

Installation Instructions

Thank you for purchasing a UTV enclosure manufactured in the USA with pride by GCL UTV. Your enclosure is made of heavy duty fabric that is water repellent and resistant to mildew, ultra-violet rays and abrasion. With proper installation and care you can expect many years of service from your GCL UTV enclosure.

SOME IMPORTANT NOTES BEFORE GETTING STARTED....

- The enclosure attaches to your UTV's cab frame with Velcro. The technical term for Velcro is hook and loop. Loop is the soft side and hook, the rough side. Loop has been sewn into the enclosure at various points. Adhesive hook has been supplied to attach to your cab frame, corresponding to the sewn-in loop. If you struggle with placement of the adhesive hook, with the enclosure held to the cab frame, note the locations of the sewn-in loop. The adhesive hook is attached to the cab frame at those locations.
- The adhesive hook should be applied at a temperature of 60 degrees or above. For maximum adhesion, when the adhesive hook is in place, allow the adhesive to cure for 24 hours before attaching the loop to the hook.
- Clean the surfaces the adhesive hook will be attached to before beginning installation. A light cleaning with mild soap and water is best. A little Windex works great. Do NOT wax or clean with a compound that leaves the frame slick. The adhesive hook will not stick to a slick surface. Again, a light cleaning is best.
- Your enclosure is not a "one size fits all" product. The enclosure was designed and manufactured specifically for your model UTV. As a result, the enclosure should fit square and snug to the cab frame.
- Periodic cleaning of your enclosure with mild soap and water is recommended to minimize accumulations of dirt.
- Clean the vinyl windows with mild soap, water, and a soft cloth to avoid scratches. DO NOT USE ANY
 DETERGENTS, WINDOW CLEANERS, SOLVENTS OR CHEMICALS TO CLEAN VINYL WINDOWS.
- Clean your enclosure and allow it to dry before removing for storage. <u>Never fold your enclosure to store</u>. Roll the enclosure to avoid creasing the vinyl windows. Creases in the vinyl windows cannot be removed. <u>CREASING</u>
 THE VINYL WINDOWS VOIDS ALL WARRANTIES AND GUARANTEES.
- The only enclosures manufactured by GCL UTV that can be hauled when installed are Lexan windshields, full cab
 enclosures, and door/rear window combos with top and windshield installed. However, the enclosures should
 be tied down before hauling. Speed should not exceed 55 mph while hauling to prevent ripping and shredding
 of the material and zippers. REMOVE ALL OTHER ENCLOSURES BEFORE HAULING.

PLEASE READ AND FOLLOW THE DETAILED INSTRUCTIONS THAT ARE ATTACHED.

Kawasaki Teryx Full Cab Enclosure Installation Instructions

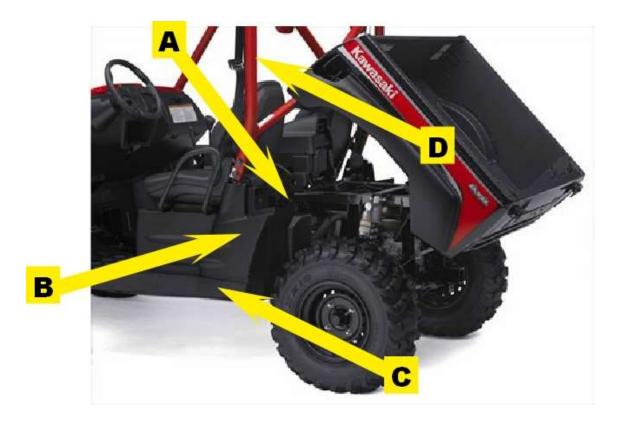

You have just purchased the best Enclosure for your Utility Terrain Vehicle available on the market today. Your Enclosure is made of Heavy Duty Fabric that is Water Repellent and resistant to Mildew, Ultra-Violet Sun Rays and Abrasion. With proper installation and care you can expect many years of long lasting fit, color and service life from your **GCL UTV Enclosure**.

Step 1: Remove your GCL UTV Enclosure and adhesive Velcro Kit from the shipping box.

| Velcro Kit Contents | | |
|---------------------|---------------|---|
| Reference | Quantity/Size | Placement |
| Α | 2-12" | Bottom of back panel-horizontal |
| В | 2-9.5" | Back edge of doors-app. 3" up from door bottom-vertical |
| С | 2-10" | Back/bottom corner of doors-horizontal |
| D | 2-8" | Middle of rear upright roll bars-inside of bar-vertical |
| E | 2-8" | Front/bottom of doors-inside of cowl-horizontal |
| F | 2-6" | Front of doors-inside of cowl-vertical |
| G | 2-8" | Bottom of wing-diagonal |
| Н | 2-8" | Bottom of front roll bar-inside edge |
| I | 2-8" | Middle of front roll bar-inside edge |
| J | 2-5" | Top of front roll bar-inside edge |

Note: before applying adhesive Velcro Strips to your vehicle, surfaces should be free of dust, dirt and oil.

