
PINKBAR™ FIBERGLAS™ REBAR LESS WEIGHT. MORE STRENGTH™.

PINKBAR™ Fiberglas™ Rebar is designed as a cost-effective, lightweight, rust-free reinforcement solution for concrete over traditional steel rebar.

- Designed for use in flatwork/slabs-on-grade, and residential footings and foundation walls.
- Meets physical and mechanical requirements of ASTM D7957 material standard for Solid Round Glass Fiber Reinforces Polymer (GFRP) Bars for Concrete Reinforcement.
- Made with boron-free Advantex® E-CR glass fibers and epoxy resin.
- Proprietary sand coating enables superior bonding with concrete.

Product Advantages Compared to Steel

Less Weight. Less Install Time. Fewer Truckloads.
Up to 7x LIGHTER than steel**
- Cut install time in half*
- Save on transportation

Less Overall Cost
From purchase to install, users can save an average of 33% on total-cost compared to steel*

More Strength
PINKBAR™ Fiberglas™ Rebar is 2x stronger in tensile strength compared to the same size diameter of grade 60 steel.

More Durability
PINKBAR™ Fiberglas™ Rebar will never rust, making concrete structures more durable, especially in corrosive environments.

*Based on average estimates of a conventional 6" thick rectangle slab, $60 per hour labor rate. Pricing and labor rates can vary by region and fluctuations in the market.
**Comparing #3 PINKBAR™ with #4 steel rebar. #3 PINKBAR™ replaces #4 steel rebar in flatwork applications requiring reinforcement for shrinkage crack mitigation.

Proven Performance

ASTM D7957
- PINKBAR™ Fiberglas™ Rebar meets physical and mechanical requirements of ASTM D7957 material standard
- Material Certifications are provided upon request and purchase

ACI 332 & ACI 440
- PINKBAR™ Fiberglas™ Rebar can be used in residential concrete, including footings and foundation walls, as prescribed in ACI 332 using ACI 440 design methodology

ICC-ES AC454
- Meets or exceeds ICC-ES AC 454 acceptance criteria including bond strength, tensile strength, and tensile modulus of elasticity.

*Per PINKBAR™ submittal package pending ICC-ES AC 454 evaluation

Proven Crack Mitigation in Flatwork
Through independent testing, #3 PINKBAR™ has been proven to mitigate shrinkage cracks as effectively #4 steel in poured slabs and can increase the long-term service life of flatwork due to the non-corrosive properties of fiberglass rebar.*

*Restrained Shrinkage Testing at University of Brescia, Italy, 2020

Applications

PINKBAR™ Fiberglas™ Rebar is intended for use in:

RESIDENTIAL		COMMERCIAL/INDUSTRIAL	
• Driveways	• Basement walls	• Parking Slabs	• Architectural Precast
• Sidewalks	• Footings	• Warehouse Floors	• Truck Aprons
• Pool Decks	• Concrete Masonry	• Agricultural Slabs	• Pour Back Slabs
• Basement Floors	• ICF Construction	• Loading Docks	

Physical & Mechanical Properties

Handling & Placement

Handling and installation of PINKBAR™ Fiberglas™ Rebar is the same as for steel bars, with a few notes and exceptions:

- Cutting: Do not shear fiberglass bars. Field cut fiberglass bars using a fine blade saw, grinder, and carborundum or diamond blade. Sealing the ends of fiberglass bars is not necessary.
- Chairing: Place chairs at a spacing that ensures adequate concrete cover.
- Tying: Use same tying methods as for steel rebar. Tie wire material based on contractor preference.

As with any reinforcement placement, be sure to follow best practices in all phases of your concrete project, from planning to construction, including pouring, curing, joint cutting, and maintenance for optimal performance.

Packaging

PINKBAR™ Fiberglas™ Rebar ships from multiple locations in the U.S. Master bundles and sub-bundles are available in standard sizes.

BAR SIZE	WEIGHT PER 20 FOOT BAR (lb)	NO. OF BAR PER SUB-BUNDLE	WEIGHT PER SUB-BUNDLE (lb)	NO. OF BARS PER MASTER BUNDLE	WEIGHT PER MASTER BUNDLE (lb)	NO. OF BARS IN A FULL TRUCK LOAD (FTL)	WEIGHT PER FTL (lb/ton)
#2	0.94	50	45	500	450	46,000	42,000/21
#3	2.15	20	42	500	1050	19,000	40,000/20
#4	3.63	10	36	500	1800	12,000	44,000/22
#5	6.26	10	62	250	1550	7,250	44,000/22

Stock bent bars are available on request.

Labeling & Certificates

Production lot certificates are available upon request – traceable by bar marks imprinted on the bar in intervals showing the bar diameter, stock order and production date.

Storage

PINKBAR™ Fiberglas™ Rebar is durable in the outdoor environment. Discoloration, fading or chalking of the surface can occur due to oxidation or UV exposure. However, this is cosmetic only and will not affect the performance of the bar. For prolonged exposure under direct sunlight, protective cover is recommended to minimize these effects.
