Design, Innovation, and Circularity.

The Innovation Lounges Marketplace is revolutionizing the hospitality, maritime, and tourism industries by offering a unique platform for designers, developers, executive level buyers, and purchasing decision-makers to showcase their products and services. This bold and visionary initiative is redefining the boundaries of traditional marketplaces by providing a collaborative

environment where participants can network, share craftsmanship, and promote their brand-specific identity in their projects. The platform offers a dynamic partnership and showroom(s) that provide unparalleled opportunities to expand reach into new markets and customer bases. Businesses can expand their network, creating new opportunities.

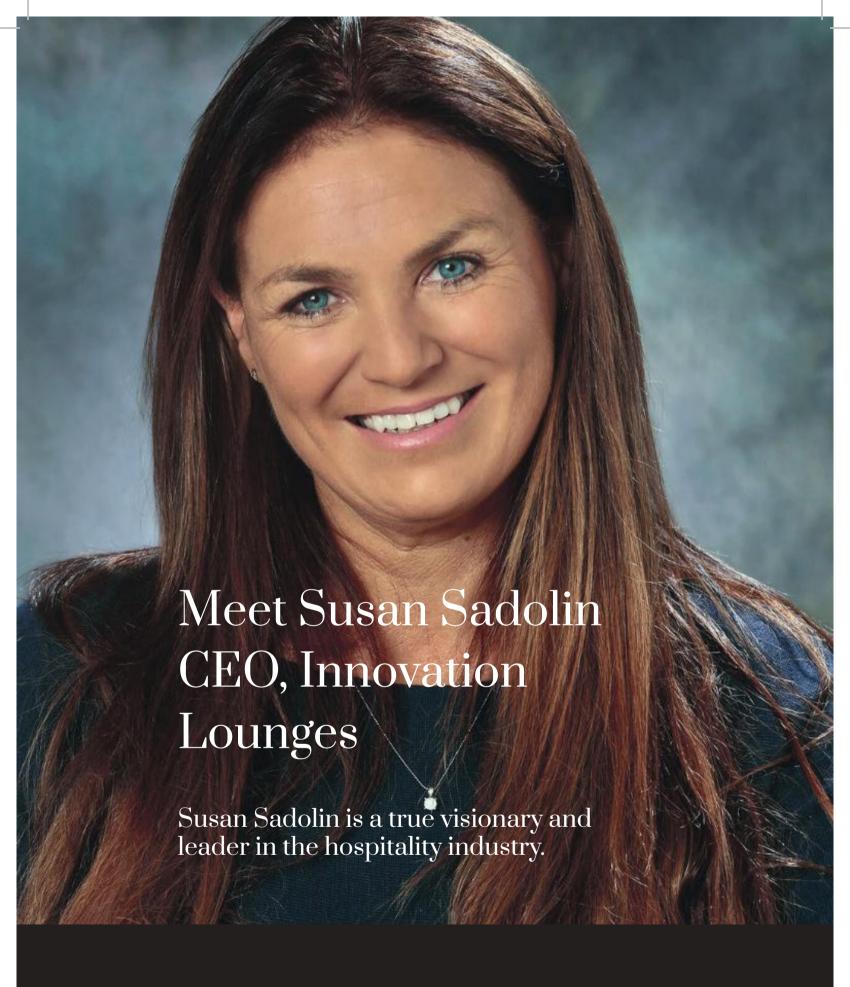

ILM Forum

OCTOBER 30 - NOVEMBER 02, 2023

As the hospitality industry continues to evolve, Innovation Lounges is organizing a premier event that promises to be a game-changer for the tourism industry. This exclusive event is designed to provide discerning professionals with the very best in professional development, networking, and industry insights. Suppliers and delegates have an opportunity to engage with influential figures and thought leaders in the

tourism and hospitality sector, gain valuable perspectives and expertise on sustainable practices, and augment their competitive edge in their respective fields. Attendance at this event is tightly restricted to a handpicked group of participants fostering an exclusive environment. From the stunning 5-star cruise ship to the catering, every detail has been thoughtfully considered.

