

Take three measurements between the posts/ pillars:

Enter measurements here:

T

M

B

Smallest measurement =

now reduce by 100mm (or 4")

Actual width of gate =

If you are adding new posts, take the whole opening measurement, deduct the post width off, then reduce by a further 100mm (or 4")

Height: Always calculated to the highest point of the gate. We recommend allowing 50mm (2") bottom clearance on a level path. If you require a more exact height to match your post/ pillar, please call.
