I. Cautions on mobile phone use

1.1 Interference

All phones may be interfered with, which affects phone calls.

1.2 Reasonable use

Use only in the normal position. Do not touch the antenna area unnecessarily.

1.3 Qualified maintenance service

Only qualified personnel may install or repair this product.

1.4 Water-resistance

Your device is non-water-resistant. Keep it dry.

1.5 Emergency calls

Ensure the phone is switched on and in service. Enter the emergency number and press the Dialer icon.

2 Precautions for the use of battery

2.1 Do not dispose of batteries near or in a fire to avoid dangers.
2.2 Do not dispose of batteries in the garbage. Dispose of batteries to the assigned battery recycling center.

3 Cautions for children

Keep your device out of the reach of children in case of accidental injury caused by incorrect use of the device as a toy.

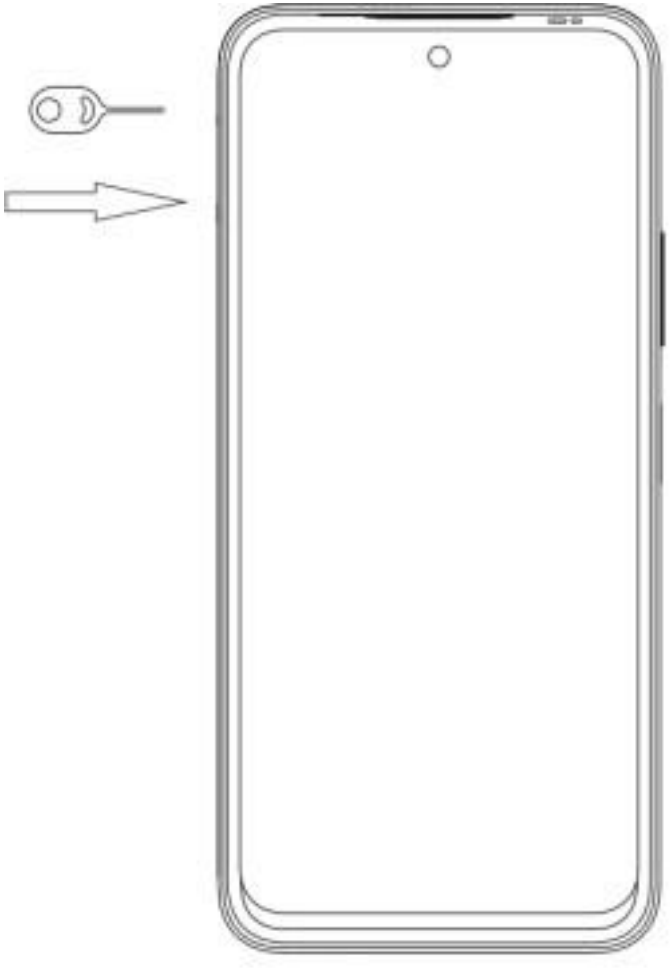
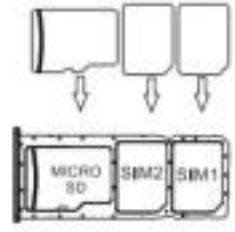
III. Start to use

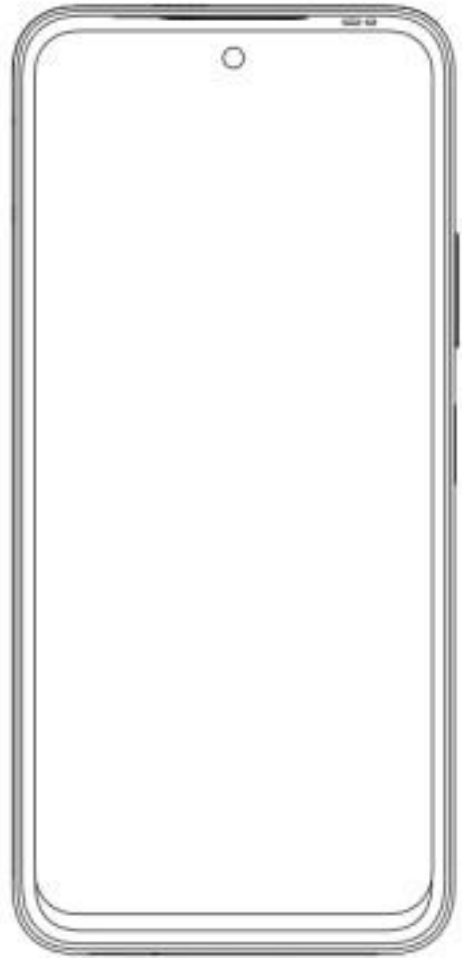
3.1 To insert SIM card(S):

Insert the SIM card correctly in the card slot(s) (See figure below), suggest switching off the phone when you insert the SIM card.
Insert the Micro SD card into the slot with the correct direction (See figure below), suggest switching off the phone when you insert Micro SD.
Note: Use only compatible memory cards with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.





MICRO
SD
SIM2
SIM1



3.2 Charge the battery

During charging, the battery indicator on the phone is a thunder icon. If the device is switched off during charging, there will still be a charging indication on the screen that shows the phone is being charged. If the device is overused when the battery is low, the charging icon might take some time to appear.

When the battery indicator on the screen displays 'Battery is full', the thunder icon will disappear, which means the completion of charging. If the phone is switched off during charging, the screen will display ' Battery is full '. The battery, device, and charger will get hot during charging. This is normal.

Unplug the charger from the AC electrical outlet and disconnect the wiring between the phone and the charger after charging.

Cautions: Charge the phone in a well-ventilated place in which the temperature is between - 10℃ to +55℃. Use the charger provided by the manufacturer only. The use of unconfirmed chargers may lead to dangers and violate the manufacturer's warranty clause. If the temperature is too high or too low during charging, the device will automatically send a warning and stop charging to avoid damage to the battery or any danger.

IV. Basic functions

1. Lock and unlock the screen

Press the power button to enter Sleep mode and meanwhile, the screen will be locked; press the power button again to wake up and then swipe up for unlock.

2. Make it yours

2.1 Home screen: It is your starting point to access all the features on your phone. It displays application icons, widgets, shortcuts, and other features. Long press the home screen and Modify the Wallpaper.
