hey!

I'm Galaxy Brain Design!

Feel free to call me Bridget (she/her), but I know how it is when you just know someone's handle from IG.

I've been making art since I was just a babe-in-snapback (fig. 1), but over the last five years, Galaxy Brain Design has built name recognition and a loyal following in the DC + Baltimore areas, and beyond. Lately, I tell people that Galaxy Brain Designs is

art + gifts for people that love big feelings + little mysteries

of course we have **big feelings** about things like queerness, mental health, and — idk — what it means to be a good person in a broken society? but we cope like Dana Scully, digging into **little mysteries** like cryptids, ghosts, and the insane fish that live in the deepest parts of the ocean.

Our best-selling products lines include:

- Shy Guys — american cryptids (p 20-22),
- Fruit Juice — colorful feminist art (p 9),
- Retro Reminders — dreamy pastel agitprop (p 16-17),
- Smartphone Bumper Stickers— because people see your phone way more than they see your car (p 4-5).

I'm so grateful to you for taking a look at our stuff + supporting a queer-, woman-owned small business.

Hope to hear from you soon!
