

# Surface Water Drainage Pits BPIR Declaration

Version: V1

**Designated building product: Class 1** 

#### **Declaration**

Aqualine Trading Limited has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

# **Product/system**

Name	Surface Water Drainage Pits
Line	Ranges Include: Traditional Pits Heavy Duty Commercial Pits Unipits
Identifier	Reln

#### **Description**

RELN have a complete range of sizes in square and environmental pits and extensive grate options to offer both DIYers and trade professionals a complete solution for directing water away from the home. All Traditional pits have conventional security grates and a range of innovative features that make installation easy and flexible.

Aqualine Trading Limited 7 Winston Place, Henderson Auckland 0654 21 Lock Crescent, Hillsborough, Christchurch 8022 PH: 0800 889 914 Email: <u>orders@aqualine.co.nz</u> <u>www.aqualine.co.nz</u>

#### **Scope of use**

- RELN Domestic Traditional pits are the perfect surfacewater pits for domestic applications. Designed for large household surfacewater drainage, they are ideal for under taps, at the end of surface water drainage channels, as a junction box or in large, paved areas.
- RELN Heavy Duty Commercial Pits are the perfect surface water pits for commercial applications including driveways, carparks, and trafficable areas. RELN has a complete range of square and environmental pits, with conventional and security grates to suit every heavy commercial application. The range has been designed as a total solution to the environmental and safety hazards commonly associated with commercial drainage.
- RELN Uni-Pits are the fastest and easiest pits to install. The unique vortex design
  prevents water pooling in the bottom of the pit, removing a common breeding place for
  mosquitoes. The Uni-Pit vortex inline surface water drainage system eliminates the need
  to risers, as vertical pipe can be cut to the required depth.

#### **Conditions of use**

Contact Aqualine to ensure correct Grate load ratings are suitable for application

#### **Relevant building code clauses**

 $\begin{array}{l} \textbf{B2 Durability} = \texttt{B2.3.1} (\texttt{b}) \\ \textbf{F2 Hazardous building materials} = \texttt{F2.3.1} \\ \textbf{G13 Foul water} = \texttt{G13.3.1}, \texttt{G13.3.2} \end{array}$ 

#### **Contributions to compliance**

E1/AS1 Compliant

# Appendix

Note: The below appendix includes information relating to BPIR Ready.

Publishing this information is not a requirement under BPIR. Its inclusion here is to provide a reference for how this BPIR summary was generated as well as to help summary creators understand the performance clauses suggested by BPIR Ready.

# **BPIR Ready selections**

Category: Foul water conveying plumbing and drainage systems

	Yes	No	
Capable of being permanently concealed		×	

# **Building code performance clauses**

# **B2** Durability

B2.3.1

*Building elements* must, with only normal maintenance, continue to satisfy the performance requirements of this code for the lesser of the *specified intended life* of the *building*, if stated, or:

 (b) 15 years if: those building elements (including the building envelope, exposed plumbing in the subfloor space, and in-built chimneys and flues) are moderately difficult to access or replace, or failure of those building elements to comply with the building code would go undetected during normal use of the building, but would be easily detected during normal maintenance.

# F2 Hazardous building materials

F2.3.1

Aqualine Trading Limited 7 Winston Place, Henderson Auckland 0654 21 Lock Crescent, Hillsborough, Christchurch 8022 PH: 0800 889 914 Email: <u>orders@aqualine.co.nz</u> www.aqualine.co.nz The quantities of gas, liquid, radiation or solid particles emitted by materials used in the *construction* of *buildings*, shall not give rise to harmful concentrations at the surface of the material where the material is exposed, or in the atmosphere of any space.

AQUALINE

#### G13 Foul water

G13.3.1

The plumbing system shall be constructed to:

- a. convey foul water from buildings to a drainage system,
- b. avoid the likelihood of blockage and leakage,
- c. avoid the likelihood of foul air and gases entering buildings, and
- d. provide reasonable access for maintenance and clearing blockages.

G13.3.2

The drainage system shall:

- a. convey foul water to an appropriate outfall,
- b. be constructed to avoid the likelihood of blockage,
- c. be supported, jointed and protected in a way that will avoid the likelihood of penetration of roots or the entry of ground water,
- d. be provided with reasonable access for maintenance and clearing blockages,
- e. be ventilated to avoid the likelihood of foul air and gases accumulating in the drainage system and sewer, and
- f. be constructed to avoid the likelihood of damage from superimposed loads or normal ground movement.
