

Installation Instructions

Thank you for purchasing a UTV enclosure manufactured in the USA with pride by 3SI UTV. Your enclosure is made of heavy duty fabric that is water repellent and resistant to mildew, ultra-violet rays and abrasion. With proper installation and care you can expect many years of service from your 3SI UTV enclosure.

SOME IMPORTANT NOTES BEFORE GETTING STARTED....

- The enclosure attaches to your UTV's cab frame with Velcro. The technical term for Velcro is hook and loop.
 Loop is the soft side and hook, the rough side. Loop has been sewn into the enclosure at various points.
 Adhesive hook has been supplied to attach to your cab frame, corresponding to the sewn-in loop. If you struggle with placement of the adhesive hook, with the enclosure held to the cab frame, note the locations of the sewn-in loop. The adhesive hook is attached to the cab frame at those locations.
- The adhesive hook should be applied at a temperature of 60 degrees or above. For maximum adhesion, when the adhesive hook is in place, allow the adhesive to cure for 24 hours before attaching the loop to the hook.
- Clean the surfaces the adhesive hook will be attached to before beginning installation. A light cleaning with mild soap and water is best. A little Windex works great. Do NOT wax or clean with a compound that leaves the frame slick. The adhesive hook will not stick to a slick surface. Again, a light cleaning is best.
- Your enclosure is not a "one size fits all" product. The enclosure was designed and manufactured specifically for your model UTV. As a result, the enclosure should fit square and snug to the cab frame.
- Periodic cleaning of your enclosure with mild soap and water is recommended to minimize accumulations of dirt.
- Clean the vinyl windows with mild soap, water, and a soft cloth to avoid scratches. DO NOT USE ANY DETERGENTS, WINDOW CLEANERS, SOLVENTS OR CHEMICALS TO CLEAN VINYL WINDOWS.
- Clean your enclosure and allow it to dry before removing for storage. <u>Never fold your enclosure to store</u>. Roll the enclosure to avoid creasing the vinyl windows. Creases in the vinyl windows cannot be removed. <u>CREASING</u> <u>THE VINYL WINDOWS VOIDS ALL WARRANTIES AND GUARANTEES.</u>
- The only enclosures manufactured by 3SI UTV that can be hauled when installed are Lexan windshields, full cab enclosures, and door/rear window combos with top and windshield installed. However, the enclosures should be tied down before hauling. Speed should not exceed 55 mph while hauling to prevent ripping and shredding of the material and zippers. REMOVE ALL OTHER ENCLOSURES BEFORE HAULING.

PLEASE READ AND FOLLOW THE DETAILED INSTRUCTIONS THAT ARE ATTACHED.

HISUN 800 Door / Rear Window

Installation Instructions

You have just purchased the best Enclosure for your Utility Terrain Vehicle available on the market today. Your Enclosure is made of Heavy Duty Fabric that is Water Repellent and resistant to Mildew, Ultra-Violet Sun Rays and Abrasion. With proper installation and care you can expect many years of long lasting fit, color and service life from your **3SI UTV Cab Enclosure**.

Due to the roll bar configuration of the HISUN 800, the door kit may interfere with the clamps for a hard top. The door kit can be cut to accommodate the hard top without losing the effectiveness or strength of the door kit. If fabric or tabs need to be cut, simply cauterize the edges like you would a nylon rope. Additional instructions for cutting webbing along the front roll bars are included below. The same procedures can be used when cutting fabric.

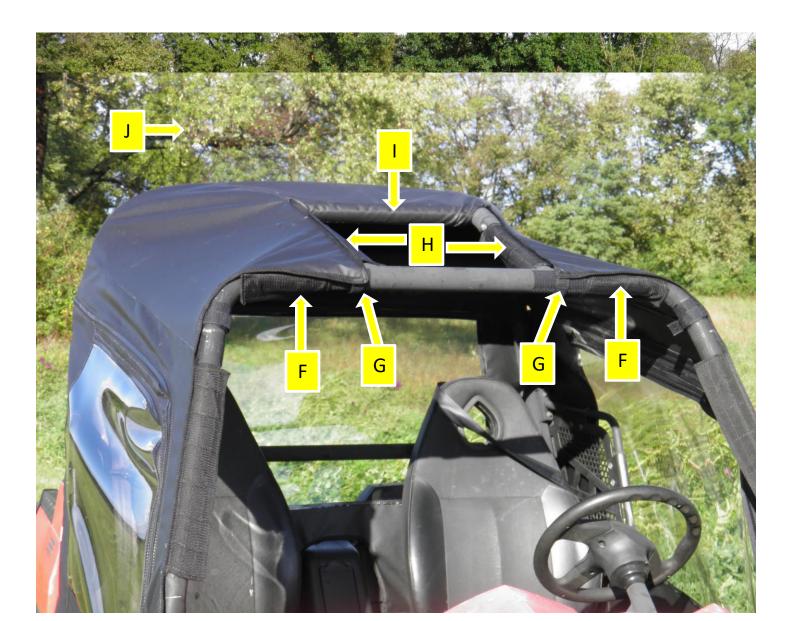

Step 1: Remove your 3SI UTV Cab Enclosure and Velcro kit from the shipping box.

Step 2: With chalk, mark the roll bars where the windshield, hard top, and rear windshield's clamps are located. Remove your hard top, windshield and back panel.

