## Care and Maintenance *Outdoor Kitchens*

To ensure a lifetime of use and extend the longevity and beauty of your product, we recommend regular care and cleaning of your Outdoor Kitchen.

Routine cleaning can be accomplished by rinsing away dirt and debris and gently wiping with a damp, non-abrasive cloth or sponge using warm water. Towel drying will help prevent water spotting. If additional cleaning is necessary, mild household cleaners can be used. Using solvents or abrasive cleaners may damage the product's finish; always test any cleaning solution in an inconspicuous area before applying it to the entire product.

Storing objects on the surface for extended periods of time may trap moisture and debris and discolor or damage the finish.

Placing hot items directly on any surface of your outdoor kitchen may damage the finish. Hot ashes and exposure to ash debris over long periods of time may also cause damage. This type of damage is not covered under warranty.

Appliance and stainless steel cleaning solvents should never come in contact with your outdoor kitchen surface. Spray the solvent onto a cloth and wipe only on the appliance surface to help eliminate overspray.

Light or superficial scratches to the finish are likely to occur during normal use and do not affect the integrity of the product. Using your outdoor kitchen surfaces as a cutting board for food or sliding items such as grilling tools, utensils, and abrasive or ceramic items across the surface may also cause wear and tear. This type of finish wear is considered normal and is not covered under warranty.
