

“Exciting news! Used one of the samples of **SILVET SHAMPOO** on a dog with resistant yeast and it **CLEARED** right up!!! He had been on three other therapies that **DID NOT** work!! The owner also reported that he liked how well the shampoo lathered up.”

*~ Dr. Selene Jones, Resident of Dermatology
Michigan State School of Veterinary Medicine September 21, 2019*

“So unbelievably happy with the **SILVET SPRAY**! It’s been a huge game changer for Zulu, my dog, who has/had a lick granuloma on his hock/ankle area. As a Veterinary Surgeon, I have also successfully used the **SILVET SPRAY** and **STEM GEL** on chronic, non-healing wounds in patients with underlying diseases. It’s a great way to give owners a way to help their pets at home in between re-checks with me at the hospital. I am a big fan and a believer in **SILVET SPRAY** and **NEXDERMA**. Thank you!”

~ Dr. Rebecca Csomos VMD, Phd LSU Veterinary Teaching Hospital

“I find the **SILVET WIPES** and **SILVET SPRAY** help with inflammation and the secondary skin infections that we see so often with allergies. We have had very positive feedback from our clients and will continue to prescribe the **NEXDERMA** products.”

~ The Staff at Holistic Veterinary Care in Ft. Wright, KY

“We’ve been using **SILVET SPRAY** and **STEM GEL** at Huntington Animal Hospital for many months now with excellent results. Hot spots and difficult skin conditions have been healing beautifully with these medications. They have become a necessary part of our pharmacy.”

Huntington Animal Hospital, Long Island, New York*

“We have used the ear product, **SILVET OTIC**, on several canine ear cases and have had exemplary performance on both bacterial and yeast infections. I highly recommend the **SILVET OTIC** for its broad spectrum properties.”

*~ Dr. Wendi Odesky
Village Veterinary Hospital, Waterville, OH*

“I felt for the two weeks of treatment of a ceruminous cocci otitis, after an ear endoscopic cleaning and treatment of a chronic stenotic bilateral ear problem, I used synotic and **SILVET ADVANCED OTIC** in an alternating fashion. **SILVET ADVANCED OTIC** held its own, preventing further recurrence of the staph infection. It’s an ongoing chronic treatment of two severe ear problems on the same Cocker Spaniel.”

*~ Dr. Brent Pettigrew
Fountain City Animal Hospital, Bryan, OH*

“We have used **SILVET OTIC** primarily as a maintenance treatment for chronic otitis externa. The results have been nothing short of impressive! Much better than any other product we have tried thus far.”

“Thank you for the sample of shampoo you left me a few weeks back. I wanted to provide some feedback on the **SILVET MINT SHAMPOO**. My dog Kodi, who is a Springer Spaniel, has horrible skin dermatitis. You stopped in back in January, I believe, and I discussed with you how his skin was red and irritated and had dry flakey spots. Since we started using the shampoo (which also smells amazing), his skin has cleared up significantly! Just wanted to give you a little feedback and say thank you again! Have a Great Day!”

On Friday, I just happened to pass by the **NEXDERMA** booth on my way to get some Zymox for my dog's chronic ear infections. A nice woman stopped me and we chatted for awhile. After explaining that the number one problem I see is dogs with chronic ear infections, she gave me a sample of their **SILVET ADVANCED OTIC EAR CLEANSER**. When I got home, I immediately put some in my dog's ears. I have continued to do it daily, as I did with the Zymox, to try and control the infections. When I tell you this is a miracle product, I mean it! It's only been three days treating my boy with their ear cleanser and I already notice an extreme positive difference. I have tried so many different cleansers over the years and being 100% honest and genuine when I tell you that this stuff works! If you see their booth, please stop by and pick some up for yourself. I promise, you won't be disappointed.

“I purchased the spray with cortisone and the ear solution at the AKC show in Orlando last week after talking to the sales person. My terrier has terrible yeast infection of her ear canal and arm pits. It was costing \$300+ a month for vet treatment. The vet felt she was so bad she would need an ear canal ablation. I started her on both on 12-19 and am already seeing remarkable improvement! She doesn't smell like yeast, isn't digging at her ear and the armpit area looks improved already. This is amazing! If she continues to show this type of improvement we may be able to avoid costly and painful surgery. Her quality of life is already better after just a few days. Your product is worth every penny!

I can't believe the difference in just a few days. My dog would scratch and dig at her ears and cry. I haven't seen her doing any digging and she doesn't cry when I put the solution in her ears. I can't thank you enough for helping her. She is almost 8 and has been suffering for over a year now.

I have no doubt that it is what you recommend that is making the difference. There aren't enough thank you's I can give”.

Charlotte & Sadie, AKC Royal Canin, December 2023

AS FOR THE SILVET WITH HC; I HAD A NEW CLIENT WITH A BICHON THAT HAD CHEWED ALL THE HAIR OFF THE LATERAL THIGH. THE HAIR WAS GONE OR MATTED ALONG THE EDGES AND STUCK TOGETHER. I DID NOT HAVE A TECH TO ASSIST ME AND KNEW IT WOULD BE PAINFUL TO THE DOG TO SHAVE THAT DAY. I GAVE HIM THE SILVET WITH HC AND GAVE A CYTOPOINT INJECTION FOR THE SEVERE PRURITIS. HE DROPPED OFF THE VERY NEXT DAY FOR US TO ANESTHETIZE AND CLEAN UP. THE THIGH WAS A LIGHT BROWN COLOR RATHER THAN THE RED RAW AND SO MUCH BETTER. THE CLIENT, THE DOG & I WERE THRILLED. HE LOOKED LIKE A NEW DOG ONCE WE SHAVED AND USED CHLORHEXIDINE SOLUTION TO CLEAN UP. A CHANGE OF FOOD WAS NECESSARY TO ELIMINATE ANY FURTHER ITCHING ONCE THE AREA HEALED. THANKS FOR A WONDERFUL PRODUCT.

I USED THE SILVET SPRAY TO ASSIST ME WHEN I HAD SHINGLES. IT HELPED WITH THE BLISTERS, THE BURNING AND THE ITCHING. THANKS FROM ME AS WELL.
