The story of Barr Hill begins with a distiller and a beekeeper working together in one of the most beautiful, agricultural places on Earth, Northern Vermont. Ryan and Todd perfected the use of raw honey in their distillery, capturing the coniferous character of a honey bee foraged into their spirits. The honey would always be kept raw to retain the character of the land that inspired them.

Tom Cat Gin is an expedition in search of a bolder expression. The robust character of the new American oak barrel mingles with the coniferous quality of the juniper, yielding an enticing aroma. A touch of raw honey leaves this revolutionary spirit remarkably approachable, whether drinking neat or in a cocktail.

ABOUT TOM CAT

Tom Cat Gin is an expedition into uncharted territories. Once distilled, we age the gin for 6-9 months in new American oak barrels in search of a bolder expression. The robust character of the new oak barrel mingles with the coniferous quality of the juniper, yielding an enticing aroma. A touch of raw honey leaves this revolutionary spirit remarkably approachable, whether drinking neat or in a cocktail.
When the world called for whiskey, we answered resolutely with gin.
