## Green Renter: Inside the Kheel Plan, A Revolutionary Proposal for Reduced Congestion and Free Mass Transit in NYC. With Charlie Komanoff.

March 10, 2008  
7:00 pm to 8:30 pm

By now nearly everyone has formed an opinion about the Mayor's recent congestion pricing plan. While the plan, which is just weeks away from probable approval in the State Legislature, has generated much commentary and controversy during the last year, an even bolder policy approach to NYC's transportation and congestion woes was recently proposed by the legendary advocate and mediator Ted Kheel: 100% free mass transit!

Join Gotham's renowned green quantifier-advocate and Green Renter veteran, Charles Komanoff, for a discussion of the vision, analysis and politics behind Kheel's revolutionary free-transit plan for NYC.