The CEO Behind a Unic Purchasing Pl

INNOVATION LOUNGES MARKETPLACE

As the CEO of Innovation Lounges
Marketplace and Shores Global, a leading
luxury furniture brand, Susan brings a
wealth of expertise and experience to the
hospitality industry. Innovation Lounges

Marine Life

It is well documented that pollution, particularly plastic pollution, has a devastating impact on marine life, causing entanglement, ingestion, and suffocation, which can lead to injury, illness, and death. Plastic pollution can harm a wide range of marine organisms, including sea turtles, fish, birds, and marine mammals. The Innovation Lounges Ocean chair is made from 100% recycled ocean debris, including fishing nets removed from the ocean, to promote environmental sustainability and raise awareness.

This devastating impact of marine debris on our planet is causing an estimated 100,000 marine mammal deaths and over 1 million seabird deaths annually. Innovation Lounges aims to support the environment and inspire greater awareness and action towards protecting our oceans and marine life, coordinating solutions towards engaging in material recycling, developing strategies to reduce waste effectively, and adopting a 10 to 20-year plan to further advance their commitment to sustainability.

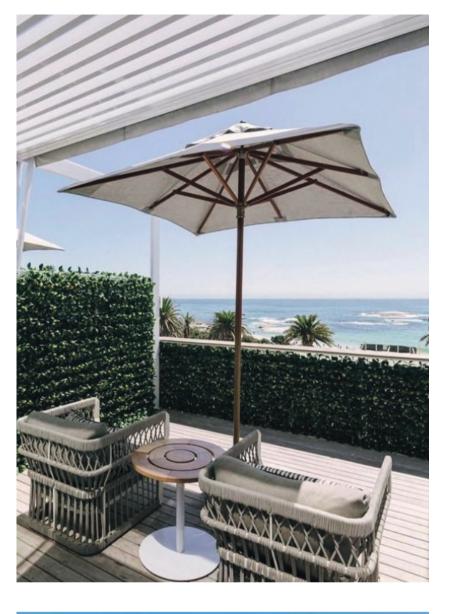

BANG OLUFSEN

Bang & Olufsen is a high-end Danish consumer electronics company founded in 1925 by Peter Bang and Svend Olufsen. The company is well-known for its distinctive and elegant designs, as well as its focus on quality and innovation in audio and visual products.

B&O's product lineup includes televisions, sound systems, loudspeakers, headphones, and other consumer electronics, all of which are designed with a blend of artistry, craftsmanship, and cuttingedge technology.

Bang & Olufsen's Beosound Level speaker has achieved the Cradle to Cradle certification, becoming the first consumer electronics company to do so. This certification aims to promote sustainable development and circular change by introducing a replaceable, customizable, and upgradeable approach to products. The Beosound Level was built with product circularity in mind, with critical components being serviceable and a replaceable streaming module.

CAPE UMBRELLAS

For over two decades, Cape Umbrellas has been the premier provider of top-notch, customizable umbrellas to renowned brands worldwide

Catering to the domestic and international hospitality sector, including restaurants and hotels, these distinct, resilient, and superior umbrellas have made a lasting impression.

Boasting extensive expertise in design and branding, Cape Umbrellas has established itself as an industry frontrunner, consistently raising the bar to deliver exceptional, safe, and competitively priced patio umbrellas for all clientele.

Equipped with a cutting-edge, selfsufficient automatic lift system, their umbrellas promise effortless and secure operation for users. This ingenious system and design has garnered global patents, showcasing its potential to revolutionize a multitude of industries.

Ontinental

CONTINENTAL

Founded in 1871, the technology company Continental has long been dedicated not only to the development of safe, efficient and intelligent mobility solutions, but is also a leading manufacturer of high-quality surface materials. In the interior living sector, the focus is on the development of high-tech upholstery materials and high-quality furniture foils that harmoniously combine design and function and also set an example in terms of sustainability.

For this reason, natural and renewable raw materials are primarily used in the development of the innovative skai artificial leather products. The best example of this is skai Evida Fiber. Ninety percent of the components used in the high-quality upholstery fabric, which bears the Oeko-Tex seal in accordance with Oeko-Tex Standard 100, are made from natural and renewable raw materials sourced both locally and from across the EU.

DAUERFLORA

Dauerflora specializes in customized interior landscaping concepts including the implementation of decoration by an experienced team. Working with live, artificial and preserved plants, Dauerflora put a strong focus on sustainability.

