S.D.C. SEQUENTIAL DENSITY CONSTRUCTION

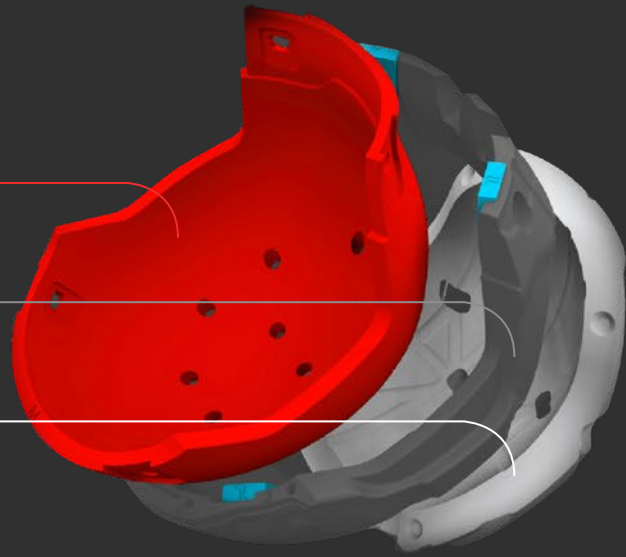

J22 J22F

The J22 is the most advanced Motocross helmet we have ever produced. At the core of this innovative design is our S.D.C. Sequential Density Construction system, developed to manage both linear and rotational energy in the event of a crash. The three unique layers of EPS and EPP work together in harmony to manage low, medium, and high energy impacts as well as rotational forces from impacts of any angle.

INNER SHELL : EPP

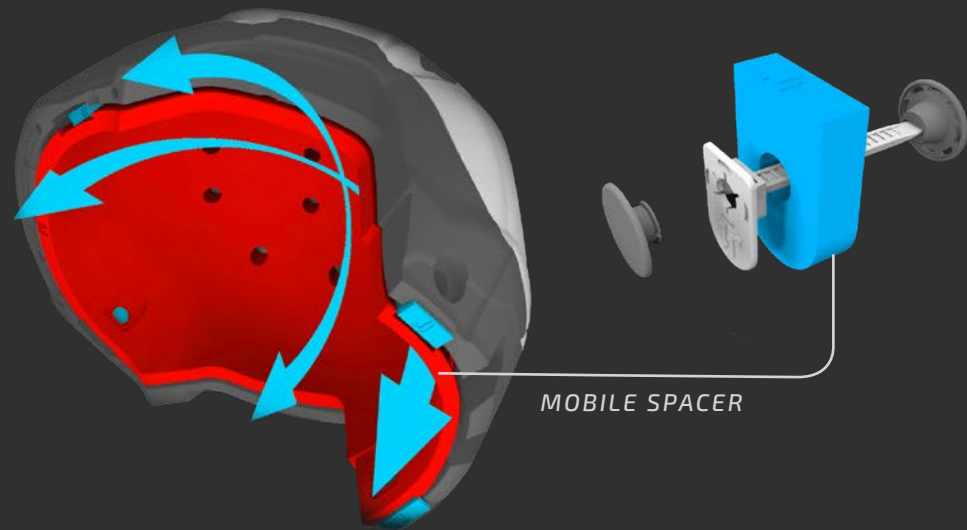

OUTER RING :
HIGH DENSITY EPS

TOP :
LOW DENSITY EPS

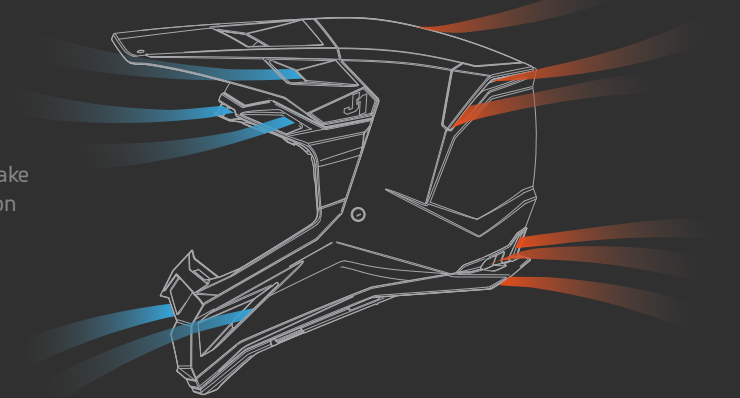

ROTATIONAL ENERGY
MANAGEMENT

MOBILE SPACERS :
ALLOW INDEPENDENT MOVEMENT
BETWEEN THE INNER EPP AND EPS
LAYERS TO REDUCE ROTATIONAL
ENERGY FORCE TRANSFER FROM
ANGULAR IMPACTS.

HELMET AREODYNAMICS & VENTILATION SYSTEM

Keeping your cool is essential to your performance. The J22 is designed to draw cooler air in through oversized intake ports on the forehead and chin which then expels the warm air out the rear exhaust vents. This advanced ventilation system provides maximum airflow to the riders head during the warmest of race conditions.

