

**PETRON
PLUS™
FORMULA 7**

Conforms to OSHA HCS 2012 (29 CFR 1910.1200)

SAFETY DATA SHEET

PETRON PLUS™ THE ENGINE CONDITIONER

Part No. 12121-12oz, 12121-1g, 12121-5g, 12121-54g, 12121-275g, 12121-330-g

SECTION 1. PREPARATION INFORMATION

Date	:	March 18, 2015
GHS Product identifier	:	Petron Plus The Engine Conditioner ID #: 12121-12oz, 12121-1g, 12121-5g, 12121-54g, 12121-275g 12121-330g
Code	:	Lubricant and Supplement.
CAS Number	:	Not Applicable for mixtures.
Synonyms	:	None.
Generic Chemical Name	:	Mixture.
Applications include the Following	:	Gasoline Engines and Propane Engines Oil Supplement, 12oz. to 4 to 6 quarts of engine oil. Do Not use in diesel engines.
Manufactured by	:	PETRON PLUS GLOBAL, INC. P. O. BOX 1906 208 East 2nd HUTCHINSON, KS. 67504-1906 USA
Contact Information	:	620/663-1800 - Phone info@petronplus7.com Emergency Health and Safety Number: CHEMTREC: 800.424.9300 (24 Hours) International: +1-703-527-3887

SECTION 2. HAZARDOUS IDENTIFICATION

Hazard Classification

Unknown toxicity

- Acute toxicity, oral : 0.03 %
- Acute toxicity, dermal : 0.03 %
- Acute toxicity, inhalation, vapor : 7.84 %
- Acute toxicity, Inhalation, dust : 7.84 %

- Health hazards** :
- Aspiration hazard Category 1
 - Reproductive toxicity Effects on or via lactation
 - Acute toxicity (Oral) Category 4
 - Specific Target Organ Toxicity Category 2
 - Repeated Exposure

- Environmental hazards** :
- Hazardous to the aquatic environment, acute hazard Category 3
 - Hazardous to the aquatic environment, long-term hazard Category 1

OSHA Defined hazards : Not classified.

Classification of the substance or mixture : Not Classified.

Label elements :

Signal Word : Danger.

Hazard statement :

- May be fatal if swallowed and enter airways.
- May cause harm to breast-fed children.
- Harmful to aquatic life.
- Very toxic to aquatic life with long lasting effects.
- Harmful if swallowed.
- May cause damage to organs through prolonged or repeated exposure.

Precautionary statements

Prevention :

- Do not breathe dust/fume/gas/mist/vapors/spray.
- Do not handle until all safety precautions have been read and understood.
- Avoid contact during pregnancy/while nursing.
- Wash thoroughly after handling.
- Do not eat, drink or smoke when using this product.
- Avoid contact with eyes.
- Avoid release to the environment.
- Observe good industrial hygiene practices.

SECTION 2. HAZARDOUS IDENTIFICATION, Cont.

Precautionary statements, Cont.

- Response** : IF SWALLOWED: Call a POISON CENTER or doctor/physician. Do NOT induce vomiting. If exposed or concerned: Get medical advice/attention. Wash thoroughly after handling. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Storage** : Store in well-ventilated place. Keep container tightly closed.
- Disposal** : Disposal of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.

Hazards not otherwise classified : None known.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

- Substance/mixture** : Mixture
- Other means of identification** : Not applicable.
- CAS Number/other identifiers**
- CAS number** : Not applicable.

CHEMICAL NAME	CAS # or	% RANGE
Distillates (petroleum), hydrotreated heavy paraffinic	64742-54-7	20 - 50 %
Proprietary Ingredients	Mixture	10 - 40%
Mineral Oil	Not determined	} 3 - 20 %
Alkaryl amine	Confidential	} 0.7 - 2 %
Zinc alkyldithiophosphate Mixture	Confidential	} 0.7 - 2 % } 5 - 20 %
Zinc alkyldithiophosphate	84605-29-8	} 0.1 - 0.8 %
Diphenylamine	122-39-4	} 0.01 - 0.08
Highly refined mineral oil (C15-C50 01154100-5165P	Mixture	} 1 - 10 %Mixture
	Trade secret	} 0.1 - 1 %
Highly refined mineral oil (C15-C50	Mixture	} 1 - 10 %
Calcium branched chain Alkylated phenol sulfide	Trade secret	} 1 - 5% Mixture
Fatty Acid, Tall-Oil, Esters with Neopentyl Glycol	68002-76-6	1 - 5 %
Alkaryl amine	Confidential	0.3 - 0.8 Mixture
Diphenylamine	122-39-4	0.005 - 0.05%
Mineral Oil	64742-53-6	0.04 - 0.06

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS, Cont.