Preserved, live and dried plants offer the advantage that at the end of their life cycle they can simply be composted. Before that, they are decorations which are in every way in line with the current trend.

At Dauerflora, their guidelines are the comprehensive definition of the UN which includes aspects like health, poverty prevention, gender equality, clean energy, fair labor practices and reduction of inequality as sustainability goals.

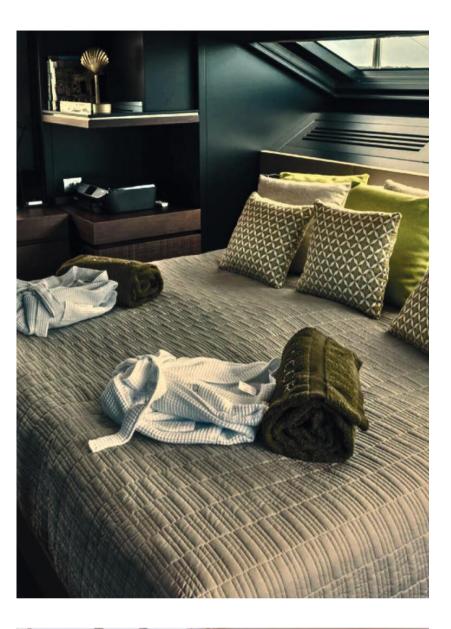

HESPERA

Hespera has established itself as the global pioneer in circular mattresses and beds. Their innovative designs cater to the unique needs of superyachts, cruise ships, hotels, and home interiors.

Recognizing the importance of sustainability and environmental responsibility, Hespera has incorporated circular economy principles into their business model. This approach ensures that their products are designed for longevity, with materials that can be easily recycled or repurposed at the end of their life cycle.

Hespera's circular mattresses and beds are not only a testament to their commitment to sustainability, but they also provide unparalleled comfort and luxury. By carefully selecting materials and using cuttingedge technology, Hespera creates bespoke sleeping solutions that cater to the exact requirements of their clients.

LIMONTA INTERIORS

Limonta Interiors is a modern and innovative expression of a deeprooted textile culture that started in 1893.

Specializing in the integration between textile production and ennoblement, its areas of expertise range from home furnishing, to clothing and accessories, footwear and textile, automotive and sports. Passion and innovation are the components orienting production and are carried out with a focus on sustainability.

Limonta creates fabrics for contemporary furniture through a vertical and integrated production process wisely mixing the knowhow of passionate collaborators and using excellent raw materials. Limonta has a sustainability philosophy path which aims to increase performance in protecting the environment.

MAPEL MARINE

It was 1937 when Rodolfo Squinzi founded Mapei - Materiali Ausiliari Per l'Edilizia e l'Industria (Auxiliary Materials for Building and Industry) in the outskirts of Milan – setting off on a path that would eventually make us a multinational company, champions of Italian excellence all over the world.

Mapei is now among the world's leading manufacturers of chemical products for the building industry. We offer long-lasting high-quality products that are mindful of both the planet and people.

Every day we are focused on increasingly sustainable building in the name of innovation. For us sustainability is a duty towards people and the planet, a commitment to future generations. A way of being and acting that translates into long-lasting projects, innovative products, staff wellbeing and comfortable living.

Mapei is determined to supply the best and most innovative products for eco-sustainable design and building. It requires responsibility and the ability to make concrete choices to provide designers, companies, installers and customers.

MEDOV LOGISTICS

Founded on a 70-year legacy of maritime expertise Medov Logistics was established with the goal of fulfilling the complex logistical requirements between the cruise and cargo industries. Its history can be traced back to Medov Shipping Agency, which began its journey in 1947 in Genova, Italy, with a primary focus on the cruise line business.

Medov Logistics' long-standing tradition of personal care and experience has allowed the company to expand its services to work with all major cruise lines, cruise line supply companies and expedition cruises. Our specialty is Cruise ships New Building, dry-dock logistics management, general logistics, offering supplies, with strongest rates based on volume while at all times keeping a keen eye on managing the details.

With companies and facilities across the globe, the company offers a comprehensive range of services that encompass virtually every aspect of the shipping world.

