

Let's ROCK

STRIDER 2-IN-1 ROCKING BIKE

1

PRACTICE TOGETHER

Introduce the Strider Rocking Bike by sitting your baby on the floor next to it within reach. Give your child some time to look it over, reach out, or even start drumming on the base. Every baby develops at their own pace. There's no need to rush or force anything.

2

SUPPORT BABY ON BIKE

Start to spend more time encouraging your baby to sit on the bike. Kneel or sit next to your kiddo and hold them steady while they practice sitting on the seat.

3

READY TO ROCK

Encourage your child to get up and stand on the base by themselves. This will take some practice. Be there to support them. Have fun with your little one! Sit in front of them, smile, make eye contact, and cheer when they begin to explore more movement on the bike.

4

READY TO ROLL

There is no right or wrong time to pull the bike off the rocker. Every child is different. If you have a hunch that your kiddo might be ready, give it a try. Remember, the bike can go on and off the base as often as you like.

Are you ready to rock?
