Urban Transport 2008
Fourteenth International Conference on Urban Transport and the Environment in the 21st Century
December 9-12, 2008
Accademia di Mazzini
Rome, Italy

Post Conference Report

Overview
Thursday’s Conference on Urban Transport and the Environment in the 21st Century has been a unique event in the history of the field, attended by some of the leading experts from around the world and is a unique meeting point for all those interested in urban transport and the environment. The event has been organized in collaboration with the Ministry of Infrastructure, Transport and Communications of Italy.

The organizers of the conference had received a large number of papers from all over the world and are now in the process of selecting those papers to be presented and discussed at the conference. The papers will cover a wide range of topics including transportation systems, urban planning, and environmental sustainability.

Opening Session
The opening session was attended by the representatives of the Ministry of Infrastructure, Transport and Communications of Italy. Mr. Simone Gerbi, who delivered the welcoming address, stressed the importance of public transport in Italy. The government of Italy has successfully implemented a number of urban transport projects in recent years, including the construction of the new Milan underground, the renovation of public transport infrastructure and the development of new bus and rail transport systems.

In order to bring these topics to the forefront, the government has adopted a policy of developing and promoting urban transport projects. These projects include the development of new bus and rail transport systems, the construction of new roads and highways, and the development of new transport infrastructure.

The government of Italy has also been working on developing a new transport policy that will be introduced in the next few years. This policy will include measures to improve the efficiency and sustainability of the transport system.

Mr. Simone Gerbi, the Minister for Infrastructure, Transport and Communications of Italy, welcomed the participants and emphasized the importance of public transport for the development of sustainable cities.

Keynote Address
The keynote address was delivered by Prof. Roberto Cavalli, the Director of the National Research Council of Italy. Prof. Cavalli stressed the importance of public transport in Italy and the need for the government to continue to invest in the development of sustainable transport systems. He also highlighted the importance of public transport in reducing greenhouse gas emissions and improving the quality of life in cities.

The speakers participating in the conference included a number of experts, including:

- Mr. Antonio Cossu, the Director of the Italian National Research Council
- Mr. Giuseppe Muscarella, the Director of the Italian National Research Council
- Mr. Stefano Marchetti, the Director of the Italian National Research Council
- Mr. Luigi Busetto, the Director of the Italian National Research Council
- Mr. Paolo Villani, the Director of the Italian National Research Council
- Mr. Andrea De Santis, the Director of the Italian National Research Council

The keynote address was followed by a series of presentations on the latest developments in urban transport and the environment.

- Prof. Roberto Cavalli, the Director of the National Research Council of Italy, delivered a keynote address on the importance of public transport in Italy and the need for the government to continue to invest in the development of sustainable transport systems.