MICHALA Copenhagen

All their exquisite customized and personalized first-class bed linen are designed in the heart of Copenhagen, Denmark and are carefully crafted in exclusive quantities, ensuring that each piece is unique and exceptional.

As a commitment to excellence and sustainability, MICHALA Cph bed linen will after final use be recycled into new textiles for the fashion industry. MICHALA Cph believes that luxury and sustainability go hand in hand, and their products reflect this philosophy.

MICHALA Copenhagen provides other first-class textile products developed with the same recyclable mindset

- Only the best is good enough

NOHRLUND

Inspired by the desire to create consistently delicious, organic cocktails, reduce waste, and deliver an exceptional drinking experience without the need for a bartender, our team embarked on a journey of experimentation, exploration, and flavor discovery.

The culmination of this journey resulted in the launch of the first three premixed organic cocktails, each crafted with the utmost care and precision. Nohrlund is a proud partner of Live Nation events in the UK. A true fusion of technology and time-honored techniques, Nohrlund's cocktails offer a unique sensory experience that delights the palate and captivates the senses.

These organic cocktails could be enjoyed and served by anyone, regardless of time, knowledge and expertise.

RADICI MARINE

Radici Marine is a company active in the high-end textile flooring sector for cruise ships, ferries and yachts and offers an extensive diversification of products, thanks to multiple technologies as Wilton, Axminster and Tufting.

Thanks to a careful selection of raw materials, a particular attention to detail and a rigorous monitoring of the entire production process, the company is able to offer multiple solutions, always ensuring high-end style and quality, key elements of the "Made in Italy".

Radici Marine has never lost its original identity while being a part of a global textile group: a manufacturer of textile flooring in which tradition marries innovation, placing cuttingedge textile technologies at the service of creativity.

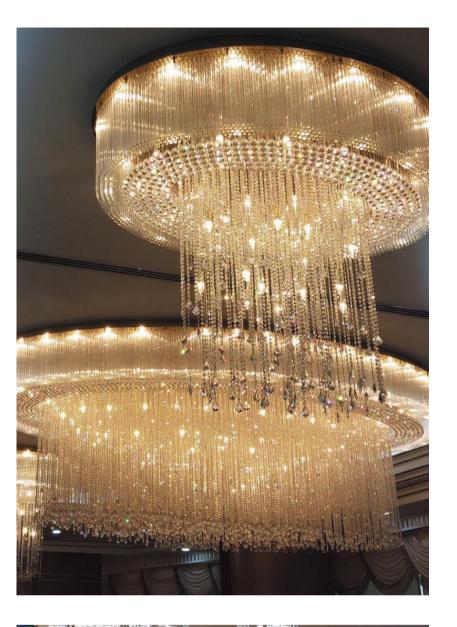

SHORES GLOBAL

Shores specializes in creating highend marine-grade furniture and cushions for the hospitality sector, which includes cruise ships, resorts, hotels, and restaurants. Susan Sadolin, CEO, has played a crucial role in the company's success in the hospitality industry. In addition to her impressive list of clients, including Hilton, Four Seasons, Royal Caribbean, and Carnival, Susan has positioned Shores as a leading manufacturer of luxury marine grade furnishings and cushions.

These offerings are designed with exceptional attention to detail, utilizing Scandinavian design principles to create unique and stylish pieces that are both durable and sustainable. With their focus on sustainable practices and circularity, Shores is aiming to set the standard for luxury furnishings in the hospitality industry.

By aiming to adopt circular principles, Shores is not only aiming to reduce their environmental footprint but also to create more value for their customers by providing high-quality, long-lasting products for indoor and outdoor use.

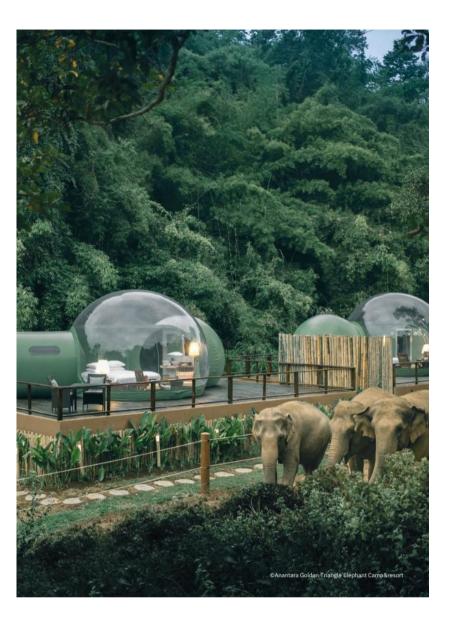

SONGULLINI LIGHTING DESIGN LLC

Songul Lighting Company, a premier provider of illumination products in Turkey, has been specializing in crafting crystal chandelier trimming since 1984.

