

# 3 STAR INDUSTRIES

CFMOTO Z FORCE 950

POLYCARBONATE BACK PANEL

PARTS LIST		
PART	QTY	DESCRIPTION
	4	NEOPRENE WASHER
	4	1 3/4" LOOP CLAMPS
	4	1 1/2" BOLT
	4	SMALL WASHER
	4	LOCK NUT
	4	WINGNUT

**Tips!:**

Grab a buddy to help you install.

Do not remove the protective paper! This paper will protect the back panel during the install.

**Step 1**

Set back panel on the roll cage.

**Step 2**

Peel protective paper back on both sides to reveal the clamps holes. Wrap the loop clamp around the roll bar, flat part facing the back panel.

#### Step 4

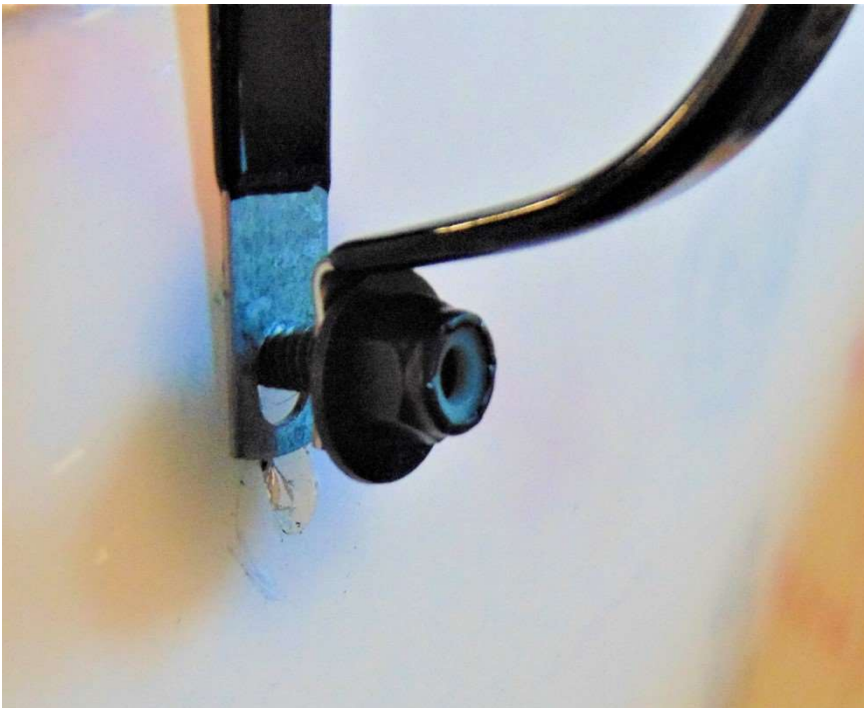

Insert wingnut, bolt and neoprene washer assembly through the outside of the windshield, then through the hole in loop clamp. Secure with small washer and lock nut.

#### Step 5

After you have installed all hardware, you may then use a drill to tighten the lock nuts.

#### Step 6

Remove protective paper from both sides of the windshield.

Small washer and lock nut are positioned on the inside of the utv.

Wingnut and neoprene washer should be positioned on the outside of the back panel.

This completes your install

## Cleaning Instructions.

Lexan, which is a brand of polycarbonate, is virtually indestructible. But it is also easily scratched. Please read the cleaning recommendations to limit damage to your product.

Never wipe your polycarb back panel with any just any old cloth. We recommend using micro fleece blanket. This is super soft material you can find at Walmart. Any other cloth even micro fiber will leave scratches on the polycarbonate. If you are unsure about the fabric please give us a call at 859-488-7447 ask for Sam.

Never use any abrasive cleaning products on your polycarb. Windex for example is not ok! This will cause the polycarb to develop a haze. Some chemicals may eat through the polycarb. I do not recommend using any kind of soap but if you must please use dish soap only, like dawn. Pour on and spray off, do not wipe!

Do not try to wipe off mud period! Spray mud and debris off with water hose first! If you have access to a leaf blower or air compressor we recommend using them to dry the windshield. If not, gently use a micro fleece blanket to blot the water away and then air dry.

I recommend using a product called NOVUS, to apply a coat of wax that will prevent mud and dust from clinging to your windshield. If you are having trouble finding this product online please call Sam at the number listed above.
