

APCP-1700 SERIES - AUTOMATIC POOL COVER PUMP

APPLICATIONS

Water remaining on pool covers for an extended period adds extra weight and can cause ripping or tearing, resulting in costly repairs or replacement. Little Giant's industry-leading APCP-1700 automatically removes water from pool covers, boat covers or rooftops – providing added protection from prolonged accumulation of precipitation. Designed to pump an impressive 1700 gallons per hour, the APCP-1700 easily attaches to a standard garden hose for effortless water removal.

FEATURES

- Activates when water level reaches 2", turns-off when water level drops below 1"
- 1" FNPT discharge with 3/4" hose adapter
- Side discharge for optimal water removal
- Weighted to attract water to the pump
- Removable intake screen
- 25 ft power cord