The mineral oil contained in this material may be described by one or more of the following CAS Nos.: 64742-54-7, 64742-65-0, 64742-55-8, and 64742-56-9.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4. FIRST AID MEASURES

Description of necessary first aid measures

- Eye contact** : Immediately flush eyes with plenty of water (for 30 minutes), occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
- Inhalation** : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Launder contaminated clothing before reuse. Get medical attention if symptoms occur.
- Ingestion** : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do NOT INDUCE VOMITING unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye Contact** : Direct contact with eyes may cause temporary irritation.
- Inhalation** : May cause respiratory irritation or other pulmonary effects following prolonged or repeated inhalation of mist at airborne levels above recommended mineral oil exposure limit.
- Skin contact** : If material is heated, thermal burns may result from skin contact.
- Ingestion** : No known significant effects or critical hazards.

Over-exposure signs/symptoms

- Eye Contact** : No known significant effects or critical hazards.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : No known significant effects or critical hazards.

Indication of immediate medical attention and special treatment needed, if necessary

- Note to physician** : Acute aspirations of large amounts of oil-laden material may produce a serious aspiration pneumonia. Patients who aspirate these oils should be followed for the development of long-term sequelae. Inhalation exposure to oil mists below current workplace exposure limits is unlikely to cause pulmonary abnormalities.
- Special treatment** : No special treatment.
- Protection of first-aiders** : No special protection is needed.

SECTION 5. FIRE-FIGHTING MEASURES

NEPA 704 Hazard Class

Health: 1 Flammability: 1 Instability: 0

0 (Minimal)
1 (Slight)
2 (Moderate)
3 (Serious)
4 (Severe)

Extinguishing media

Suitable extinguishing media : Water fog, Foam, Dry chemical, Carbon dioxide (CO₂).

Unsuitable extinguishing media : Do not use water jet as an extinguisher, as this will spread the fire.

Extinguishing media, Cont.

Specific hazards arising from the chemical : During fire, gases hazardous to health may be formed.

Hazardous thermal decomposition products : Decomposition products may include the following materials: carbon dioxide, carbon monoxide, nitrogen oxides, sulfur oxides, and other products of incomplete combustion.

Special protective actions for fire-fighters : Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode. Move containers from fire area if you can do so without risk.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on the suitable and unsuitable materials. See also the information in "For non-emergency personnel".

SECTION 6. ACCIDENTAL RELEASE MEASURES, Cont.

Personal precautions, protective equipment and emergency procedures, Cont.

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

SPILL PROCEDURES : For Small Spills: ventilate area, wear chemical splash goggles. Wear rubber boots. Prevent entry into sewers, waterways. Pick up free liquid for recycle or disposal. Absorb small amount on inert material for disposal.

SPILL PROCEDURES : For Large Spills: Personal Protective Equipment must be worn. Avoid skin contact. Use skin protection. See Personal Protection Section for additional PPE recommendations. Take precautions to avoid release to the environment. Ventilate area if spilled in confined space or other poorly ventilated area. Prevent entry into sewer and waterway, dispose of in accordance with all federal, state and local environmental regulations. Pick-up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material.

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section *). Avoid contact with used product. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in area where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in original container protected from direct sunlight in dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and keep upright to prevent leaking. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Occupational exposure limits

Under conditions which may generate mists, the following additional exposure limits are recommended: ACGIH TLV TWA: 5 mg/m³; STEL: 10 mg/m³.

Appropriate engineering controls : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION, Cont.

Control parameters, Cont.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a skin risk assessment indicates this is necessary.

Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection : Use a properly fitted, air-purifying or supplied air respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Physical state : Liquid.
Color : Brown.
Odor : Mild hydrocarbon.
Odor threshold : Not available.
pH : Not available.
Pour point : <-10°F (-23.3°C).
Boiling point : Not available.
Flash point : >310°F (154°C). [Cleveland]
Evaporation rate : Not available.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES, Cont.

Appearance, Cont.

Flammability (Solid, gas)	:	Not available.
Lower and upper explosive (flammable) limits	:	Not available.
Vapor pressure	:	Not available.
Vapor density	:	Not available.
Relative density	:	Not available.
Solubility	:	Not available.
Partition coefficient: n-octanol/water	:	Not available.
Auto-ignition temperature	:	Not available.
Decomposition temperature:	:	Not available.
Viscosity	:	Not available.
Specific Gravity:	:	1.026 @ 60 degrees F.
Density	:	8.545 (lbs/gal).

SECTION 10. STABILITY AND REACTIVITY

Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	:	This product is stable.
Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	:	No specific data.
Incompatible material:	:	Reactive or incompatible with the following materials: Oxidizing materials.
Thermal Decomposition	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Eye	:	Weak to moderate eye irritant. Based on data from components or similar materials.
Skin	:	Cause mild skin irritation. Based on data from components or similar materials
Inhalation	:	Not expected to be a problem as long as exposure limits are not exceeded.
Ingestion	:	Expected to be a low ingestion hazard. Based on data from components or similar materials.

SECTION 11. TOXICOLOGICAL INFORMATION, Cont.

Information on toxicological effects

Acute toxicity

Oral

Component : ATEmix > 10,000 mg/kg

Dermal

Component : Not classified for acute toxicity based on available data.

Inhalation

Component : Not classified for acute toxicity based on available data.

