

RANGE CARTS
CUT THROUGH THE CHAOS

Combat Application Tourniquet 7 Holster

Step 1 If you are using the CAT 7 Holster with the standard FAK adapter we recommend you locate the FAK adapter toward the front of the cart and the holster to the rear. This will allow for a full range of motion of the seat.

Step 2 Un-snap the two straps on the back of the holster and thread them from top to bottom through two adjacent openings in the Molle field and run the straps through all three slots of the Molle field. Attach the snaps to their respective mating parts.
