting from improper use.

Safety:

DANGER!

Risk of injury and choking hazard for children! Children can suffocate on packaging material and small parts. Never allow children to play with packaging material or the device. Always store packaging material out of the reach of babies and small children. Always dispose of packaging material properly when it is not in use. Never allow children to use the device without supervision. Keep small parts away from children and make sure that the device does not shed any small parts (such as knobs, rubber feet) that children could play with.

WARNING!

Possible hearing damage due to high volumes on speakers, headphones, bass & guitar amplifiers! With loudspeakers or headphones connected, the device can produce volume levels that may cause temporary or permanent hearing impairment. Over an extended period, even levels that seem to be uncritical can cause hearing damage. Do not operate the device permanently at a high-volume level.

Decrease the volume level immediately if you experience ringing in your ears or hearing impairment and seek medical advice.

NOTICE!

Damage to device if powered incorrectly!
This product is designed to be powered from a 9VDC, >200mA power supply with 2.1mm centre-negative barrel connector. Use of an incorrectly rated power supply could result in damage to the pedal and the power supply.

Environmental information

The crossed out wheely bin symbol indicates this product is classified as Waste Electrical and Electronic Equipment (WEEE) in the European Union and should not be discarded with household waste. Other territories may vary. Contact your local authority or THORPYFX for more information.

The packing materials for this product are recyclable. Do not dispose of these materials with your normal household waste. Please refer to the symbols on the packaging for recycling information. Contact your local authority for further guidance on recycle in your region.

Directives & regulations

This product complies with Electromagnetic Compatibility (EMC) directive 2014/30/EU.

THORPYFX has conformed where applicable to European Union's Directive 2011/65/EU on Restrictions of Hazardous Substances (RoHS) as well as the following sections of California law which refer to RoHS, namely sections 25214.10, 25214.10.2, and 58012, Health and Safety Code; Section 42475.2, Public Resources Code.

This product complied with the regulations required to hold the UKCA mark
