

Superior Fidelity Tone Machines

Congratulations on your purchase of THE FIELD MARSHAL. To cut a long story short, this is the MKII version of the legendary BIG CHEESE FUZZ pedal. THE FIELD MARSHAL is designed to provide you with a supremely nasty footswitchable fuzz pedal that evokes the sounds of everything from a smooth fuzz through to a nasty spitty broken speaker style of fuzz.

OVERVIEW: THE FIELD MARSHAL is a reimagining of the Lovetone™ BIG CHEESE circuit, a boutique fuzz pedal creation originally designed in the early 00's. This new version expands on that legacy and deliver more volume, lower noise, more flexibility all in a much smaller pedalboard friendly footprint.

VOLUME: Use this control to increase the volume output of the pedal.

FUZZ: This control is used to increase the level of FUZZ available, everything from lighter fuzz through to searing fuzz is available here.

TONE: This control allows you control over the treble and bass response of the pedal. Counterclockwise yields smoother sounds whilst clockwise yields brighter sounds. This control is very interactive with the mode switch and CHEESE footswitch.

BALANCE: This control adjusts the volume attributed to the cheese footswitch when engaged. Everything from an attenuated sound through to a massive volume boost for solos is available.

MODE SWITCH: This is a mode switch and allows you to choose between gated fuzz, mid scoop and mid boost fuzz settings. When the cheese switch is engaged this switch is overridden and has no impact on the sound.

LEFT FOOTSWITCH: This turns the FIELD MARSHAL on/off.

RIGHT FOOTSWITCH: This "CHEESE" control bypasses the tonestack entirely for a different tonal response, turning the gating off and giving you a level boost depending on where you set the balance control. When this is switched in the tone control and mode switch DO NOTHING.

POWER: THE FIELD MARSHAL is designed to work at voltages of 9V DC. This should be from a quality center negative power supply such as the Gigrig Generator or Voodoo Lab Pedalpower Plus 2. Do not attempt to use this pedal with other voltages or polarities.

COMPONENTS: To ensure consistency, reliability, low noise and tonal supremacy the FIELD MARSHAL is made with extremely high quality components. 1% metalfilm resistors, WIMA and Panasonic capacitors where possible and robust through hole plated PCB'S. In short, all of this means you won't have to worry about your pedal and it should give you many years of inspiring tonal bliss.

WARRANTY: THE FIELD MARSHAL is guaranteed for 2 years against manufacturing faults or defects. This guarantee is applicable to the original owner and is not transferable.

LEGAL: In the unlikely event of a failure ThorpyFx Ltd will not be held responsible or compensate for any loss of earnings or any other losses incurred by failure of this equipment. The use of this equipment is at the owners' own risk.
