

Crescent has the most choices for your foam board solutions

FOME-COR®

White Fome-Cor® - Now available in 1/2" thickness

Laminated on both sides with clay-coated papers, providing a smooth surface and clean cuts. Ideal for all types of mounting as well as die-cutting and embossing.

Acid-Free Fome-Cor®

The ideal choice for conservation mounting application. The face papers are lignin-free, ground wood or rosin sizing and are laminated to an inert, extruded polystyrene foam center. The pH value is 7.5- 9.5 and the paper are buffered with a 3-5% alkaline reserve.

Heat-Activated Fome-Cor®

Time-saving mount board that can be used in a mechanical or vacuum dry-mount press. Clay-coated liner paper is laminated to an extruded polystyrene center. The board is coated on one side with an adhesive that activates quickly at low temperatures (approximately 165° - 170°F).

Black-Centered Fome-Cor® - Now available in 1/2" thickness

Ideal for mounting photographs, prints, presentations and other materials. The crisp black core is laminated between high-quality uncoated black papers.

Gatorfoam®

A smooth surface lightweight board created by bonding super hard polystyrene foam between two layers of Luxcell, a wood-fiber veneer laminate. White Gatorfoam® has white facers with a white foam center. Black Gatorfoam® has black facers with a black foam center. The most popular is the 3/16" thick board.

notFOAM® is a lightweight, 3/16" thick, mounting and art board that features two buffered, acid-free, smooth white paper surfaces over a natural kraft corrugation core. It is better than Foam Board because it is recyclable, renewable, compostable, and sustainable. notFOAM® accepts markers, tempera paints and acrylic paints.

- More rigid than poster board
- Small/tight fluting for smooth (mounting) surface
- Eco friendly! No Prop 65 warning required

Perfect Mount® is a self-adhesive mounting board that allow for easy positioning and repositioning until a permanent bond is activated by firm pressure.

- Available on standard cream, solid black or foam board
- Acid-free adhesive and buffered - pH neutral surfaces
- Ideal for mounting poster, inexpensive prints, photographs and other art and craft project

	Item Number	Item Description				
		Board Size	Thickness	Type	Boards/Carton	Product Composition