E.R.C. SYSTEM SAFETY TECHNOLOGY EMERGENCY REMOVABLE CHINBAR SYSTEM

Rapid response, in case of an accident is an essential factor in minimizing injury to a downed rider. The E.R.C. Emergency Removable Chinbar system, is designed to aid in the safe removal of the helmet from a riders head by detaching the EPS chinbar and cheek pads as one unit. Once removed, it provides ample access and less restriction when removing the helmet from the injured rider.

1- PULL THE RED BUTTON INSIDE THE CHINGUARD

2 - PULL DOWN AND FORWARD THE FRONT PART OF THE EVA CHINBAR

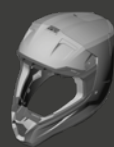

3 - PULL DOWN AND FORWARD THE BACK PART OF THE EVA CHINBAR

J40

- TECH FEATURES**
- LIGHT WEIGHT THERMOPLASTIC RESIN SHELL
 - EMERGENCY REMOVABLE CHEEK PADS

NERVE

We are limited not by our abilities but by our vision.
 The Nerve goggle gives you the opportunity to break down these limits,
 Experience definition and subtlety never before viewed through the lens of a goggle.
 The Nerve's design focuses primarily on maximizing the rider's field of vision with the pre-curved injection moulded 2mm ULTRA HD lens.
 Industry leading features with a dual-material frame construction and a Quick-release lens system that doubles as a locking mechanism for lens removal/replacement.
 Just 1 Nerve goggle, the product of extensive collaboration and testing with JUST1 riders and rightly takes its place as JUST1's new top-of-the-line goggle.

JBX-R

The all new Just1 Racing JBX-R Motocross Boots are a culmination of professional rider input and pure innovation and design. The JBX-R offers premium performance right out of the box. Built to exceed the demands of todays riders, bikes, and grueling conditions. Enhance your performance with confidence on the track or trail with incredible feel, control and protection the JBX-R Boots provide.

- Features**
- Performance Double pivot motion control system for improved levels of flexibility and precision touch
 - Microfiber synthetic leather upper combined with Impact and abrasion-resistant PU Shell
 - Innovative YF-System provides both energy dampening and impact absorption with a full or custom foot movement range of 15 degrees, 25 degrees or free
 - Improved levels of contact grip and control through PU and rubber inner ankle and calf panels that provide exceptional heat resistance
 - Contoured sole for improved grip and feel
 - Replaceable central sole insert
 - 3 buckle closure system for security, durability and strength
 - PU protection and shock absorbing padding on heel and ankle
 - Removable dual compound footbed
 - Soft microfiber gaiter seals out water and dirt
 - CE certified

YF-SYSTEM

The JBX-R boot is designed to perform at the highest levels of today’s motocross and off-road racers, mainly standing on the front plantar area. The main body of the boot uses a PU structure along with Nylon reinforcements in the heel and ankle area. The inner sole and bed also utilize the same technology and construction to ensure the most extreme forces are dealt with, while ensuring maximum comfort. The lower part of the boot is connected with a PU tibia cuff and connected to our ground breaking YF system on the back of the boot, this system ensures excellent lateral support by counteracting direct impacts along with, hyperextension and hyperflexion of mimicking the natural movement of the ankle. The Just1 YF-System provides unrivalled levels of energy and impact dispersion while providing the ability to customize the rang movement of the calcaneal tendon, by adjusting the levels of flexion from 25 degrees to completely free. Out of the box the JBX-R boot is set up using the 25 degree lock. Changing to either the 15 degree lockout or neutral position is an easy process that only requires removing two fixing screws and inserting the desired level of flexion; alternatively, you can locks and use the boot in the neutral position. The YF system is based on an inverted Y shaped rod, constructed of ballistic nylon, which creates the right balance rigidity for the stresses of modern off-road riding. Secure closure is achieved through a soft touch 3 buckle system allowing a greater level of flexibility and ease of removal.

S.D.C. SEQUENTIAL DENSITY CONSTRUCTION

The J22 is the most advanced Motocross helmet we have ever produced. At the core of this innovative design is our S.D.C. Sequential Density Construction system, developed to manage both linear and rotational energy in the event of a crash. The three unique layers of EPS and EPP work together in harmony to manage low, medium, and high energy impacts as well as rotational forces from impacts of any angle.