- **Step 2:** Place Enclosure on top of Roll Bar Cage and align corner seams with outside center of roll bars. Pull the enclosure down until it is tight on the Roll Bar Cage.
- **Step 3:** With the enclosure on your cab frame, note the location of the sewn-in Velcro loop in the enclosure. The industrial name for Velcro is hook and loop. Hook is the rough side, loop the fuzzy side. The adhesive Velcro hook should be installed on the cab frame as indicated in the Velcro Kit Contents above. One at a time, pull the backing from the adhesive hook and install as described. The following pictures indicate the approximate location to apply the adhesive hook.

Step 4: Fasten pre-attached Enclosure Front Hood Straps to the center bar of the Vehicle front bumper as shown in the picture 4.1. Bringing the end of the straps up to the latch buckle, run the end through the back of the top buckle opening first and then through the front of the lower buckle opening as shown in picture 4.2. DO NOT FULLY TIGHTEN FRONT HOOD STRAPS AT THIS TIME.

Figure 4.1 - run front hood straps through the center bar of the front bumper

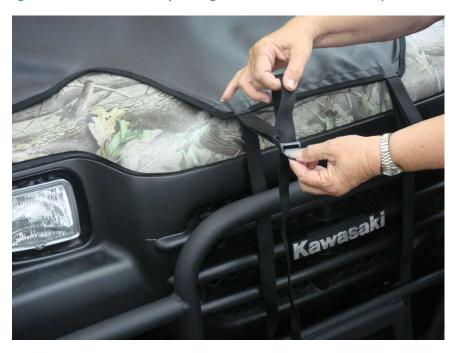

Figure 4.2 - thread front hood straps into buckles

Step 5: Starting from the back, attach the sewn-in Velcro loop to the corresponding Velcro hook on the cab frame. Square the back of the enclosure to the rear roll bar uprights. Align the seam at the top of the side panels with the outside edge of the roll bars. As you work forward, pull the enclosure forward and down to tighten to the cab frame.

Step 6: After all Velcro has been attached, tighten the front hood straps.

Step 7: Repeat any steps necessary to re-align the enclosure for a snug fit to the cab frame.

See enclosed Product Care sheet for instructions on how to properly care for your GCL UTV Enclosure.

Care Instructions

Heavy Duty Marine and Mil-Spec Military Fabric Cleaning

All GCL UTV Enclosure Heavy Duty Marine and Military Camo fabrics are guaranteed against excessive loss of color or strength under normal exposure and use conditions. Periodic cleaning with a solution of 4 ounces of bleach and 2 ounces of soap (NOT DETERGENTS) in one gallon of water is recommended to minimize accumulations of dirt, bird droppings and other contaminants which can support surface mildew and stain fabric.

Soft Vinyl Window Cleaning

GCL UTV Enclosure Vinyl Windows will remain clear and provide great visibility under normal exposure conditions if properly cleaned. Periodic cleaning with a solution of 1 ounce of soap in one gallon of water is all that is needed to maintain good window cleanliness and visibility. Caution: DO NOT USE ANY DETERGENTS, WINDOW CLEANERS, SOLVENTS or CHEMICALS OF ANY KIND TO CLEAN VINYL WINDOWS AS THESE WILL CLOUD THE WINDOWS. ALSO, NEVER RUB WINDOWS WITH A DRY CLOTH OR RAG.

Storage Recommendations

Before removing the GCL UTV Enclosure from your vehicle for storage, clean the Fabric and Vinyl Windows thoroughly as indicated above. Any dirt remaining on the Enclosure may scratch Vinyl Windows while in storage. Once the Enclosure has been cleaned it should be placed on a large flat surface. Lay the Enclosure out so that Vinyl Windows are in a flat position. Fold the doors over the rear panel first then fold the top and windshield on top of the doors keeping the Vinyl Windows flat. Caution: FOLDING VINYL WINDOWS WILL CAUSE PERMANENT CREASE DAMAGE AND WILL VOID ALL WARRANTIES. Once the Enclosure is folded keeping all Vinyl Windows flat, begin rolling the Enclosure into an 8" roll. Place the 8" roll into a box and store at normal room temperature. To ensure long life of your enclosure it is best not to store in extreme temperatures.

Hauling

The ONLY products manufactured by GCL UTV that can be hauled while installed are the hard windshields, full cab enclosures, and door/rear window combos with top and windshield installed. However, the full cab enclosures and door/rear window combos should be tied down before hauling. Speed should not exceed 55 mph while hauling to prevent ripping and shredding of the material and zippers. NEVER HAUL INSTALLED SOFT TOPS, WINDSHIELD TOP COMBOS, AND SUMMER CABS. REMOVE BEFORE HAULING.
