

### Measurement Guide

Please use the below information for taking measurements for your custom made Matchimony Bridesmaid dresses. Please fill in one new form for each bridesmaid that you are measuring for. Please note that items take 4-6 weeks for creation and delivery and are non-returnable as they are custom-made to the individual. There is also a £20 made to measure charge per dress.

You will require: one full length measuring tape and one retractable tape measure for length.

<b>Name</b> (Bride)	
<b>Name</b> (Bridesmaid)	
<b>Order Number</b> (if confirmed)	
<b>Date</b>	

Measurement	How to Measure	Your size (please write in here your detailed sizes in CM)
<b>Length 1</b>	Stand up straight against a wall and have a friend extend the retractable tape measure from the top of your shoulders (at the highest point where they meet your neck) to the full length of dress that you would require (kneelength or floor length). Please ensure you are wearing the correct footwear	
<b>Length 2</b>	Do the same as above but measure from the hollow of the collarbone to the full length of dress that you would require (kneelength or floor length)	
<b>Bust</b>	Wrap the soft measuring tape around the fullest part of the bust, please do remember not to squeeze in but to allow breathing room. Ensure the tape is not gaping between your shoulder blades and instead is flush against your back. Please ensure you measure this wearing the underwear you intend to wear on the day, (our dresses do include a soft padded cups so a bra may not be needed for all bust sizes.)	
<b>Under Bust</b>	Wrap the soft measuring tape around the ribcage right under the bust line, please do remember not to squeeze in but to allow breathing room. Ensure the tape is not gaping between your shoulder blades and instead is flush against your back, this ensures a better fit for the ribcage to accommodate the boning of our strapless and multiway dresses	
<b>Waist</b>	Wrap the soft measuring tape around the narrowest part of your waist level with your bellybutton. Shift around slightly to ensure it is not a tight fit and can accommodate movement	
<b>Hips</b>	Wrap the soft measuring tape around the widest part of your waist, this point is usually 7" to 9" below the natural waistline. Shift around slightly to ensure it is not a tight fit and can accommodate soft movement of the dress