This dedicated team of professionals meticulously handcrafts modern, classic, and custom-made chandeliers and various light fixtures, utilizing high-quality materials in our 9,095 square feet factory. Songullini is composed of some of the finest lighting designers, engineers, and workers in the industry, working tirelessly to create exquisite and unique lighting products that exceed clients' expectations.

Placing customer satisfaction and product quality above all else, this team of experts carefully analyzes each project before bringing it to life, ensuring that the most aesthetically pleasing and functional lighting possible is created as a result.

Act now to build a better tomorrow

Serge Ferrari group

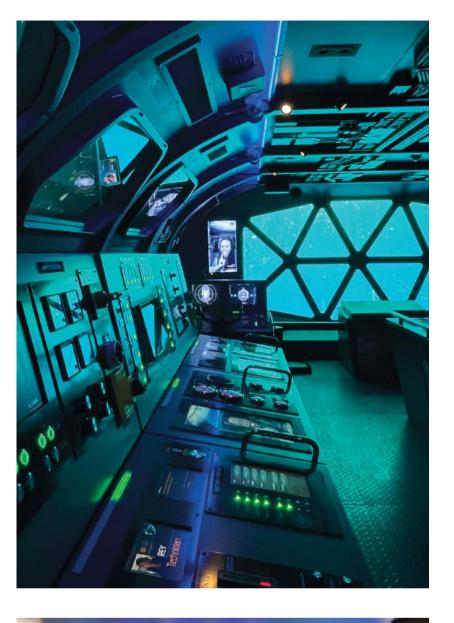

SERGE FERRARI

Serge Ferrari Group is a leading designer and manufacturer of flexible composite materials that are changing the game for the textile industry. With a focus on sustainability, these fabrics are known for their lightweight, durable, and recyclable properties, while maintaining comfort and aesthetics.

Loop, the newest generation of innovative products made from 100% recycled materials, embodies Serge Ferrari's mission to, "Act now to build a better tomorrow." This reflects their will to do more and build better and safer with even less environmental impact. By designing long-lasting materials that can be reused or repurposed at the end of their lives, Serge Ferrari positively impacts the environment and reduces waste.

For nearly 50 years, the company has paved the way for sustainable design in the marine and furniture, solar protection, tensile architecture, and modular structure markets. These attractive materials allow for new and creative approaches to design, resulting in more efficient and natural structures.

TENNAGELS

Since the company was founded nearly 20 years ago, tennagels has been a leading provider of customized LED solutions and highend installations for a wide range of industries.

It is a combination of German engineering accuracy and forward thinking engineering skills that set them apart from their competitors in the fields of special lighting solutions, video based entertainment technology, and corporate audiovideo communication, among others.

As well as years of experience in the time-sensitive trade fair industry, the team of creative technicians also acts as a product forge for LED solutions and is capable of assisting you with your project regarding the transformation of your digital communication. With deep experience gained from several previous cruise ship projects, tennagels holds a wealth of knowledge in the area of immersive entertainment.

WATERBURY

Founded by Thomas Armstrong, and still family-run in Birmingham UK, Waterbury manufactures and supplies beautifully styled bathroom accessories and Mirrors for the Hotel and Marine market.

With over 85 years of manufacturing expertise, whether it is one of their standard ranges, or something more bespoke, Waterbury has become the preferred supplier to the world's largest hotel groups such as Hilton, Marriott, IHG & Accor and more. Recently they've supplied the biggest brands in the marine market such as Carnival, Disney, MSC Cruises, NCL, TUI, Marella and Holland America.

Waterbury is striving to be an industry leader in their approach to sustainability and a circular economy. They have hired a sustainability expert who is helping shape their organization's culture.
