

Take three measurements
(at the top, middle and bottom) between the posts/ pillars

Decide where your going to fit the gate:

Option 1: Gate hang in between existing posts/pillars

Enter measurements here:

Smallest measurement =

**Minus 100mm or 4"
Equals**

Actual width of gate to buy

Option 2: Gate hang at back on our metal posts

Enter measurements here:

Smallest measurement =

**Minus 40mm and the total width of both posts put together
(eg 2 x 80mm x 80mm posts will be a reduction of 160mm plus
the additional 40mm meaning a total reduction of 200mm)**

Actual width of gate to buy

Height: Always calculated to the highest point of the gate. We recommend allowing a minimum of 25mm (1") clearance at the bottom of the gate
