Auto-on when motion is detected

Auto-off 15 seconds after no further motion

26 - 33ft

120°   120°   120°

Note: This solar wall light features a photocell, during the day it will charge until full and at night it will release that energy.

03 / OPERATING INSTRUCTIONS

Mount this light to the surface you intend to use with the included fixing screws. Make sure that the location is not blocked from direct sunlight and that it is not close to any nighttime light source like a porch light or streetlight.

04 / NOTE

1. PLEASE test the light functions in a dark room before mounting it to the intended location.
2. PLEASE charge the device for a full day when using it for the first time (if the light blinks repeatedly).
3. Make sure the light is facing the maximum light when charging.
4. PLEASE install the light facing south and make sure that sunlight can reach the solar panel directly without any shelter or glass.
5. Wipe the solar panel with a clean cloth after the light has been used for the first few days.
6. If the light has run out of power, it is recommended to charge it for 2-3 days before use (except rainy days).

05 / WARRANTY

TORCHSTAR warrants that this product is free from defects in materials and workmanship for a period of 12 months from the day of purchase. If the product has been misused, damaged by accident or in any other way of improper use, this warranty becomes void.
