

Päijän.
All good.

A bringer of balance.

You're sailing on a lake. Or at sea. You break the water's surface with your lure. You listen to nature. Capture the moment with your camera. Capture yourself in a perfect moment.

Wherever your mind desires to go, it's good right here. In your own rowing boat.

Päijän represents the calm way of living. The balance between humans and the nature of the North. That's why boaters everywhere trust us, as they've done for almost a hundred years.

Balance, safety, and a long lifespan. That's how our boats exist. Always. Päijän's iconic design stems from multi-generational knowledge. And it's been growing slowly. With time, nice and easy.

And why the hurry? Life is happening here and now.

Your last rowing boat.
And your child's.
And your grandchild's.

Päijän boats are designed and built in Finland, the land of a thousand lakes. That's why they last. Our boats have been made to meet the highest requirements. Down to the last detail.

Fully equipped for an electric outboard motor: cable ducts inside the boat's hull are available in Le-models. Storage space that suits for the battery is standard in the L-model.

Modifiable model: new features to increase safety and methods of use are included.

Stable and easy to handle: good rowing features, especially for strong winds.

A durable structure: a double-shell construction with closed-cell polyurethane approved by the Eurofins.

Unsinkable: thanks to the closed-cell polyurethane filling, the boat floats even if the cell breaks.

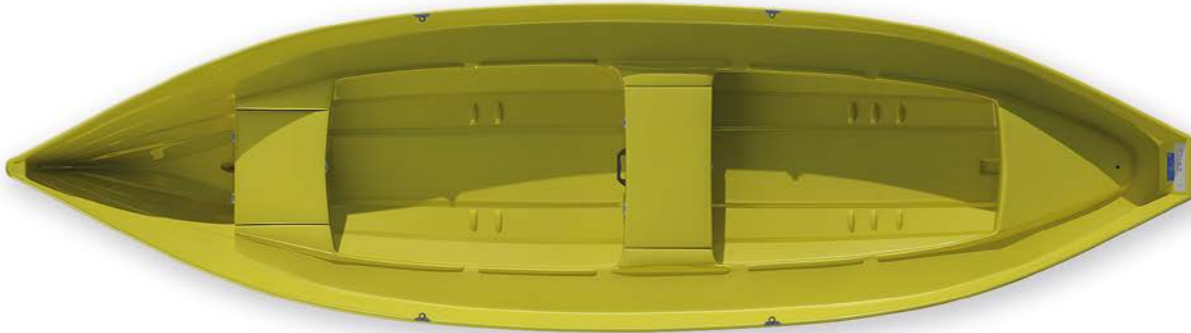

Ease of maintenance: one annual cleaning with mild detergent and a soft brush is all it takes.

CE mark: Meets the requirements of EU directives in structural safety, installation, stability and spare parts.

Here comes Päijän. Good.

Päijän 471 / 471L / 471Le

Päijän's 471 model has been sailing since the very beginning of our history. The classic boat sparks admiration from one generation to the next.

The Päijän 471L has storage compartments inside the front and the middle seats.

On Päijän 471Le models the centre seat storage compartment has an in-body duct for the electric motor wiring.

Lifespan:	50 years
Structure	2-shell fibreglass, polyurethane
Size	4700 mm/1420 mm (185.04/55.91 inches)
Weight	90 kg (198.42 lbs)
Registered number of people	4
Max. engine power	3 kW/4 hp
Reinforced keel	2 x brush steel
Model approval	VTT CE/seaworthiness

Päijän 520L / 520Le

Päijän's 520L model is a larger version of our classic model. It has storage compartments inside the front and the middle seats.

On Päijän 520Le models the centre seat storage compartment has an in-body duct for the electric motor wiring.

Lifespan:	50 years
Structure	2-shell fibreglass, polyurethane
Size	5200 mm/1500 mm (204.72/59.05 inches)
Weight	117 kg (257.94 lbs)
Registered number of people	4
Max. engine power	4 kW/5 hp
Reinforced keel	2 x brush steel
Model approval	VTT CE/seaworthiness

Accessories.

Build a boat that looks like you.

The electric bow motor brings luxury to fishing.

With Päijän's own bow motor holder, you can easily get a Minn Kota bow motor in place. Also suitable for other outboard engine models with minor modifications.

Handrails

The railings on the Päijän complete the boat. The bow, centre and stern railings make it easy to attach accessories or, for example an anchor rope to the railing. At the same time, the handrails provide support for moving onboard.

Rail-mounted accessories

The gears of a smart boater are organised. This also makes boating safer. In addition to storage solutions, a range of fishing accessories are also available for the rails.

Experience the silent revolution in rowing.

Imagine a perfect day for boating. The bow is directed to your favourite place. Every pull is effortless and the sun warms the back of your hands. Nothing could disturb your bliss.

With Päijän Aerot you are on the way, yet already there.

Rowing is a part of Finland's spiritual landscape. Life in the land of thousands of lakes is reflected in all of us. It's an inherent part of our shared muscle memory.

Päijän Aerot® create a new connection between you and nature. The new Aerot® oars combine the best of traditional oars with advanced design, ergonomics and technology. They are the next generation of oars that turn rowing back into a silent, peaceful, almost meditative experience.

AEROT

For as long as there have been boats, there have been oars. Now you can finally experience oars worthy of your boat.

Design

The innovative Aerot® oars have been designed in cooperation with the LAB Institute of Design and Fine Arts, and they are suitable for all boats. An innovative blade gives extra propulsion to the glide. Two models available: Tunto with straight handles, and Ote with bent handles. Available in three standard lengths: 2200 mm, 2450 mm and 2700 mm.

Ergonomics

No blisters, no pain. Handles are equipped with soft grip. The bent handles of the Ote model rotate. The grip is made of thermoplastic elastomer, which is comfortable in your hands. Aerot® oars are suitable for rowers of all ages and sizes.

Technology

Shaft, blade and mobile handles make rowing silent. Aerot® oars are manufactured in a sustainable way and they are made to last. Anodised aluminium is resistant to salty water, which makes Aerot® a perfect companion for demanding sea conditions. The composite structure and the aluminium sleeve made of lubricated polyacetal guarantee excellent wear resistance and low friction. Other composite components are made of fibreglass-reinforced polyamide with high strength and toughness.

Oars. They are now Aerot.

Finished down to the smallest detail, the Aerot is the most technically advanced and durable oars. Aerot are designed in Finland and manufactured in Finland. Just like our rowing boats. That's why they also last.

- Two models available: Tunto with straight handles, and Ote with bent handles.
- Available in three different lengths: 2200 mm, 2450 mm and 2700 mm. 2450 mm is best suited for Päijän rowing boat and other low-edged rowing boats. For boats with a high edge, we recommend the longer model. The shortest model works for example in small salmon rowing boats.
- Handles are equipped with soft grip. The bent handles of the Ote model rotate.
- Collars (including pin, sleeve, and bushing) fit all 17 mm oarlocks. No squeaking.
- Perforation for theft prevention, allowing you to lock your Aerot® oars.
- Infinitely adjustable for rowers of all sizes
- composite components are made of fibreglass-reinforced polyamide with high strength and toughness
- 100% recyclable aluminium.
- 2-year warranty.

SHAFT	
Material	Anodised aluminium
Length options	2700 mm / 2450 mm / 2200 mm

BLADE	
Material	Fibreglass-reinforced polyamide
Surface area	7,58 dm ²
