

# 4 Steps to Hanging Picture Frames on Your Wall:

01.

## Plan your layout:

Before drilling holes, **arrange your artwork** on the floor or a table. **Experiment** with different configurations, considering balance (symmetrical, asymmetrical, or a central piece) and how the pieces will look together.

02.

## Mark the hanging points:

**Measure** and mark the centre **point** on the back of each frame, where the **hanger** will go.

**Impact Framing do this step for you!**

03.

## Measure and mark the wall:

Decide on the height for your artwork (**around eye level** is ideal, but adjust based on size and function of the room). Using your measurements from the frame, **mark** the corresponding **spots on the wall** where the picture hooks will be placed. Ensure the marks are level using a **spirit level**.

04.

## Hang your artwork:

Mount the picture **hooks securely** into the marked spots on the wall. **Hang your artwork** by placing the hooks on the back of the frame over the picture hooks on the wall. **Adjust** the position as needed until you're **happy** with the arrangement.