Step 3: Hold the door panel to the vehicle's cab frame. Note the location of sewn-in loop strips in the enclosure. Adhesive hook strips will be attached to the cab frame corresponding to the loop strips. Remove the backing from the adhesive hook strips and install as indicated in the following adhesive hook table and picture.

Velcro list for Hisun 800 Door/Rear Window				
Top Cover				
A	2 – 5 ½"	Across the bottom of the wing		
В	2 – 24"	Up front side of the wing at the bottom		
С	2 - 6"	For sewn-in double-sided velcro at the center of the wing		
D	2 – 14"	For tab up the windshield		
E	2 - 6"	For sewn-in double-sided velcro at the front above the windshield		
F	2 – 7"	For the tab above the windshield		
G	2-6"	For the sewn-in double-sided velcro above the windshield in the center corner		
Н	2 – 12"	For the tabs on the side of the top roll bar		

I	1 – 14"	For the center of the cab on top	
J	2 - 6"	For the sewn-in double-sided velcro on the back corners on top	
		Back Panel	
No Ref	2 – 17 ½"	For each side across bottom between utv body and rear bed	
К	4 - 6"	For (2) in each corner at the top and (2) at the center of the back panel on each side	
Door Panel			
L	2 – 23"	Across the bottom of the door	
М	2 – 14 ½"	Around the curve in the back of the door	
N	2 – 11"	Up the back of the door at bottom	
0	2 – 6"	For the sewn-in double-sided velcro in the center of the back of the door	

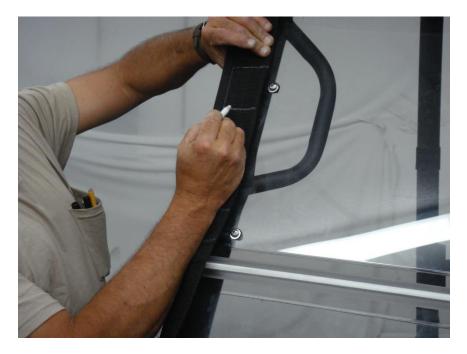

Step 4: After all adhesive hook strips are attached, begin attaching the enclosure to the cab frame. The back panel, top cover, and doors will zip onto each other. As you attach the hook and loop, square each panel to the frame. <u>PLEASE</u> <u>NOTE, FOR MAXIMUM ADHESION, ALLOW THE ADHESIVE HOOK TO ADHERE TO THE FRAME FOR 24 HOURS BEFORE</u> <u>PULLING AGAINST THE HOOK WITH THE LOOP STRIPS.</u>

Step 5: If the front tab needs to be cut to accommodate windshield clamps, please use the following instructions.

Mark windshield tabs where hard windshield clamps are located along the windshield Roll Bar

Cut the Tab being very careful not to cut the binding at the edge

Seal Frayed Tab thread at the cut area using a lighter

Step 6: Repeat any steps necessary to achieve a snug fit on the cab frame.

See enclosed Product Care sheet for instructions on how to properly care for your 3SI UTV Enclosure.

Care Instructions

Heavy Duty Marine and Mil-Spec Military Fabric Cleaning

All 3SI UTV Enclosure Heavy Duty Marine and Military Camo fabrics are guaranteed against excessive loss of color or strength under normal exposure and use conditions. Periodic cleaning with a solution of 4 ounces of bleach and 2 ounces of soap (NOT DETERGENTS) in one gallon of water is recommended to minimize accumulations of dirt, bird droppings and other contaminants which can support surface mildew and stain fabric.

Soft Vinyl Window Cleaning

3SI UTV Enclosure Vinyl Windows will remain clear and provide great visibility under normal exposure conditions if properly cleaned. Periodic cleaning with a solution of 1 ounce of soap in one gallon of water is all that is needed to maintain good window cleanliness and visibility. Caution: DO NOT USE ANY DETERGENTS, WINDOW CLEANERS, SOLVENTS or CHEMICALS OF ANY KIND TO CLEAN VINYL WINDOWS AS THESE WILL CLOUD THE WINDOWS. ALSO, NEVER RUB WINDOWS WITH A DRY CLOTH OR RAG.

Storage Recommendations

Before removing the 3SI UTV Enclosure from your vehicle for storage, clean the Fabric and Vinyl Windows thoroughly as indicated above. Any dirt remaining on the Enclosure may scratch Vinyl Windows while in storage. Once the Enclosure has been cleaned it should be placed on a large flat surface. Lay the Enclosure out so that Vinyl Windows are in a flat position. Fold the doors over the rear panel first then fold the top and windshield on top of the doors keeping the Vinyl Windows flat. Caution: <u>FOLDING VINYL WINDOWS</u> <u>WILL CAUSE PERMANENT CREASE DAMAGE AND WILL VOID ALL WARRANTIES</u>. Once the Enclosure is folded keeping all Vinyl Windows flat, begin rolling the Enclosure into an 8" roll. Place the 8" roll into a box and store at normal room temperature. To ensure long life of your enclosure it is best not to store in extreme temperatures.

Hauling

The ONLY products manufactured by 3SI UTV that can be hauled while installed are the hard windshields, full cab enclosures, and door/rear window combos with top and windshield installed. <u>However, the full cab enclosures and door/rear window combos should be tied down before hauling</u>. Speed should not exceed 55 mph while hauling to prevent ripping and shredding of the material and zippers. NEVER HAUL INSTALLED SOFT TOPS, WINDSHIELD TOP COMBOS, AND SUMMER CABS. **REMOVE BEFORE HAULING**.
