Multi Air Flow

Circulation of cool air through multiple vents ensures efficient cooling at ideal temperature.

Total No Frost Cooling Technology

Eliminates the hassle of manual frost removal and provides better freezing. Even air flow distribution allows foods to be kept fresh longer in a no frost environment.

Moist Control Fresh Zone

Controlled airflow in the drawers ensures fruit and vegetables stay crisp and fresh longer. High humidity reduces dryness and increases moisture in vegetables to keep them fresh. Low humidity lets moisture to escape and keep the fruits crispy.

Adjustable Tempered Glass Shelf

Achieve efficient storage with shelves that can be lowered or raised, while the tempered glass design is able to withstand heavy loads.

Lower Noise

Noise-absorption copper tube with optimised cooling system and high-efficiency, low-noise compressor.

Energy-Saving LED Lighting

LED lighting has a longer lifespan and consumes lesser energy compared to conventional bulb.

Movable Twist Ice Maker

You can remove the ice maker for a more convenient and efficient use of storage space when not in used.

Energy Efficiency

A fridge runs 24 hours a day but ELBA's energy-efficient models consume less electricity, thus giving you more savings in cost while maximising your food freshness.

LTC Sterilization Device *

Nano-silver ion technology purifies the air and preserves the original flavour and fragrance of food, while effectively prevent bacteria and removes unpleasant odours inside the fridge.

* Applicable for EMR-H5244D(BS) & EMR-G5244D(SV)

SIDE-BY-SIDE REFRIGERATOR

Temperature Control

Set the temperatures of the freezer and fridge compartments independently for more appropriate storage.

Child Lock on Control Panel

Prevents children from changing temperature settings.

Smart Mode

Sets the temperature of two compartments automatically according to internal temperature and ambient temperature.

Super Cooling Mode

To cool and conceal the fridge compartment quickly to the lowest temperature.

ECO Mode

Optimizes cooling power by adjusting the temperature automatically for small or light storage to ensure better energy saving.

Super Freezing Mode

Enables faster freezing of food in very short amount of time to prevent bacteria growth in the food while preserving flavour and freshness.

Upgraded for extra storage to accommodate a comfortable and lavish lifestyle, ELBA Side-by-Side Refrigerator is a definite family favourite with its timeless design and style. With the convenience of controlling your refrigerator temperature at your fingertip, a continuous supply of fresh food is a definite yes!

Separate Cooling System, No Odour Transfer

Make storage easy for foods with a strong odour with its Separate Cooling System, a feature designed to mitigate odour transfer between the freezer and the fridge while ensuring the food stays fresh for longer with optimal temperature in each section.

Total No Frost Cooling Technology

Eliminates the hassle of manual frost removal and provides better freezing. Even air flow distribution allows foods to be kept fresh longer in a no frost environment.

Multi Air Flow

Circulation of cool air through multiple vents ensures efficient cooling at ideal temperature.

Energy-Saving LED Lighting

LED lighting has a longer lifespan and consumes lesser energy compared to conventional bulb.

Elegant Interior Design

Carefully designed with an energy-saving LED light while maximizing the interior space for ease and convenience of everyday use, ELBA Side-by-Side Refrigerator would definitely change up your kitchen space.

Double Storage Endless Convenience

Comes with multiple translucent drawers that aim to shorten the time you spent looking for your grocery, its storage capacity will definitely meet your demand while also ensuring that your everyday needs are stored neatly.

All Purpose Door Pocket

With convenience in mind, the All Purpose Door Pocket are there for the placement of taller groceries such as bottled gallon beverages or two layers of canned drinks. This would greatly meet your demand for easy bottle storage.

FRENCH DOOR REFRIGERATOR

With the technology to maintain the optimum cooling temperature, indulging in fresh vegetables, fruits, and meats isn't a dream. Built to maximize convenience with wider compartments that take up less space, you can organize many of your favourite food according to your liking while keeping them crisp for a longer period.

Extra Wide Interior
Spacious interior layout with double sliding cases lets you store large dishes and big items.

Multi Door & Door Pockets
Organise different types of food separately at the optimal temperature.

Pull-out Freezer Drawers
Smooth and easy access.

Smart Mode
Sets the temperature of two compartments automatically according to internal temperature and ambient temperature.

Quick Cooling Mode
To cool and conceal the fridge compartment quickly to the lowest temperature.

Super Freeze Mode
Enables faster freezing of food in very short amount of time to prevent bacteria growth in the food while preserving flavour and freshness.

Holiday Mode
To optimizes the fridge in higher temperature to save energy when away for holiday while keeping the freezer in frozen state.

Child Lock on Control Panel
Prevents children from changing temperature settings.

Multi Air Flow
The multi directional air-flow system assures the even circulation of the cold air throughout the entire compartment while the absence of frost guarantees the optimal preservation of food freshness by keeping the natural quality and nutrition of food intactly.

Metal Guide Rail
Smooth push and pull, saving labor in storage and taking.

The Fresh Convertible (Crisper & Chill In One Box)
The flexible compartment adapts to your needs to adjust airflow and humidity for preserving meat or vegetables.

Inverter Technology
It can help you save energy, in turn saving your money, measures the conditions inside your fridge and manages the output accordingly, and also ensures a more stable temperature inside to extend the life of your appliance.