Skin Corrosion/Irritation

Component : Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, and cracking of the skin.
Remarks: Causes mild skin irritation.

Serious Eye Damage/Eye Irritation

Component : Direct contact with eyes may cause temporary irritation.

Respiratory sensitization

Component : No data available.

Skin sensitization

Components

Mineral oil : Classification: Not a skin sensitizer. (Read across) Not a skin sensitizer.

Zinc alkyldithiophosphate : Classification: Not a skin sensitizer. (Literature) Not a skin sensitizer.

Zinc alkyldithiophosphate : Classification: Not a skin sensitizer. (Literature).

Diphenylamine : Classification: Not a skin sensitizer. (Literature).

Specific Target Organ Toxicity - Single Exposure

Components

Mineral oil : If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract.

Diphenylamine : Exposure to a high concentration of vapors or mist may be irritating.

Aspiration Hazard

Components

Mineral oil : Material can be aspirated into the lungs during the act of swallowing or vomiting. This could result in severe injury to the lungs and death.

Other effects

Components

Diphenylamine : Kidney Blood Liver.

SECTION 11. TOXICOLOGICAL INFORMATION, Cont.

Chronic Effects

Carcinogenicity

Components : Not expected to cause cancer. This product contains mineral oils which are severely refined and not considered carcinogenic. All the oils in this product have been demonstrated to contain less than 3 % extractables by IP-346 test.

IARC Monographs on the Evaluation of Carcinogenic Risks to Humans:

: No carcinogenic components identified.

US. National Toxicology Program (NTP) Report on Carcinogenic:

: No carcinogenic components identified.

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050):

: No carcinogenic components identified.

Germ Cell Mutagenicity:

Alkaryl amine : This material has not exhibited mutagenic or genotoxic potential in laboratory tests.

Diphenylamine : The Ames Salmonella test for mutagenicity was negative for this product. The mouse micronucleus and the ray hepatocyte UDS tests for genotoxicity were negative for diphenylamine.

Reproductive Toxicity

Diphenylamine : There are conflicting reports in the literature concerning the teratogenicity of diphenylamine. However, because the predominant route of exposure was oral (via gavage or diet) and relatively high dose levels were administered in the studies where positive effects were observed, it would not seem to present a workplace hazard.

Specific Target Organ Toxicity - Repeated Exposure

Diphenylamine : A two year feeding study in rats and dogs of diphenylamine demonstrated liver, kidney and blood cell damage. The effect was observed at levels as low as 100 ppm. A five month feeding study in rats of 1% diphenylamine produced renal cystic disease. A dose-dependent increase in Heinz body formation was evident during a 12 week study of 5 to 1000 ppm. The no effect level was at 10 ppm.
Dermal: Target Organ(s): Liver, Kidney
Inhalation: Target Organ(s): Kidney, Liver
Oral Target Organ(s): Liver, Kidney

SECTION 12. ECOLOGICAL INFORMATION, Cont.

Toxicity to Microorganisms

- Alkaryl amine : LC 50 (Sludge, 0.1 d): > 1,000 mg/l
Zinc alkyldithiophosphate : LC 50 (Sludge, 0.1 d): > 10,000 mg/l

Persistence and Degradability

Biodegradation

- Mineral Oil : OECD TG 301 B, 31 %, 28 d, Not readily degradable.
Alkaryl amine : OECD TG 301 B, 0 %, 28 d, Not readily degradable.
Zinc alkyldithiophosphate : OECD TG 301 B, 1.5 %, 28 d, Not readily degradable.
Zinc alkyldithiophosphate : OECD TG 301 B, 1.5 %, 28 d, Not readily degradable.
Diphenylamine : OECD TG 301 D, 26 %, 26 d, Not readily degradable.

Bioaccumulative Potential

Bioconcentration Factor (BCF)

- Alkaryl amine : Bioconcentration Factor (BCF): 1,584.89 (Measured).

Partition Coefficient n-octanol / water (log Kow)

- Zinc alkyldithiophosphate : Log Kow: 2.21 20°C, 68°F (Measured).
Zinc alkyldithiophosphate : Log Kow: 0.56 (Measured).

Mobility : No data available.

Other Adverse Effects : No data available.

SECTION 13. DISPOSAL CONSIDERATION

WASTE DISPOSAL : This material, if discarded, is not a hazardous waste under RCRA Regulation 40CFR 261. The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROL/PERSONAL PROTECTION for additional handling information and protection of employees.

SECTION 14. TRANSPORTATION INFORMATION

U.S. DOT : Not regulated as dangerous goods.

IMDG : Not regulated as dangerous goods.

IATA : Not regulated as dangerous goods.

Special Precautions for User : No special precautions.

Shipping description may vary based on mode of transport, quantities, temperatures of the material, package size, percent of each component, and/or origin and destination it is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material. For transportation, steps must be taken to prevent load shifting or materials falling, and all relating legal statutes should be obeyed. Review classification requirements before shipping materials at elevated temperatures.

SECTION 15. REGULATORY INFORMATION
