

3 STAR INDUSTRIES

Yamaha YXZ

POLYCARBONATE BACK PANEL

PARTS LIST		
PART	QTY	DESCRIPTION
	4	1" BOLT
	8	SMALL WASHER
	4	LOCK NUT
	5	10" STRAP

Tips!:

Grab a buddy to help you install.

Do not remove the protective paper! This paper will protect the back panel during the install.

Step 1

Install the lower panel first. It's a tight squeeze, don't be afraid to bend the lexan.

Peel back the protective paper on both sides of the back panel to reveal the slot holes. Then install the strap, insert the end of the strap through the outside of the back panel. Wrap strap around the roll bar and attach it to itself.

Step 2

Install the top portion of the back panel. Again do not be afraid to bend the lexan! It will not break. Connect the lower portion and top portion with the provided hardware.

USE BOLT WITH SMALL WASHER ON THE OUTSIDE, SECURE WITH SMALL WASHER AND LOCK NUT ON THE INSIDE.

Step 3

Install remaining straps.

Cleaning Instructions.

Lexan, which is a brand of polycarbonate, is virtually indestructible. But it is also easily scratched. Please read the cleaning recommendations to limit damage to your product.

Never wipe your polycarb back panel with any just any old cloth. We recommend using micro fleece blanket. This is super soft material you can find at Walmart. Any other cloth even micro fiber will leave scratches on the polycarbonate. If you are unsure about the fabric please give us a call at 859-488-7447 ask for Sam.

Never use any abrasive cleaning products on your polycarb. Windex for example is not ok! This will cause the polycarb to develop a haze. Some chemicals may eat through the polycarb. I do not recommend using any kind of soap but if you must please use dish soap only, like dawn. Pour on and spray off, do not wipe!

Do not try to wipe off mud period! Spray mud and debris off with water hose first! If you have access to a leaf blower or air compressor we recommend using them to dry the windshield. If not, gently use a micro fleece blanket to blot the water away and then air dry.

I recommend using a product called MuddTraxx Ceramic Detailer, to apply a coat of wax that will prevent mud and dust from clinging to your windshield. If you are having trouble finding this product online please call Sam at the number listed above.
