## **1.0 SAFETY PRECAUTIONS**

1. Keep electrical appliances out of reach from children. Do not let them to operate the appliances without supervision.
2. To protect against the risk of electrical shock, do not immerse the product, power cord or plug into water or any other liquid.
3. This product is for household and indoor use only.
4. This product is not intended for use by person (including children) with reduced physical, sensory or mental capabilities unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
5. If the power cord or plug is damaged, it must be replaced by the service centre or a qualified service technician to avoid hazard.
6. Before installation, check if the mains supply voltage is matched with the voltage stated on the rating plate of the cooker hood.
7. There must be adequate air ventilation of the room when the cooker hood is used with the cooking appliances with burning gas or other fuels.
8. Ensure that the installation of exhaust complies with the standard of local building, gas and electrical authorities.
9. Do not ignite flames in the pans.
10. There is a risk of fire if cleaning is not carried out in accordance with this instruction.

## 2.0 ASSEMBLY INSTRUCTIONS

Please check the following before installation:

- Installation of cooker hood must be carried out by an authorized or qualified technician.
- Remove all packaging materials from the cooker hood. Check and make sure that the cooker hood is not damaged.
- Please ensure the power supply has switched OFF when installing the cooker hood.
- For optimum air extraction, avoid having too many windows surrounding the cooker hood which will cause air convection.
- The optimum height for the installation is between 350 to 400mm which is measured from the bottom of the cooker hood to the top of the hob.
- Make sure the hood is in level after installation to avoid oil spill over from the oil cup.

- Before installing, determine the height between the bottom of the cooker hood to the top of the hob. Mark on the wall to suit the bracket locations.
- Drill 3 holes with diameter of  $\varnothing 8\text{mm}$  and 60mm deep. Insert the screw anchors into the holes. Fix the mounting bracket and tighten the screws.
- Remove the horizontal oil cup. Hang the cooker hood on the mounting bracket and make sure the cooker hood is in level.
- Fix the exhaust ducting on the cooker hood. Install the oil cup on the cooker hood.
- Install the telescopic exhaust cover to the height required.
- Before connecting to the mains supply, ensure that the mains voltage corresponds to the voltage on the rating plate of the cooker hood.

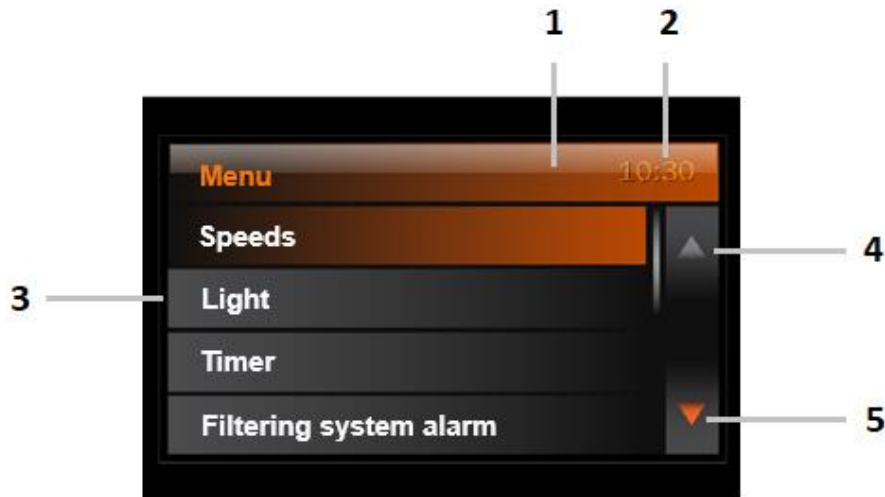

## 3.0 PRODUCT DESCRIPTIONS
