

PRISM LIGHT POD
NUTRITION - FITNESS - LIGHT

Full-Body Red Light Therapy

Prism Light Pod is the most advanced full-body red light system for cellular regeneration, tissue repair, & overall wellness.

Accelerate the body's natural healing process up to 10 times faster.

Six Automated Settings
Optimized For:

- Chronic Pain Management
- Arthritis & Joint Pain
- Wound & Injury Healing
- Sports Recovery
- Skin Toning/Anti-Aging
- Weight Loss

Improve Recovery & Whole-Body Wellness

- Rejuvenates the entire body within 15 minutes
- Accelerates repair of damaged muscles, tendons, tissues and reduces inflammation
- Restores normal function of body cells, speeds healing & soothes chronic pain, and promotes mitochondrial wellness
- Safe, non-invasive, no UV rays, non-florescent, no infrared heat

Most-Powerful & Energy-Efficient Red Light Pod

14,000 100 mW/cm² of red and near-infrared LEDs penetrate muscles, joints, deep tissues, skin, and nerves to relieve pain, improve hair restoration, improve skin texture and appearance by producing collagen to promote anti-aging & reduce the appearance of wrinkles. Helps weight loss by shrinking unwanted fat cells for wellness from the inside out.

Naturally repair and regenerate healthy body cells to their normal functionality.

ROI Business Case

Adding Prism Light Pod red light services to your Medical Spa menu will generate a substantial new line of incremental revenues.

For example; if your clinic is open 5 days a week from 9am-5pm, you have the capacity of adding 120 light pod sessions per week or 6,240 sessions per year, that's a revenue capacity of \$312,000 of potential incremental annual revenues at \$50 per session.

Here's a revenue and post-tax ROI breakdown based on capacity utilization:

At **100%** utilization: \$312,000 divided by cost of \$13,000* per year = annual **ROI 240%**

At **75%** utilization: \$234,000 divided by cost of \$13,000* per year = annual **ROI 180%**

At **50%** utilization: \$156,000 divided by cost of \$13,000* per year = annual **ROI 120%**

At **25%** utilization: \$78,000 divided by cost of \$13,000* per year = annual **ROI 60%**

You may finance or lease the pod with zero-down 60-months at approx. \$1500/month and pay off the entire pod within several months. Your light pod will qualify for a section 179 IRS tax deduction of approximately \$5,000 per year *.

Q&A

- **Is Prism Light Pod safe and effective?**
- Yes. Prism Light Pod uses non-invasive, non-fluorescent, non-UV rays, and non-infrared heat-based red LED technology. Prism Light Pod has pioneered & perfected whole body photobiomodulation systems for resort spas worldwide.
- **How does it work?**
- Red Light Therapy delivers deep photo-cellular or mitochondrial healing. Clients lay comfortably for 15-minute sessions. The automatic timer turns Prism Light Pod off at the end of each session and the receptionist wipes it down with a disinfectant wipe
- **How much training and administration is required?**
- There is no training required and the Prism Light Pod is automated and 100% unattended. There are six-optimized use-case settings.