INNER SHELL : EPP

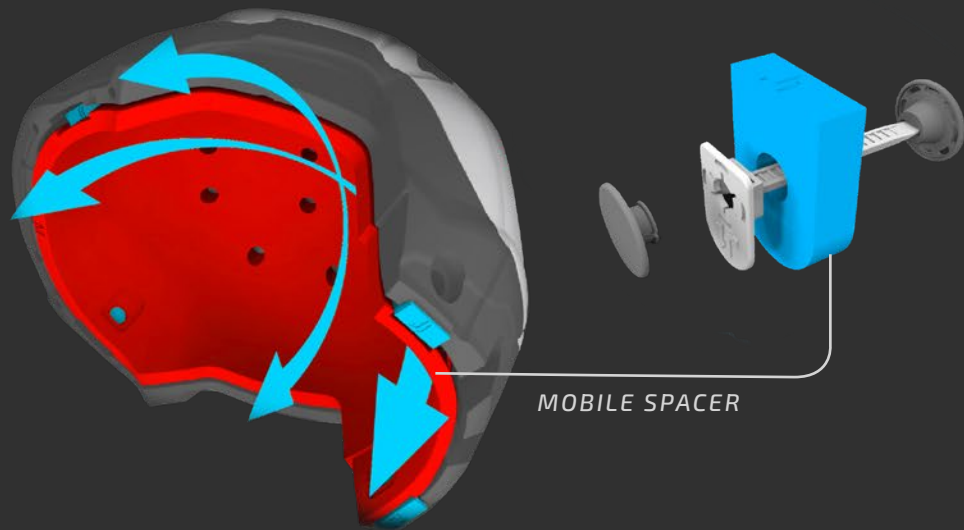

OUTER RING :
HIGH DENSITY EPS

TOP :
LOW DENSITY EPS

ROTATIONAL ENERGY MANAGEMENT

MOBILE SPACERS :
ALLOW INDEPENDENT MOVEMENT
BETWEEN THE INNER EPP AND EPS
LAYERS TO REDUCE ROTATIONAL
ENERGY FORCE TRANSFER FROM
ANGULAR IMPACTS.

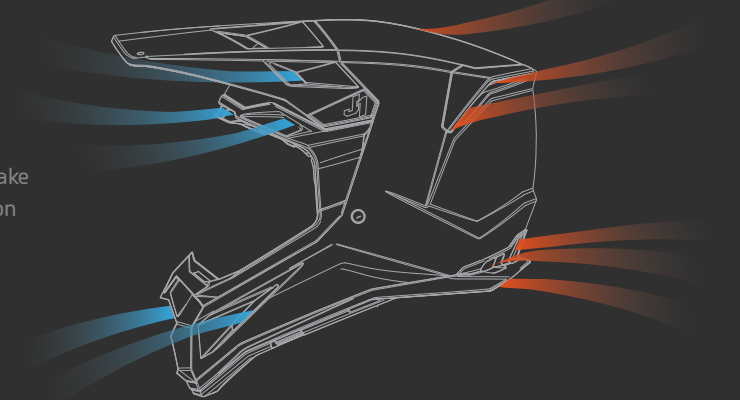

J22 YOUTH

HELMET AREODYNAMICS & VENTILATION SYSTEM

Keeping your cool is essential to your performance. The J22 is designed to draw cooler air in through oversized intake ports on the forehead and chin which then expels the warm air out the rear exhaust vents. This advanced ventilation system provides maximum airflow to the riders head during the warmest of race conditions.

SAFETY TECHNOLOGY EMERGENCY REMOVABLE CHINBAR SYSTEM

Rapid response, in case of an accident is an essential factor in minimizing injury to a downed rider.

The E.R.C. Emergency Removable Chinbar system, is designed to aid in the safe removal of the helmet from a riders head by detaching the EPS chinbar and cheek pads as one unit. Once removed, it provides ample access and less restriction when removing the helmet from the injured rider.

1- PULL THE RED BUTTON INSIDE THE CHINGUARD

2 - PULL DOWN AND FORWARD THE FRONT PART OF THE EVA CHINBAR

3 - PULL DOWN AND FORWARD THE BACK PART OF THE EVA CHINBAR

S.D.C. SEQUENTIAL DENSITY CONSTRUCTION

The J-GPR is one of the most advanced Road Racing helmets ever made. The J-GPR is designed to manage linear and rotational energy to the head during impacts with a 3K Carbon shell and through its S.D.C. Sequential Density Construction system. The three unique layers of EPS and EPP work together in harmony to manage low, medium, and high energy impacts as well as rotational forces from any angle. FIM, ECE, and DOT homologated, The J-GPR is quickly setting a new level for rider protection on-road and within racing. Riders today need a helmet that provides pro level protection, and the J-GPR delivers.

MOBILE SPACER

HELMET AREODYNAMICS & VENTILATION SYSTEM

Ventilation is essential to performance.

In order to achieve the highest level of performance, we have spent countless hours performing aerodynamic tests at the wind tunnel lab in parallel with live testing sessions at the track. Massive Mouth, forehead, and top vents channel cool air across the riders head as warm air is exhausted out the rear in a venturi effect. Allowing for a cooler ride in even warm weather conditions. The J-GPR helmet rear spoiler is designed to flow perfectly with the riders suit hump to maximize the aerodynamics on the bike.
